## **HISTORICAL DEVELOPMENT CONSENTS IN NSW**

**Name:** Sofie Rodda  
**Date Received:** 28 May 2024

Dear Council Members,

I am writing to express my strong opposition to the approval of the proposed Zombie development application (DA) for clear-felling land in the Tura/Mirador corridor that harbors endangered flora and fauna. This pristine area is home to several at-risk species that play vital roles in our ecosystem. Clear-felling will irreparably damage their habitats, pushing these species closer to extinction and disrupting the ecological balance.

Preserving this land is not only crucial for biodiversity but also for maintaining the environmental health of our region. Trees and native plants contribute to air quality, water retention, and soil stability. Destroying these natural resources for short-term gains is shortsighted and detrimental to our community's long-term wellbeing.

I urge the council to reject this DA and instead explore sustainable alternatives that protect our endangered species and support ecological preservation. Let us prioritize the health of our environment and the legacy we leave for future generations.

Please also reform ALL the laws which currently allow critical nature to be destroyed by 'zombie' projects. They should not be happening.

Sincerely,

Sofie Rodda
