**THE ELECTRICITY OUTAGES AFFECTING FAR WEST NSW IN OCTOBER
2024**

Name: Mr Grant Boylan

Date Received: 10 February 2025

The effect of the power outage last year upon our household was that my wife has a sleep apnea machine, and she needs this to be able to sleep properly .During this outage we had to run a generator which we are very lucky to have purchased previously also we could not purchase fuel for about 4 days as none of the fuel outlets in Broken Hill had power to deliver fuel once again we had enough fuel stored at home to run our generator at night .Another major problem that the only communication was from local ABC which did a great job to keep us informed as much as they could but they had very little information to pass on.
