Having supported the proposed NB Hospital and advocated for it, I argued for its success which has to a degree eventuated. However we always thought and expected that the public part of the equation would be entirely publicly run. In this we were sadly disappointed However with the offer by the management company [REDACTED] I believe there is now an ideal opportunity to remedy this defect and urge that the Government take back that part of the operation and make the public part truly run and adequately funded and managed as a fully public structure.
