**INFRASTRUCTURE FOR ELECTRIC AND ALTERNATIVE ENERGY SOURCE
VEHICLES IN NSW**

Name: Tim Beniuk
Date Received: 25 April 2025

Range anxiety relates not to the distance an EV can travel, but the availability of fast chargers, and the time it takes to charge. The only solution for current model EVs is a massive investment in fast chargers strategically located throughout regional NSW, particularly in strategic routes, such as Sydney to the Snowy Mountains or Sydney to Central West towns. Such chargers need very regular inspection and maintenance - it's no good installing them and then leaving them without regular inspection to ensure they are in good working order. Thanks for looking into this issue.
