**INFRASTRUCTURE FOR ELECTRIC AND ALTERNATIVE ENERGY SOURCE
VEHICLES IN NSW**

Name: Goutham Kotera

Date Received: 27 April 2025

I own a Tesla. The only reason I can't switch over to another brand is the lack of reliable charging infrastructure. With the few non Tesla charging stations we have currently, the main issues are reliability, speed of charging and ease of use. I don't get reliable information about the status of a charging station. Each service provider has their own app and billing system. The new proposed infrastructure should be accessible via a single app with accurate information on status of the station and declutter payment systems. This app should be a one stop shop even for existing charging stations
