**INFRASTRUCTURE FOR ELECTRIC AND ALTERNATIVE ENERGY SOURCE
VEHICLES IN NSW**

Name: Ms Kim Grierson

Date Received: 2 May 2025

I have a 15 year old EV still not missing a beat.

I am very keen to see more infrastructure. With more charging opportunities people will be able to buy cheaper cars with smaller batteries and still get everywhere they need to go.

I request more charging places along the Sydney to Newcastle freeway route including some for chademo.

I request that we discourage by regulation or tax regimes the larger cars including EVs that are swamping our country. They are leading to a higher death and injury rate and using far more resources to make and run. And taking more space for parking and on our streets.

I request encouragement of new EVs to be able to easily have vehicle to grid or vehicle to home both to help stabilise the grid, and to help run homes, especially during storms, and other emergencies.
