

**The Hon Daniel Mookhey MLC**  
Treasurer

**Supplementary question for written response**

**Date question asked: 20 September 2023**

**Due LC: 10.00 am, 21 September 2023**

**The Hon Mark Latham:** My supplementary question for written answer is directed to the Treasurer. For the various global heating policy measures the Treasurer outlined in his budget, by what amount, measured in degrees Celsius, will they reduce global heating?

**ANSWER**

This question is best answered by the Minister for Climate Change, Minister for Energy, Minister for the Environment, and Minister for Heritage.

However, I am advised the Intergovernmental Panel on Climate Change (IPCC) assessment reports provide information on the near-linear relationship between cumulative CO<sub>2</sub> emissions and the increase in global surface temperature. It can be accessed at <https://www.ipcc.ch/>.

The NSW Government's climate change election commitments are on the public record and its policies, targets, and programs supported by the 2023-24 Budget, align with the objectives of the United Nations Framework Convention on Climate Change and the IPCC. We are acting on the best available scientific advice and wish to ensure NSW plays its part to meet the challenge of global heating.
