## Terms of Reference

1. That General Purpose Standing Committee No. 5 inquire into and report on the closure of residential training at the Murrumbidgee College of Agriculture and in particular:
  - (a) the process by which the decision was made to close the residential training,
  - (b) the community and industry consultation that preceded the announcement of the proposal,
  - (c) the impact on the Leeton and Yanco communities and district, and
  - (d) the reasons why Murrumbidgee and Tocal Colleges have not been transferred to the Department of Education and Training.
2. That the Committee report by Thursday 23 September 2004.<sup>1</sup>

---

<sup>1</sup> NSW Legislative Council *Hansard* No 52, 5 May 2004, p677, subsequently resolved by the House that the reporting date for the inquiry be extended to Thursday 21 October 2004, NSW Legislative Council *Hansard* No 73, 23 September 2004, p11365.

## Chair's Foreword

The decision to cease full-time residential courses at Murrumbidgee College of Agriculture (MCA) was announced by the Minister for Primary Industries on 3 September 2003, and all residential facilities at the College were closed by the end of 2003. While some consultation was undertaken in formulating the original 2000 Report, the final decision was made without fully consulting teachers, students or the local community and has been the subject of considerable concern by the affected communities. The lack of consultation was a major factor in influencing the Legislative Council to refer the matter to General Purpose Standing Committee No 5 for inquiry and report.

In this report the Committee puts the view that consultation is an essential part of ensuring governments meet the needs of communities, particularly rural communities. Although a Rural Communities Impact Statement was prepared by the Department in relation to this decision, the Committee is concerned about the apparent lack of rigour in its preparation. To address this concern, the Committee recommends that all rural community impact statements be assessed by the Office of Rural Affairs before being included in any proposal going to Cabinet.

It has become clear to the Committee, through its public hearings and from the many submissions it received, that Murrumbidgee College of Agriculture is a unique institution that is meeting the needs of members of the Leeton and Yanco communities. The College makes a substantial contribution to the social capital of the community by catering for students disadvantaged by distance and the economic impacts of the ongoing drought in New South Wales. Prior to the decision the College also provided a venue for significant events that attracted many visitors to the region.

The Committee visited the College and was impressed by the size and scope of the College infrastructure and considers the facilities well worth maintaining for future projects. The site visit was valuable and provided the Committee with a worthwhile opportunity to meet both genuine advocates of the College and many country people directly affected by the decision.

This inquiry makes a number of important recommendations recognising the uniqueness of agricultural education in New South Wales. Education is vital to the sustainability of rural communities. With rapid changes in farming technology farmers need to continually upgrade their skills. Recognising that residential facilities are a necessity rather than a luxury for isolated students, indigenous students and farmers attending short courses at MCA the Committee recommends that the Department explore, in consultation with other agencies, innovative ways by which the residential facilities at MCA can be reopened. The Committee further recommends that the Department continue to seek improvement of courses offered and effectively market the courses, to ensure they remain centres of excellence in agricultural education.

Finally, I wish to thank my fellow Committee members for their constructive approach to this inquiry. I would also like to thank the members of the Committee secretariat for their support, particularly Ms Rachel Simpson, Principal Council Officer and Ms Annie Marshall, Council Officer, in drafting a balanced report and organising the Committee's site visit.

Mr Ian Cohen MLC  
**Committee Chair**

## Summary of Recommendations

### **Recommendation 1**

*Page 23*

That all rural communities impact statements be assessed by the Regional Communities Consultative Council before being included in any Cabinet proposal.

### **Recommendation 2**

*Page 34*

That the Department explore with other agencies innovative ways by which the residential facilities at the Murrumbidgee College of Agriculture can be reopened, recognising that residential facilities are essential for isolated students, indigenous students and farmers who may attend short courses at the Murrumbidgee College of Agriculture.

### **Recommendation 3**

*Page 34*

That the Departmental working party examining the future of the Murrumbidgee College of Agriculture infrastructure develop a strategy for use of the residential facilities in consultation with the local community.

### **Recommendation 4**

*Page 35*

That the residential facilities remain intact and functional until such time as the working party examining the future of the College has completed its deliberations and reported.

### **Recommendation 5**

*Page 47*

That the Government recognise the uniqueness and importance of agricultural education in New South Wales and continue to provide adequate financial human and capital resources to Murrumbidgee College of Agricultural, Yanco and CB Alexander Agricultural College, Tocal.

### **Recommendation 6**

*Page 47*

That the Minister, in conjunction with the advisory councils of the Murrumbidgee College of Agriculture and Tocal colleges, continue to seek improvement of courses offered at the Colleges and effectively market these courses, to ensure both colleges remain centres of excellence in agricultural education.

# Chapter 1 Introduction

## Terms of Reference

1.1 On 5 May 2004 the Legislative Council resolved:

1. That General Purpose Standing Committee No. 5 inquire into and report on the closure of residential training at the Murrumbidgee College of Agriculture and in particular:
  - (a) the process by which the decision was made to close the residential training,
  - (b) the community and industry consultation that preceded the announcement of the proposal,
  - (c) the impact on the Leeton and Yanco communities and district, and
  - (d) the reasons why Murrumbidgee and Tocal Colleges have not been transferred to the Department of Education and Training.
2. That the Committee report by Thursday 23 September 2004.<sup>4</sup>

1.2 These terms of reference were referred to the Committee by the House (the Hon Rick Colless MLC) on 5 May 2004. The Committee later resolved that the Chair seek leave of the House to extend the reporting date for the inquiry to Thursday 21 October 2004.<sup>5</sup>

1.3 Accordingly, a motion by the Hon Rick Colless, on behalf of Mr Ian Cohen was agreed to:

That the reporting date for the reference to General Purpose Standing Committee No. 5 relating to the closure of residential training at the Murrumbidgee College of Agriculture be extended to Thursday 21 October 2004.<sup>6</sup>

## Background to the inquiry

1.4 The Department of Primary Industries (the Department)<sup>7</sup> maintains two agricultural colleges in New South Wales – the Murrumbidgee College of Agriculture (MCA) at Yanco and the CB Alexander Agricultural College (Tocal) at Tocal.

1.5 On 3 September 2003 the Minister for Agriculture and Fisheries announced the closure of full-time residential courses at MCA. The decision was based on the findings of a

<sup>5</sup> GPSCNo. 5 *Minutes of Meeting* No 22, Item 7, p3

<sup>6</sup> NSW Legislative Council *Hansard* No 73, 23 September 2004, p11365

<sup>7</sup> At the time of the events discussed in this report the Department was known as the Department of Agriculture. For the purposes of this report 'the Department' will be used to refer to both agencies.

Departmental review conducted in 2000, with the report entitled *Extending Education: Review of the Agricultural Colleges within NSW Agriculture* published in March 2001.

- 1.6 Students who had intended to enrol in Certificate 3 and 4 courses in 2004 and those who were part way through their courses were unable to complete their education at MCA although arrangements were made for students who wished to transfer to Tocal. Only one student took up the Department's offer, transferring to Tocal in 2004 to complete their study.

### **Call for submissions**

- 1.7 Advertisements seeking submissions were placed in the major metropolitan and regional press, including *The Land*, the *Mildura Sunraysia Daily*, the *Wagga Wagga Daily Advertiser*, the *Griffith Area News*, the *Leeton Murrumbidgee Irrigator* and the *West Wyalong Advocate*.
- 1.8 The Committee also wrote to relevant individuals and organisations, including Mr Kevin Sheridan AO, former Director-General of NSW Agriculture, the relevant Ministers – the Hon Ian Macdonald MLC, Minister for Agriculture and Fisheries and the Hon Andrew Refshauge MP, Minister for Education and Training, and Mr Adrian Piccoli MP, Member for Murrumbidgee.
- 1.9 The Committee received a total of 39 submissions. A list of submissions is provided in Appendix 1.
- 1.10 The Committee also received 121 form letters from the “Friends of Tocal”, addressing item 1 (d) of the Terms of Reference specifically. A list of signatories is provided in Appendix 2.

### **Public Hearings and site visit**

- 1.11 The Committee held two public hearings during this inquiry. A list of witnesses is provided in Appendix 3 and transcripts of the hearings can be found on the Committee's website at [www.parliament.nsw.gov.au/committees](http://www.parliament.nsw.gov.au/committees). A number of documents were tabled during the hearings and are listed in Appendix 4.
- 1.12 On 21 June 2004 the Committee flew to Yanco to hold a hearing. The Committee heard evidence from MCA students, parents and other regional stakeholders. The second public hearing was held in Sydney at Parliament House on 5 July 2004 at which Departmental representatives and representatives from the agricultural industry gave evidence. During the first hearing on 21 June 2004 the Committee inspected the Murrumbidgee College of Agriculture's extensive facilities and grounds at Yanco.

### **Procedural issues**

- 1.13 Prior to the commencement of the inquiry the issues surrounding the decision were debated on many occasions in the House.<sup>8</sup> On 16 October, the House agreed to a motion moved by

---

<sup>8</sup> For example, NSW Legislative Council *Hansard*, 3 December 2003, pp5666 - 5674 (article 34); NSW Legislative Council *Hansard*, 2 December 2003, pp5515 - 5516 (article 22); NSW Legislative

the Hon Rick Colless MLC that under Standing Order 52 'all documents relating to the proposed closure of the Murrumbidgee College of Agriculture' be laid on the table of the House by 11 November 2003. The call for papers was met by the Department and the material provided background information for this report.<sup>9</sup>

- 1.14** On 3 December 2003 the House agreed to another motion moved by the Hon Rick Colless MLC, that the House call on the Government to place a 12-month moratorium on the proposed cessation of all residential and full-time courses at MCA. Speaking to the motion the Minister informed the House that 'I wish to make it absolutely clear that the Government does not accept this motion and will proceed with its plans as stated.'<sup>10</sup> The Minister continued that the

suggestion that this decision was made hastily is completely erroneous and utterly misleading ... The issue dates back to 2000, when a comprehensive study was conducted by NSW Agriculture to review the services and costs of agricultural colleges within NSW Agriculture. It was hardly done hastily.<sup>11</sup>

- 1.15** Following the Committee's second public hearing the Chair wrote to the Hon Andrew Refshauge MP, Minister for Education and Training and the Hon Ian Macdonald MLC, Minister for Agriculture and Fisheries requesting copies of correspondence between the Ministers regarding the withdrawal of Commonwealth Education and Training funds from NSW Agriculture. At the time of this report the Committee is continuing to pursue copies of the correspondence, following the Minister's initial refusal to provide the correspondence on the basis of legal advice.<sup>12</sup>

## This report

- 1.16** The Committee adopted this report at a meeting on 18 October 2004. The minutes of this and other meetings held during the inquiry are presented in Appendix 5.

### Structure of the report

- 1.17** This structure of this report reflects terms of reference 1(a) to 1(d) and contains four substantive chapters:

---

Council *Hansard*, 24 February 2004 Page 6385 (article 36); NSW Legislative Council *Hansard*, 16 October 2003, p3979 (article 2). The future of MCA was also debated in the Legislative Assembly.

<sup>9</sup> Legislative Council, New South Wales, *Minutes of Proceedings, No 26*, 1st session of the 53rd Parliament, item 2 and *Minutes Of Proceedings No 30*, 1st session of the 53rd Parliament, item 14

<sup>10</sup> Hon Ian Macdonald MLC, Legislative Council, New South Wales, *Hansard*, 3 December 2003, p5666

<sup>11</sup> Hon Ian Macdonald MLC, Legislative Council, New South Wales, *Hansard*, 3 December 2003, p5666

<sup>12</sup> Correspondence to the Minister for Primary Industries from the Chair, 12 July 2004; Correspondence from the Minister for Primary Industries to the Chair, 4 August 2004; Correspondence from the Chair to the Minister for Primary Industries, 7 August 2004

- Chapter 2 outlines the reasons for the decision to close the full-time residential facilities at Murrumbidgee College of Agriculture, Yanco (referred to throughout the report as ‘the decision’)
- Chapter 3 examines the impact of this decision on the south west region and in particular the Leeton and Yanco communities, the agricultural sector and students of MCA
- Chapter 4 provides an analysis of the consultation process that was undertaken by the then Department of Agriculture in relation to the decision
- Chapter 5 examines the appropriateness of transferring MCA and Tocal College to the Department of Education and Training.

## Chapter 2      The decision to close residential facilities at Murrumbidgee College of Agriculture

On 3 September 2003, the Minister for Agriculture and Fisheries (now the Minister for Primary Industries), the Hon Ian Macdonald MLC (the Minister) announced that full-time residential courses offered at the Murrumbidgee College of Agriculture (MCA) would close at the end of 2003. This chapter addresses Term of reference 1(a) which required the Committee to inquire into and report on:

the process by which the decision was made to close the residential training

In addressing Term of reference 1(a) this Chapter looks at:

- What the decision encompassed
- The reasons for the decision
- The Rural Communities Impact Statement prepared as part of the decision-making process and
- The means by which the decision was communicated to MCA staff, students and parents.

### What was included in the decision?

**2.1** Throughout the inquiry there was some confusion as to the exact nature of the Minister's decision and what the decision included. The Minister's decision was announced in a media release on 3 September which said in part:

Full-time residential programs at the Yanco facility will end on December 13, and students can continue their agricultural studies at Tocal starting in 2004. Yanco's part-time programs will finish when the last of the trainees have completed their traineeships. Future traineeships will be fulfilled by CB Alexander in Tocal or TAFE NSW.<sup>13</sup>

**2.2** The Committee notes that, although not spelled out in the Minister's press release, the cessation of full-time residential courses at MCA also meant that all residential facilities at MCA were closed at the end of 2003.

**2.3** Dr Richard Sheldrake, Deputy Director-General Agriculture and Fisheries, Department of Primary Industries, reiterated the fact that the College had not been closed, as part of his evidence before the Committee on 5 July 2004:

... contrary to the misleading statements frequently appearing in the media, Murrumbidgee College of Agriculture has not been closed but rather remains an important and growing centre for continuing education. More than a dozen new short courses and distance learning courses are being introduced to Murrumbidgee College

---

<sup>13</sup> Hon I Macdonald MLC, Minister for Agriculture and Fisheries, 'Macdonald announces changes to NSW Agriculture's continuing education and corporate services units', *Media Release*, 3 September 2003

this year, and, as the Minister announced recently, a strong push is being made to expand it into irrigation training in co-operation with Charles Sturt University.<sup>14</sup>

- 2.4** Following the decision, from 2004 the MCA will concentrate on providing adult continuing education courses, short courses and distance learning. There are no residential facilities available for use by students of continuing education courses run at MCA. The impact of this decision will be examined in Chapter 3 of this report.

## Reasons for the decision

- 2.5** The Minister's press release dated 3 September gave the following reason for the decision:

Full-time enrolments at MCA have dropped from 65 in 2000 to 39 this year.

As a result, the estimate net cost by Government to support each full-time student is \$24,800 – double what it was three years ago, and nearly three times the next cost per full-time student at the Tocal campus.<sup>15</sup>

- 2.6** Dr Sheldrake spoke of the reason for the decision during his evidence before the Committee:

Regardless of how it is measured, whether by enrolments or student contact hours, college records demonstrate unequivocally that for an equivalent investment of public resources, the Tocal college has regularly serviced up to three times as many students as the Murrumbidgee college. Thus, since 2000 full-time students at the Murrumbidgee college have cost at least twice as much per head as they cost at Tocal.

That difference was unsustainable and it would have been irresponsible of the department to not take action on what was clearly an inefficient use of public resources.<sup>16</sup>

- 2.7** Dr Sheldrake continued that

The decision to cease residential courses at the Murrumbidgee College of Agriculture [MCA] at Yanco was a properly constituted and carefully considered process.<sup>17</sup>

- 2.8** The decision followed two significant government reviews. The first was undertaken by the Department in 2000 to review the services and costs of agricultural colleges within the Department. The second was a review of vocational education and training in agriculture commissioned by Cabinet and undertaken in 2003. NSW Agriculture, TAFE NSW, the Cabinet Office and NSW Treasury were represented on the Cabinet review. The following sections look at these reviews. The Committee examines the consultation that was undertaken as part of those reviews in closer detail in Chapter 4 of this report.

<sup>17</sup> Dr Sheldrake, Evidence, 5 July 2004, p3

## Extending Education review

**2.9** The report from the 2000 review titled *Extending Education: review of the Agricultural colleges within NSW Agriculture (Extending Education report)* was published in March 2001. The purpose of the review was to address the decline in full-time residential students at both Yanco and Tocal colleges and the need to resource the Colleges appropriately.<sup>18</sup> The terms of reference for that review were to:

1. Identify the opportunities and the means by which NSW Agriculture's agricultural colleges can strengthen the delivery of flexible, relevant and innovative training and educational activities to clients.
2. Review the potential of the physical, human and technological resources required to meet these opportunities.
3. Evaluate opportunities to further enhance the links between the Colleges, Departmental Programs, Centres of Excellence and external bodies.<sup>19</sup>

**2.10** The review made 19 recommendations. These are reproduced as Appendix 5. Most relevant to the MCA and this inquiry was recommendation H which states:

That consideration be given to consolidating full-time residential activity to one College site by 2004 if the decline in full-time student numbers continues into 2003.<sup>20</sup>

### Student numbers

**2.11** The 2000 review identified student enrolment at Yanco and Tocal for the years 1997 to 2001. The Committee has also obtained data on enrolments during 2002 and 2003, and data on student hours for the years 2000 to 2002.<sup>21</sup> These have been compiled in tables 2.1 and 2.2 below.<sup>22</sup> Note that the figures are intended to be illustrative of a trend in student enrolments only. There are inconsistencies in the way these figures are reported each year and also inconsistencies in the way the information is presented by each college. Consequently there may be some slight discrepancies in the tables below.

<sup>18</sup> NSW Agriculture, *Extending Education: Review of the Agricultural Colleges within NSW Agriculture*, March 2001 (*Extending Education report*), p8

<b>2003</b>	39	80	-	*	108	35	-	*

*Note: Figures for short course enrolment were not available for 2003, so it is not possible to calculate total enrolments at either college for that year.*

**Table 2.2** Student enrolments, course hours, Yanco and Tocal, 2000 to 2002

	Yanco				Tocal			
	<i>Full-time</i>	<i>Part-time</i>	<i>Short course</i>	<i>Total</i>	<i>Full-time</i>	<i>Part-time</i>	<i>Short course</i>	<i>Total</i>
<b>2000</b>	69,430	33,310	84,913	187,653	154,200	15,875	14,410	184,485
<b>2001</b>	41,920	32,787	90,832	165,539	108,650	6,784	25,980	141,414
<b>2002</b>	37,112	50,333	83,688	171,133	110,520	11,280	17,250	139,050

*Note: The Committee was unable to obtain information on course hours for the years prior to 2000 or for 2003*

**2.12** As can be seen from Table 2.1 above, MCA experienced a 35 per cent decrease in full-time student enrolments from 1997 to 2002. Over the same period, Tocal experienced an increase of fifteen per cent, although the full-time enrolments in 2003 at Tocal were down by four per cent from a peak of 112 students in 2000.

**2.13** The Chairman of the MCA Advisory Council, Mr Jim Geltch, suggested during his evidence on 21 June that a focus on student numbers was inconsistent with normal practice amongst

the education community and that student contact hours would be a better measure of activity. He continued:

In the year 2000 there were 179,035 student contact hours and in 2002, 135,379. They are audited student contact hours. That includes all students, whether they are from traineeships, residential courses, Aboriginal rural training, or whatever it might be.<sup>23</sup>

**2.14** Dr Sheldrake's response to this assertion was that there was a definite decline, 'however it is measured' (see para 2.7 above).<sup>24</sup>

**2.15** Table 2.1 also illustrates a significant increase in full-time MCA enrolments in 2003 from the low in 2002, an increase of 40 per cent. Mr Daniel Slennett, an ex-student of MCA, informed the Committee that during 2003 students thought enrolments would continue to grow in the future:

After we heard the College was shutting down we thought—our year was probably the biggest year in the past 10 years or something and the next year—this year, if the College was open this year—it probably would have doubled pretty much what our year was last year. We were going to get more.<sup>25</sup>

**2.16** Mr Geltch also questioned the basis upon which the assertions regarding declining student numbers were made. During his evidence on 21 June Mr Geltch suggested that:

When you say "dramatically decreased", again I reiterate that you are looking at full-time residential courses, which is not what we should be looking at. We should be looking at this institution as an educational institution for young people. How that is delivered I think is the real moot point and it is delivered in a number of different ways. If you look at the totality of the number of different ways that that is delivered, there has not been a dramatic decline in numbers.<sup>26</sup>

**2.17** The Committee heard many reasons for the decline in enrolments. Principal among the reasons suggested for the decline was the drought. Mr Gordon Dunlop, NSW State President of the Isolated Children and Parents' Association, discussed the flow-on effects of the drought on enrolments at MCA during his evidence on 21 June 2004:

The impact of the drought has certainly had some impact on MCA. It is not the overall impact. There has been an overall decline in the rural population. ... It certainly has had an effect on the enrolment at MCA. ... The reason for the decline is that families cannot afford to educate their children. When they get to years 11 and 12 and they cannot cope with face-to-face teaching they come to agricultural colleges. They also feel obliged to stay at home and help their families. It is a big expense to board and the drought has had some impact. I am sure that if everything was fine and there had never been a drought there would not be a decline in the numbers.<sup>27</sup>

<sup>23</sup> Mr Jim Geltch, President, MCA Advisory Council, Evidence, 21 June 2004, p28

<sup>24</sup> Dr Sheldrake, Evidence, 5 July 2004, p2

<sup>25</sup> Mr Daniel Slennett, ex-student, Murrumbidgee College of Agriculture, Evidence, 21 June 2004, p2

<sup>26</sup> Mr Jim Geltch, Evidence, 21 June 2004, p 30

<sup>27</sup> Mr Gordon Dunlop, NSW State President, Isolated Children and Parents' Association, Evidence, 21 June 2004, p53

**2.18** Ms Diana Gibbs, Chair of the Regional Communities Consultative Council, also cited the impact of the drought as a reason for declining enrolments at MCA:

we have been going through the worst drought in history, as I am sure you are aware, ... So, there has not been much spare cash to do any courses. I would expect a downturn in any activity because of the drought.<sup>28</sup>

**2.19** Mr Richard Chaffey, a farmer who is also a member of the Tocal Advisory Council, told the Committee that the drought would have a big impact on people's ability to send their children to MCA to undertake full-time courses:

I am concerned about the socioeconomic effect of the drought, particularly at Murrumbidgee. That has had a real impact on the ability of people to pay for their sons and daughters to do the course. That probably has not been highlighted much today. People cannot afford to send their kids away from the farms in the west.<sup>29</sup>

**2.20** The Committee acknowledges that full-time enrolments at both MCA and Tocal have declined over recent years. The reasons for that decline are varied but many can be attributed to the effect of the drought on the Murrumbidgee district and agriculture generally. To address this decline in numbers, the Committee heard that following the review, the Department increased MCA's consolidated revenue budget by 20 per cent and embarked upon a number of strategies such as an intensive advertising campaign.<sup>30</sup>

**2.21** The Committee notes that, in response to a question on notice, the Department provided the Committee with details of funding to MCA for the years 1999 to 2003. These figures are provided in table 2.3 below:

**Table 2.3** Murrumbidgee College ConFund Expenditure Financial years ending 1999 to 2003

Year	ConFund Expenditure
1999	\$2,016,905
2000	\$1,792,132
2001	\$1,757,304
2002	\$1,910,546
2003	\$2,020,272

*Source: Correspondence from the Hon Ian Macdonald MLC, Minister for Primary Industries and Natural Resources, 4 August 2004, providing answers to questions taken on notice 5 July 2004, answer to question no. 5.*

**2.22** The Committee notes that despite claims of an increase in funding to MCA, in 2003 funding was still only at 1999 levels.

<sup>28</sup> Ms Diana Gibbs, Chair, Regional Communities Consultative Council, Evidence, 5 July 2004, p18

<sup>29</sup> Mr Richard Chaffey, Evidence, 5 July 2004, p42

<sup>30</sup> Dr Sheldrake, Evidence, 5 July 2004, p2

**2.23** With respect to advertising the College, Dr Sheldrake told the Committee that:

The College council tried, in conjunction with the department, to look at ways of increasing the number of students at Murrumbidgee College of Agriculture. Ms Howard might give you the details, but we put in place a fairly significant advertising program on television. If you lived in the central west and watched the cricket over the summer and the Olympics there was a pretty strong and solid advertising campaign promoting Murrumbidgee college during the summer period.<sup>31</sup>

**2.24** The Committee accepts that the Department, the College and the Advisory Council did take steps to redress the decline in student numbers. However, these steps clearly did not prove effective.

**2.25** On notice, the Committee asked the Department whether the review identified the number of students required to make the full-time residential courses at MCA economically viable. In response, the Department indicated that it did not. The Committee notes the increase in student numbers in 2003 and considers that insufficient time was allowed for enrolments, which increased in 2003 by forty per cent, to increase to a level that would make the College sustainable.

#### *Cost per student*

**2.26** The *Extending Education* Report found that both MCA and Tocal were heavily subsidised at a cost of approximately \$9,000 per student at Tocal and \$15,000 per student at MCA.<sup>32</sup> The average cost per student for the calendar year 2000 is represented in the table below:

**Table 2.4** Average cost per student, MCA and Tocal colleges, 2000

	Full-time	Part time	External*	Short Course
MCA	\$14,785.29	\$4,212.26	\$597.93	\$159.29
Tocal	\$9,197.25	\$3,232.31	\$733.11	\$552.69

\* 'External' at MCA means fully funded students; at Tocal it means home study students

*Source: Extending Education, Appendix 3, p36.*

**2.27** The Committee heard substantial evidence regarding the method for calculating the cost per student, with some witnesses asserting that different methodologies were used for calculating the cost at Tocal and MCA. Mr Geltsch questioned the numbers during his evidence on 21 June:

I ask on what basis you have used those numbers? I think that is important because, again, I think it comes back to a question of whether you are just dividing the number of residential students by the recurrent funding or consolidated revenue number. I think that is far too simplistic. I think that what you need to do is look at the student contact hours in totality, look at the cost of supplying those student contact hours and

<sup>31</sup> Dr Sheldrake, Evidence, 5 July 2004, p10

<sup>32</sup> *Extending Education* p12

come up with a number there. I think that is what you need to do to compare apples with apples.<sup>33</sup>

**2.28** Likewise, Mr Dunlop questioned the basis for the Department's costing:

The \$24,500 was a costing for only 39 full-time students. They did not take into account the 2,400 part-time hours that should have been added to the costing of the 39 full-time students. Tocal's costings included both full-time and part-time students. When you put the two figures for MCA together with Tocal's figures you come up with a costing of about \$12,000, which is well under the TAFE recommendation. It works out at about \$19.80 and \$12.80 an hour and TAFE ranges from \$12 to \$18 an hour face-to-face.<sup>34</sup>

**2.29** Mr Geltch tabled documents during his evidence contradicting the methodology applied by the Department when calculating the costs associated with MCA and Tocal. The document stated:

It is not appropriate to include home study courses or sales of home study materials in the calculation of AHC (Annual Hours Curriculum) ... Tocal's delivery statistics include sales of home study books and home study courses of 492,430 hours in 2001 and 411,420 hours in 2002. These hours are not recognised as Annual Hours Curriculum (AHC) by any educational authority.<sup>35</sup>

**2.30** In response to these assertions, the Committee asked Dr Sheldrake to clarify the methodology used by the Department for calculating cost per student at MCA and Tocal. In response to this question, which was taken on notice by Dr Sheldrake, the Committee was provided with the following methodology:

**METHODOLOGY USED TO CALCULATE COST PER STUDENT AT  
Tocal AGRICULTURAL CENTRE & MURRUMBIDGEE COLLEGE OF  
AGRICULTURE**

The average student costs at each college for the years 2000 to 2003 inclusive were prepared using the methodology developed and applied for the Review of the Agricultural Colleges within NSW Agriculture published March 2001.

The College review methodology was developed by the Registrars of both colleges in consultation with staff of the Management Accounting Unit (MAU) of the Finance & Administration Program to ensure a consistent and appropriate treatment of expenses.

The steps involved in the preparation of the costings include:

- All salaries expenditure and associated salary on costs were gathered (this included Consolidated Fund Salaries and Industry/Other funds). The staff included was as per the list in Appendix 5 of the "Review of the Agricultural Colleges within NSW Agriculture".

---

<sup>33</sup> Mr Geltch, Evidence, 21 June 2004, p28

<sup>34</sup> Mr Dunlop, Evidence, 21 June 2004, p52

<sup>35</sup> Tabled Document No 1C, Mr J Geltch, *Costings*

- All staff were listed on a spreadsheet. The time each spent on various functions was allocated in hours per week. Categories included Administration, Domestic, Education comprising (Full-time, Part-time, Short Course, External), Farm, Other. The hours each officer spent on various functions was (*sic*) arrived at by consultation with Section Leaders who in turn discussed the times with their staff to arrive at a fair figure. When totalled the hours for each category was (*sic*) converted to a percentage of the total hours. This percentage was used to arrive at the salary cast (*sic*) by function.
- All operating costs were added together and any expenditure that was not considered part of the education or college operation was removed. At Tocal, we removed such things as Tocal Homestead Maintenance expenditure, payments to the CB Alexander Foundation and Advisory Office expenses. Since Consolidated and Industry fund expenditure is largely split by section or Function anyway these figures were reasonable (*sic*) easy to gather ie Award Courses, Administration, Continuing Education etc). Section managers were asked to nominate the % of expenditure spent on each function. Where there were some mixed functions such as Farm and Assets expenditure (*sic*) was split in much the same way. From the information I have the costs included expenditure against Assets Cost Centres 1527, 1528, and 919 in order to ensure all expenditure was included.
- An allocation of \$100,000 Growth Fund Capital Equipment was treated as Full-time student expenditure.
- Income was gathered and split in much the same fashion as the last two points above. Income from Short Courses, Commonwealth Growth funds, By-Product Income Account, Student Fees and other external projects was split according to Full-time, Part-time etc.
- Management Accounting provided the depreciation figure, which together with the above process produced the figures contained in the “Review of the Agricultural Colleges within NSW Agriculture”.
- MAU also reviewed these figures to ensure that a similar process was followed.

**NB:** The net cost referenced in Appendix 3 of the College Review for Tocal and Yanco (ie. \$1,085,276 and \$961,044 (for Tocal & Yanco, respectively) was used to calculate the cost per student at both colleges over the years 2001 – 2003, inclusive, viz. the net cost for 2000 was divided by the number of students each year to arrive at the cost per student.<sup>36</sup>

### *Other financial indicators*

**2.31** Other key business and financial performance indicators identified in the Report include:

- External funding – MCA was very successful at obtaining external funds – \$4.3million over three years 1997 to 2000, compared to \$0.3million over the same period at Tocal

<sup>36</sup> Department of Primary Industries, Responses to Questions on Notice, Attachment 1, 279-03, pp1-2

- Publication sales – MCA achieved sales of \$9,000 over period 1997 to 2000; Total \$488,000 over the same period
- Courses offered – MCA offered 118 accredited courses over the period 1998 to 2000. Total offered 28 over the same period
- Occupancy rates – 50 per cent for student accommodation, averaged over three years (1998 to 2000), based on a 365-day year for both colleges. MCA short course occupancy rate was 12 per cent and Total's was 28 per cent
- Asset value 2000 – MCA \$22,564,681; Total \$16,162,983
- Overall net cost of the Colleges for 2000 was \$3,042,198 at MCA and \$2,585,168 at Total, calculated by adding expenses and depreciation and subtracting revenue.

### ***Report conclusion***

- 2.32** The Report concluded that the review 'has provided the framework to grow NSW Agriculture VET services'. The report continued that:

This framework needs to be supported by consolidating full-time residential activity and properly resourcing our capability to meet the growing demand for continuing education.<sup>37</sup>

- 2.33** Dr Sheldrake reiterated the report's conclusions during his evidence:

The report recommended that consideration be given to the consolidation of services if full-time student numbers continued to decline. Unfortunately, they did. Efforts to reverse that trend, including intensive promotion campaigns and statewide school visits, were to no avail. Despite that, four additional full-time staff were appointed to the College and teaching vacancies were kept filled with competent staff, even when student numbers were very low.<sup>38</sup>

### **2003 review**

- 2.34** A further, smaller scale review was conducted in 2003. This review, which was commissioned by Cabinet, considered the activity and roles of the providers with particular focus on areas of inefficiency or duplication. Dr Sheldrake told the Committee that NSW Agriculture, TAFE NSW, the Cabinet Office and NSW Treasury were represented on the review, and that it added further justification for the closure of residential facilities:

The review canvassed the option of transferring NSW Agriculture's vocational education training activities to the Department of Education and Training, TAFE. It was noted that there was duplication between the traineeships offered by the Murrumbidgee college and the Riverina Institute of TAFE, and it was decided that the College should withdraw from that activity. TAFE delivery is non-residential and the

---

<sup>37</sup> *Extending Education*, p30

<sup>38</sup> Dr Sheldrake, Evidence, 5 July 2004, p2

Department of Education and Training did not want to acquire NSW Agriculture's physical facilities at MCA.<sup>39</sup>

### Conclusion

- 2.35** The Committee acknowledges that there has been a decline in full-time enrolments at MCA and Tocal, much of which can be explained by the long lasting drought that New South Wales is experiencing. The Committee does note, however, that in 2003 there was a 40 per cent increase in full-time enrolments at MCA from 2002, as a consequence of a community awareness campaign.
- 2.36** The 2001 *Extending Education* report allowed only two years for MCA to increase enrolments. Two years is not long enough to assess whether a trend has been reversed. The Committee considers it regrettable that MCA was not allowed sufficient time to consolidate the increase in student numbers enjoyed by the College in 2003. Had the MCA been allowed more time it is possible that the numbers would have continued to increase to a level that would make the full-time residential courses at the College financially viable.

### How was the decision communicated?

- 2.37** On 3 September 2003 the Minister released two press releases announcing changes to the Department's provision of agricultural education in NSW.<sup>40</sup>
- 2.38** There was some inconsistency in the evidence presented to the Committee about how information about the decision was disseminated. Mr Slennett told the Committee about how he heard of the decision:

I was out at Darlington Point at Cooper Station doing work experience at the time with a co-student, Bradley Arnold. I was working out there, we were talking and we just decided to call the college to see what was happening down here. We got the news saying that the college was shutting down and it was probably an hour something later from Darlington Point.<sup>41</sup>

- 2.39** Mrs Rodham, the mother of an ex-student at MCA told the Committee she heard about the decision 'through the media'.<sup>42</sup> Mrs Rodham continued that her son was on work experience at the time the decision was announced and that he was informed about the decision in the following way:

My son was on the work experience at the time at the Trangie research centre. There were three of them up there at the time and they had gone up with one of the office staff. I think she had taken them up and her husband worked here. That is the only

<sup>39</sup> Dr Sheldrake, Evidence, 5 July 2004, p2

<sup>40</sup> Hon I Macdonald MLC, *Media Release*, 3 September 2003

<sup>41</sup> Mr Slennett, Evidence, 21 June 2004, p4.

<sup>42</sup> Mrs Jeanette Rodham, Evidence, 21 June 2004, p17

way the children found out. Her husband rang her and told her, and the kids got told that we have to go back. There has been nothing whatsoever.<sup>43</sup>

**2.40** This contradicts evidence later received by the Committee from Dr Sheldrake and representatives of the Department. On 5 July 2004 Dr Sheldrake informed the Committee that:

The students were advised and the parents were also advised in a letter from me. Ms Howard visited the College and met with the students and spoke to them.<sup>44</sup>

**2.41** Ms Howard, Program Manager, Education and Training, Department of Primary Industries, continued:

That was 3 September at about 1.30 in the afternoon. It was the same day as the announcement. I was advised on the day that all students were at the meeting when I spoke to them but I understand since then that two or three students were at Trangie doing prac work.<sup>45</sup>

**2.42** Ms Scott-Orr, Executive Director Research and Advisory, Department of Primary Industries, told the Committee that she told Mr Geltch the same morning that the Minister announced the decision and that the staff and students were being advised, and that the Department's intention in Ms Howard going to the College, was to 'advise everybody simultaneously'. Dr Sheldrake admitted that 'it is unfortunate that, as it turned out, a small number of students were not at the College' and thus heard about the decision on the radio.<sup>46</sup>

### **Conclusion**

**2.43** It is regrettable that all students, staff and parents of MCA did not learn of the decision first-hand. Witnesses who participated in the Committee's inquiry expressed shock at hearing about the decision. The Committee considers that close and ongoing consultation with and involvement of students, staff and parents prior to the closure announcement would have been a more appropriate Departmental decision-making process. This consultation process is discussed in the next chapter.

<sup>46</sup> Dr Sheldrake, Evidence, 5 July 2004, p9

## Chapter 3 Consultation

This chapter addresses Term of reference 1(b) for this inquiry which required the Committee to inquire into and report on:

the community and industry consultation that preceded the announcement of the proposal

This chapter identifies the consultation undertaken by the then Department of Agriculture (the Department) with the following groups or individuals:

- Murrumbidgee College of Agriculture (MCA) Advisory Council (the Advisory Council)
- Students and parents of students and staff of the MCA
- Members of the Leeton and Yanco local communities
- State Government advisory bodies and other industry groups

### The Department's view

**3.1** Dr Richard Sheldrake, Deputy Director-General Agriculture and Fisheries, Department of Primary Industries, informed the Committee that the decision to close full-time residential courses at MCA was 'a properly constituted and carefully considered process.'<sup>47</sup> Dr Sheldrake outlined the consultation that was undertaken as part of the decision-making process during his evidence on 5 July 2004:

Consultation was undertaken in 2000 with college management, staff, full-time residential students, departmental managers, college advisory councils and TAFE NSW. The review conducted staff meetings and interviews, structured group meetings and received written submissions. The final report was written in 2000 and given to staff.<sup>48</sup>

**3.2** The Committee questioned Dr Sheldrake and other Departmental witnesses further about their consultation with students prior to the decision being announced, in response to which the Department indicated that there had been no further consultation after the 2000 report was released.<sup>49</sup>

---

<sup>47</sup> Dr Richard Sheldrake, Deputy Director-General Agriculture and Fisheries, Department of Primary Industries, Evidence, 5 July 2004, p2

<sup>48</sup> Dr Sheldrake, Evidence, 5 July 2004, p2

<sup>49</sup> Ms Ellen Howard, Program Manager, Education and Training, Department of Primary Industries, Evidence, 5 July 2004, p9

## Consultation with students, parents and staff of the MCA

3.3 When asked whether students had been consulted prior to the decision to close full-time residential courses at MCA, Ms Butler, who was a first year student in 2003 answered ‘there was just nothing’ and ‘it was a big shock’.<sup>50</sup> Mr Slennett, who also attended the College in 2003 reiterated that the decision ‘just came out of the blue’.<sup>51</sup>

3.4 Ms Butler’s mother discussed the lack of consultation in her submission to the inquiry:

I do not believe the Government completely thought this decision through and weighed up the impact the closure would have on the surrounding communities. What I would like to know [is] how the Government can make a major decision, to cease full-time residential courses, in a matter of hours. All without discussing with the people who would be mostly impacted by their decision.<sup>52</sup>

3.5 Another mother of an ex-student at MCA, Mrs Jeanette Rodham also lamented the lack of consultation with parents prior to the decision:

The only way we were informed otherwise was when we wrote letters of complaint, I suppose it was, to the Government. We got letters back to say that it had been closed, and that was it. Other than that there had been no contact with any of the parents whatsoever. We had no idea what was going on at all.<sup>53</sup>

## The MCA Advisory Council

3.6 The extent to which the Advisory Council was consulted was the subject of some debate during the Inquiry’s public hearings. Advisory Council minutes indicate that the *Extending Education* report was discussed at several meetings, and Mr Geltch, Chairman of the Advisory Council, told the Committee that he had spoken to Ms Helen Scott-Orr from the Department on a number of occasions. Referring to these, Mr Geltch told the Committee that ‘the Minister could state that we were involved in the consultation process and that would be a fair comment. However, it was a devious way to achieve that outcome.’<sup>54</sup>

3.7 Mr Geltch further contended that the Advisory Council was not provided with a full copy of the 2001 *Extending Education* report and was not made aware of the recommendation that consideration be given to consolidating full-time courses into one institution (Recommendation H), that Ms Howard from the Department ‘did not present us with the report at the meeting in June’ and in fact ‘cherry-picked some of the recommendations from the report.’<sup>55</sup>

---

<sup>50</sup> Ms Claire Butler, Evidence, 21 June 2004, p5

<sup>51</sup> Mr Daniel Slennet, Evidence, 21 June 2004, p5

<sup>52</sup> Submission No 9, Mrs Louise Butler, p2

<sup>53</sup> Mrs Jeanette Rodham, Evidence, 21 June 2004, p18

<sup>54</sup> Mr Jim Geltch, Chairman, MCA Advisory Council, Evidence, 21 June 2004, p25

<sup>55</sup> Mr Geltch, Evidence, 21 June 2004, p25

- 3.8** In response to these contentions, Dr Sheldrake outlined the meetings at which the review and its report were discussed with the Advisory Council. He told the Committee:

It was certainly discussed at the December meeting of the advisory council in 2000 and then again at the June and December meetings of 2001. The minutes of the Wednesday 13 June 2001 meeting of the advisory council, which was held at 9.30 a.m. at the Amaroo conference centre, say, "The council was very concerned about the summary of recommendations point re full-time students to be at one facility". That refers to recommendation H in the review.<sup>56</sup>

- 3.9** In response to the specific suggestion that the Advisory Council did not receive a copy of the 2001 *Extending Education* Report, Dr Sheldrake told the Committee that he 'cannot say whether they received a copy of the report' but that 'the principal of the College, who was a member of the advisory council, received a copy of the report' and that 'the minutes certainly indicate that they discussed that issue.'<sup>57</sup>
- 3.10** On the basis of the evidence it has heard, the Committee does not believe the Department consulted fully with the Advisory Council, students or parents. Some attempts at consultation were made but with inadequate provision of information in relation to the Advisory Council.
- 3.11** Government members of the Committee believe that there is conflicting evidence as to the nature or level of consultation that occurred between the Department and the Advisory Council.

### **Consultation with members of the Leeton and Yanco local communities**

- 3.12** In reply to questions from the Committee the representatives of Leeton Shire Council and Griffith City Council informed the Committee that neither had been consulted prior to the decision being made.<sup>58</sup> Mr Andrew Crakanthorp, Assistant General Manager of Griffith City Council, informed the Committee that:

... the Griffith City Council is not aware of any consultation, as you alluded to earlier, that occurred prior to the announcement regarding this facility and certainly in regard to socioeconomic impact studies. Unfortunately, as one who has lived in the western Riverina region for some time now, it would appear that, across the State, there has been little regard paid by the State Government to these proposals for consultation and socioeconomic impact studies. All too often we see that the decisions are made and previous commitments to such processes are simply overlooked, and it is very disappointing.<sup>59</sup>

- 3.13** In its submission to the inquiry, Leeton Shire Council also notes the lack of consultation:

Simply put, there was no community or industry consultation. The first that the Mayor and General Manager of Leeton Shire Council knew of the matter was when we were

<sup>56</sup> Dr Sheldrake, Evidence, 5 July 2004, pp7-8

<sup>57</sup> Dr Sheldrake, Evidence, 5 July 2004, pp7-8

<sup>58</sup> Mr Dino Zappacosta, Acting Mayor, Griffith City Council, Evidence, 21 June 2004, p12

<sup>59</sup> Mr Andrew Crakanthorp, General Manager, Griffith City Council, Evidence, 21 June 2004, p13

contacted early on 3 September 2003, and asked to attend a meeting at MCA where the announcement was made later that day.<sup>60</sup>

- 3.14** The Member for Murrumbidgee, Mr Adrian Piccoli MP, also told the Committee he was unaware of any consultation with the local community prior to the decision to close residential facilities at MCA:

The second point is that there was no real consultation prior to this decision being made. Even when I was told I refused to believe it and said I did not think any government would close a college. I was wrong.<sup>61</sup>

## **Consultation with State Government advisory bodies and other industry organisations**

### **Riverina Regional Development Board**

- 3.15** The Committee asked representatives of two key state government advisory bodies who appeared before it whether they had been consulted prior to the decision's being announced in September 2003. In response, the Chairs of the Riverina Regional Development Board and the Regional Communities Consultative Council informed the Committee that they had not been consulted at any stage prior to the decision being made or announced.
- 3.16** Mr Pat Brassil, Deputy Chair of the Riverina Regional Development Board, told the Committee that, had he been consulted, he would have given the Government the following advice:

On present knowledge I would have advised that the College be not closed to residential courses and be left open only for long courses. I would have expected to be consulted because I believe the State Government has brought us into existence as a regional development board for particular things to do with the economic development of the region. I believe no department, or no Minister for that matter, should interfere with the employment of people in the region without first consulting us and other interested people in the region. The fact that we were not consulted has left the decision makers in this matter lacking a point of view that we could have put forward.<sup>62</sup>

### **Rural Communities Consultative Council**

- 3.17** Ms Diana Gibbs, Chair of the Regional Communities Consultative Council, established by the Premier to report to him and the Minister for Rural Affairs with advice on the impact of policy and programs on regional New South Wales also remarked on the lack of effective consultation with her organisation. Ms Gibbs told the committee:

---

<sup>60</sup> Submission No 8, Leeton Shire Council, p8

<sup>61</sup> Mr Adrian Piccoli MP, Member for Murrumbidgee, Evidence, 21 June 2004, p46

<sup>62</sup> Mr Pat Brassil AM, Deputy Chair, Riverina Regional Development Board, Evidence, 21 June 2004, pp40-41

From my own personal perspective, and all I can speak of from firsthand knowledge was that the Regional Communities Consultative Council was not involved at all. We were never asked for any view during the review process or afterwards.

[W]e were very concerned about the apparent lack of any effective consultation. I use the word "effective" because quite often people say, "We did consult," but effective consultation means a true dialogue of taking on board the opinions of local people who might have a different perspective and those who do not live in the region.<sup>63</sup>

- 3.18** From the evidence received by the Committee it is clear that the Department undertook no consultation following the *Extending Education* Report in 2001. Other organisations that noted the lack of consultation by the Government include the NSW Farmers Association,<sup>64</sup> Bland Shire Council,<sup>65</sup> Condobolin Progress Association<sup>66</sup> and the CB Alexander Agricultural College Advisory Council<sup>67</sup>.

## Rural Communities Impact Statement

- 3.19** The Premier's Ministerial Memorandum No 96-17 instructs that 'any major changes proposed by government agencies in rural New South Wales will, in future, be subject to a Rural Communities Impact Statement.'<sup>68</sup>
- 3.20** The purpose of such a statement is 'to ensure that the potential economic and social impact of any changes are considered, so that the Government is aware of the full extent of the impact on services, staff numbers or facilities in regional areas.' The Memorandum stressed that 'Ministers must ensure that the economic and social effects of particular proposals are considered in their development and not in the final stage. It will also be important to consider the implications of a proposal in the context of other Government decisions or developments affecting a particular region.'<sup>69</sup> Guidelines for preparing rural communities impact statements were subsequently released by the Office for Rural Communities within NSW Agriculture in March 1997.<sup>70</sup>
- 3.21** Dr Sheldrake informed the Committee that a rural communities impact statement was completed 'prior to the Government finalising its position'. Dr Sheldrake continued:

The assessment found that the overall income and employment effects on rural New South Wales were likely to be neutral. It is pertinent to note that while the NSW Department of Primary Industries currently has two agricultural colleges, at one stage

<sup>63</sup> Ms Diana Gibbs, Chair, Regional Communities Consultative Council, Evidence, 5 July 2004, p17

<sup>64</sup> Submission No 24

<sup>65</sup> Submission No 38

<sup>66</sup> Submission No 37

<sup>67</sup> Submission No 22

<sup>68</sup> Premier's Memorandum No 96-17, *Rural Communities Impact Statements*, October 1996.

<sup>69</sup> Premier's Memorandum No 96-17, *Rural Communities Impact Statements*, October 1996.

<sup>70</sup> The Office of Rural Communities is now the Office of Rural Affairs, located within the Department of Lands.

there were five in New South Wales; with other colleges being at Orange, Hawkesbury and Wagga Wagga. They were all managed by the department at that time. The focus of agricultural training has shifted over time, consistent with international trends. Where the main demand used to be for traditional full-time courses, it has now largely shifted to either professional university training or more vocationally oriented short courses that provide practical forms of continuing education.<sup>71</sup>

**3.22** There is no evidence that the Department undertook meaningful consultation as part of its assessment of the impact of the decision when preparing the Rural Communities Impact Statement. This is despite the *Guidelines for Preparation of Rural Communities Impact Statements* endorsed by the Premier in Memorandum 97-5 in March 1997.

**3.23** The *Guidelines for Preparation of Rural Communities Impact Statements* state in section 2 under the heading 'consultation' that:

consultation is an integral part of the rural community impact assessment process and in ensuring effective implementation of change.<sup>72</sup>

**3.24** The Guidelines continue:

Depending on the nature of the proposal being assessed, this might include consultation with industry, community groups, local government, other NSW government agencies, and Commonwealth or interstate agencies.

Consultation allows the affected community to contribute to the identification and quantification of impacts. It also allows the community to comment on agency estimations and to contribute from an early stage in the implementation process.<sup>73</sup>

**3.25** The Committee heard evidence from Ms Diana Gibbs, Chair of the Regional Communities Consultative Council (RCCC), that the RCCC has the task of assessing rural communities impact statements. Ms Gibbs expressed concern about the role of rural communities impact statements in government decision-making:

We are concerned that if rural impact statements are not used effectively in Government decision making then why should we bother to do all this if the results are ignored? Our staff put a lot of time into making very careful assessments, and we are concerned that they are not taken on board. At best rural impact statements could be considered a rubber stamp.<sup>74</sup>

---

<sup>71</sup> Dr Sheldrake, Evidence, 5 July 2004, p2. The impact of the decision on the local communities and rural New South Wales more generally are examined in Chapter 3 of the Committee's report.

<sup>72</sup> Office of Rural Communities, NSW Agriculture, *Guidelines for Preparation of Rural Communities Impact Statements*, March 1997, [http://www.premiers.nsw.gov.au/our\\_library/rural/rural%20comm%20impact%20stat.htm](http://www.premiers.nsw.gov.au/our_library/rural/rural%20comm%20impact%20stat.htm), p11 of 18, downloaded 2 September 2004

<sup>73</sup> NSW Agriculture Office of Rural Communities, *Guidelines for the Preparation of Rural Communities Impact Statements*, March 1997, p11

<sup>74</sup> Ms Diana Gibbs, Chair, Regional Communities Consultative Committee, Evidence, 5 July 2004, p16.

- 3.26** Referring to the role of the RCCC, Ms Gibbs informed the Committee that the RCCC was not involved in the preparation or assessment of the regional communities impact statement ‘at all’:

I never saw one, as chair of the council. Our secretariat never mentioned that one had come in front of it. So, I cannot really comment on exactly what happened other than to say I was never aware of one being prepared.<sup>75</sup>

- 3.27** The Committee is very concerned about the apparent lack of rigour in the preparation of the rural communities impact statement. It is unclear whether the Office of Rural Affairs has a formal role in assessing rural communities impact statements prior to their inclusion in a Cabinet proposal. The Committee is of the view that the decision-making process would benefit if this assessment was formalised and recommends that the Government require all rural communities impact statements be assessed by the Office of Rural Affairs before being included in a Cabinet proposal.

---

### **Recommendation 1**

That all rural communities impact statements be assessed by the Regional Communities Consultative Council before being included in any Cabinet proposal.

---

## **Conclusion**

- 3.28** The Committee is extremely concerned that a decision of this magnitude was made by the Department without adequate consultation with those directly and indirectly affected. The decision appears to have been made with very little and, in some cases, no consultation with parents, students and staff, minimal involvement of the Advisory Council and in direct contravention of Government guidelines regarding the preparation of Rural Communities Impact Statements.

---

<sup>75</sup> Ms Gibbs, Evidence, 5 July 2004, p17.

## Chapter 4 Impact of the decision

This chapter addresses Term of reference 1(c) for this inquiry, which required the Committee to inquire into and report on:

the impact on the Leeton and Yanco communities and district

This chapter also examines the impact of the decision to close residential training facilities at Murrumbidgee College of Agriculture (MCA) on students who were enrolled at the College in 2003 and the wider impact of the decision on agricultural education generally.

### Impact on Leeton and Yanco communities

4.1 The Department's consultation was discussed in Chapter 3 of this report, including the lack of involvement of the Regional Communities Consultative Council in the rural impact statement. The impact on the Leeton community was assessed in the Rural Communities Impact Statement prepared by the Department as part of the decision-making process. The overall findings of that assessment make a sharp contrast to the evidence received from members of the local community and others during the Committee's public consultation. This assessment appears to have been made without consulting the people on whom the impact would fall.

#### Rural Communities Impact Statement

4.2 The Committee received a copy of the Rural Communities Impact Statement (RCIS) in response to a question taken on notice by the Department. In evidence, Dr Richard Sheldrake, Deputy Director-General of Agriculture and Fisheries, Department of Primary Industries stated that RCIS prepared by the Department as part of the decision-making process concluded that 'the overall income and employment effects on rural New South Wales were likely to be neutral.'<sup>76</sup>

4.3 The assessment focussed on two areas – service delivery in education and income and flow on effects. In relation to educational service delivery the review found that:

Enrolments at Yanco are small and declining in number and services will continue to be provided from Tocal. Regional disadvantage is therefore minimal with the potential for widespread gains from any future improvements in education program/services delivered from Tocal.<sup>77</sup>

---

<sup>76</sup> Dr Richard Sheldrake, Deputy Director-General of Agriculture and Fisheries, Department of Primary Industries, Evidence, 5 July 2004, p2

<sup>77</sup> NSW Agriculture, *Proposed consolidation of corporate services and education functions by NSW Agriculture: rural communities impact statement*, p3

4.4 The RCIS found that 44 salaries would be lost from MCA. Of these, it was estimated that 50 per cent would accept a voluntary redundancy, resulting in ‘around 22 people’ leaving the Yanco/Leeton area.<sup>78</sup> In relation to income and employment, the assessment concluded that:

Because of the smaller community size, the impact of lost regional salaries will be greatest in the Leeton area. This will however be limited/offset by:

- The small number of jobs in comparison to the total numbers employed in Leeton and the expanding Leeton/Griffith economy
- Positive income effects associated with VR [voluntary redundancy] payments
- Favourable prospects for regional employment growth and re-employment
- Positive employment effects in ... Total.<sup>79</sup>

4.5 There was some concern about the timing of the Department’s RCIS. Mr Ray Pluis, Mayor of Leeton Shire Council, told the Committee that in fact the assessment ‘was not carried out beforehand, but was completed a couple of weeks after the announcement.’<sup>80</sup> Mr Pluis also questioned the methodology of the assessment. He told the Committee:

At best it was a very superficial investigation of the impact of the closure on Yanco and Leeton communities and included figures regarding population and economy of cities including Griffith. Griffith is located approximately 60 kilometres from Yanco and while that area would be impacted on, as would any other extended regional area by the closure of the full -time and part-time courses, we were really looking for the impact on Yanco and Leeton, which was not addressed in any substantial way by the study.

The study itself was carried out without any public consultation. I believe it was just a desk-top exercise to comply with the requirements of the Premier's directions. I understand further that the guidelines for the issue of the regional communities impact statements were developed by the Department of Agriculture, so it is hard to see how it overlooked the need to carry out one. Ongoing discussions took place with various Ministers and the directors-general of the Department of Agriculture and the Department of Education and Training. From that we got to the stage where we accepted that the full-time and part-time courses had been discontinued and we were looking to see where we could go from there.<sup>81</sup>

4.6 In response to these allegations, Dr Sheldrake advised the Committee that in fact there were two RCISs prepared by the Department – one that went to Cabinet and another, more detailed one, that was made publicly available:

Every decision that goes to Cabinet requires a community impact statement, so that was part of the committee Cabinet submission. Because of the likely impact of this we undertook to do a more detailed community impact statement for the clients, or the

<sup>78</sup> *Proposed consolidation of corporate services and education functions by NSW Agriculture*, p2

<sup>79</sup> *Proposed consolidation of corporate services and education functions by NSW Agriculture*, p3

<sup>80</sup> Mr Raymond Pluis, Mayor, Leeton Shire Council, Evidence, 5 July 2004, p23

<sup>81</sup> Mr Pluis, Evidence, 5 July 2004, pp23-24

people affected, and that was distributed about a week or so after that. That was in preparation, but it was not concluded before that.<sup>82</sup>

### **Evidence received from the local community**

**4.7** The evidence received from members of the local community did not agree with the Department's conclusion that the effects on Leeton/Yanco would be 'neutral'. Mr Plus informed the Committee that, two months prior to the decision being announced, Greens General foods closed down their cereal operations in Leeton, 'and lost 40 or 50 jobs'. That closure, combined with the impact of the decision to close residential facilities at MCA, 'would see us [Leeton] losing about 80 jobs over a two or three month period.'<sup>83</sup>

**4.8** Mr Plus provided the Committee with a detailed analysis of the financial impact of the decision on the Leeton community, estimating the overall impact of the decision to be nearing \$7.5 million:

... whenever we work with the Department of Regional Development to bring in some more jobs into the area they always talk about a multiplier impact of 3, 3.5 or somewhere of that nature as generating additional jobs every time you bring a new job in. So if you look at the 40-odd jobs, you are talking about in the vicinity of \$2 million in direct wages out of the area; you could be looking at another, without exaggerating, probably couple of hundred thousand dollars worth of materials purchased in the region because they did not necessarily directly purchase their supplies or equipment in the region, but there would be at least a few hundred thousand dollars there. So you might be getting up around \$2.5 million in wages and materials, multiply that by three and you are up around \$7.5 million out of our local economy, out of a population of 12,000 people.

**4.9** In addition to the direct financial impact on the community, Mr Plus pointed to the social impact of the decision when ex-employees of MCA leave the community:

The people who were employed at the College were across a broad range, from caterers and cleaners up to much more highly paid positions. A lot of those people were engaged outside of work hours in things like the scouting movement, pony club, sporting coaches and trainers and so on. So you lose those people, you also lose a lot of those other voluntary-type works that those people put into their community.<sup>84</sup>

### **Conclusion**

**4.10** The *Guidelines for the Preparation of Rural Communities Impact Statements*, released by the Office of Rural Communities, NSW Agriculture, in March 1997, provides detailed guidelines for the characteristics of the RCIS. Economic characteristics, social characteristics, environmental,

---

<sup>82</sup> Dr Sheldrake, Evidence, 5 July 2004, p12

<sup>83</sup> Mr Plus, Evidence, 5 July 2004, p26

<sup>84</sup> Mr Plus, Evidence, 5 July 2004, p27

regulatory and economic impacts are identified as being relevant to Government decision-making.<sup>85</sup>

- 4.11** The overall conclusion of the RCIS prepared by the Department, that the effect of the decision would be 'neutral' is clearly contradicted by evidence received from members of the local community. The Committee's view is that the Department did not prepare a sufficiently thorough RCIS upon which to base its conclusion. For example, the closure of the Greens General Food operations two months prior to the decision was not taken into consideration by the Department in its RCIS.

### **Impact on rural communities generally**

- 4.12** In her submission, Miss Diana Gibbs, Chair of the Regional Communities Consultative Council, wrote:

Education is vital to sustainability of rural life and rural youth deserve a variety of regionally specific education options.<sup>86</sup>

- 4.13** Ms Gibbs gave evidence the Committee about a 'self-fulfilling prophecy' and 'planning for decline' in rural communities:

It is not just agriculture, it is rural communities generally. We are very concerned about that cumulative effect. It comes back to this planning for decline. If the Department of Infrastructure, Planning and Natural Resources, in its wisdom, decides that population is going to drop then it starts planning for fewer teachers, take away some policemen, not provide resources for a medical centre and all sorts of little things. It is the death of 1,000 cuts. Rural communities need, and I believe have a right, to access an equivalent level of service to anybody else in the State. Rural communities should not be considered to be second-class citizens. Yes, it is difficult. Yes, we do live a long way out. Yes, we are scattered. But I cannot believe that in the twenty-first century we cannot find a better way to deliver services. It is not good enough to simply take them away and say "Rural communities are in decline, so we will not plan to provide services to them." We are 20 per cent of the population of the State, that is, one in five people live in regional communities. We have a right to expect the same sort of future and the same ability to determine our own futures as anybody else.<sup>87</sup>

- 4.14** Ms Gibbs stressed the importance of viable rural communities to 'look after our land and water', and suggests that regional communities are not provided with the means to grow and adapt to change:

[T]he council sees the current events with the Murrumbidgee college as just another impediment placed upon regional communities to develop their own ability to grapple with change, their ability to attain economic viability and wellbeing, using their own resources and with local ownership. The only successful development is development

---

<sup>85</sup> NSW Agriculture Office of Rural Communities, *Guidelines for the Preparation of Rural Communities Impact Statements*, March 1997

<sup>86</sup> Submission 26, Ms Gibbs, pp2-3

<sup>87</sup> Ms Gibbs, Evidence, 5 July 2004, p20

that comes from within. It cannot be imposed from outside. It has to grow, and the Murrumbidgee college was part of the tools to nurture that ability to grow from within. We are very concerned that this is another aspect of the plan for decline philosophy. Statements have been made from a number of agencies that they should plan for decline in regional communities. We would most strongly oppose any such philosophy. It becomes a self-fulfilling prophecy. If you plan for decline and take services away, of course there will be decline. Do not turn around and say we told you so. Planning for decline is something the RCCC will be speaking on, in a very negative way, at great length in the months to come.<sup>88</sup>

**4.15** The Member for Murrumbidgee, Mr Adrian Piccoli MP also discussed the impact on rural communities generally of the loss of an educational facility such as the MCA:

The buoyancy of country communities can be based on something as simple as an inch of rain. The closure of an educational facility on top of the drought and on top of everything else was a real blow to the psyche of the community, not just in the electorate of Murrumbidgee but right across western New South Wales. At a time when we are on building prisons and closing colleges, I can only see it as a very backward step. I attended the graduation ceremony here at the College a couple of months ago. While I congratulate the students, it was a fairly sombre experience held in a relatively small hall, whereas in previous years it has been held in the forecourt under a big marquee with several hundred people and the Minister for Agriculture or the director-general being the official guest. This year's graduation ceremony was an unfortunate sign of the times.<sup>89</sup>

### **Impact on isolated students**

**4.16** A range of evidence was received both in submissions and hearings that isolated rural students are hugely disadvantaged by the closure of residential facilities. Most are too young to hold a licence; those who do may be unable to afford a car; moreover it is dangerous to drive the long distances to commute to TAFE. Parents, many of whom are working farmers, cannot afford the time and expense to drive their children to TAFE courses.<sup>90</sup> TAFE courses in regional centres lack residential accommodation, requiring young students to find accommodation and their food off-campus, an added expense and a source of worry to parents.

**4.17** Residential accommodation was considered essential for isolated students, both young students and farmers, wishing to attend short courses. The NSW Farmers' Association submission stated that providing residential facilities 'is an important tenet of providing education to students living on the land in isolated parts of the state.'<sup>91</sup> This was echoed by Mr Piccoli during his evidence before the Committee:

... the most important thing I think about the Murrumbidgee college is the residential side of things. That is very important to western New South Wales because of the distances and access. If you had even the Murrumbidgee college here fully fledged

---

<sup>88</sup> Ms Gibbs, Evidence, 5 July 2004, pp16-17

<sup>89</sup> Mr Piccoli, Evidence, 21 June 2004, p46

<sup>90</sup> Mr Slennett and Ms Butler, Evidence, 21 June 2004, pp2-10

<sup>91</sup> Submission 24, Ms McCredie, p7

without a residential component, it would still be pretty difficult to access it if you are from Balranald, Brewarrina or Nymagee or anywhere else. The reason why it has raised such passionate concerns here is because of the residential side of things. Young students could come here, do their agricultural courses and actually stay here because of the boarding facility.<sup>92</sup>

- 4.18** Ms Gibbs also told the Committee that residential facilities are essential even for short courses to be viable for farmers who require constant upgrading of their skills:

While, yes, short courses are still to be offered at Murrumbidgee a farmer cannot, realistically, drive 200 kilometres for a three-hour course and then go home again. The residential ability was a very important part of that. The future of agriculture is very different to what it was in the past. The new systems of agriculture that I mentioned are going to be absolutely essential. How do we upgrade the skills of our farmers? I guess my husband is, perhaps, typical of the average farmer. He is 57 years old. Yes, he has a degree. But he is still upgrading his skills all the time. Yes, we can access the Internet, but to physically go and exchange opinion with your peer group as well as hear from lecturers and other experts is an essential part of farm management these days. Day trips are just not going to meet that need.

The whole question of the next generation, what about the next generation of farmers? How do we make sure that they are supplied with the skills they need? Residential facilities really are required to access even the shortest of courses. Just to have an overnight stay would make it far more accessible to farmers.<sup>93</sup>

### **Indigenous students**

- 4.19** An important part of the program offered at MCA is the Aboriginal Rural Training Program, for which the College received the National Indigenous Trainer of the Year award in 1997. Dr Sheldrake informed the Committee that this program was not under threat, and would in fact be expanded:

In addition, the successful indigenous rural training program at the College is continuing to expand with course programs for areas like Warren, Narrandera, Monnus Correctional Centre, Shepherds Park and the Yorta Yorta group. The College is joined in a memorandum of understanding with Charles Sturt University to look into collaborative development of educational activities.<sup>94</sup>

- 4.20** Ms Gibbs also spoke to the Committee about the particular impact the decision to close residential facilities would have on the local indigenous community and their access to education:

... a number of the individuals within the Indigenous communities who are trying to get businesses up and running like the grape growing at Murran Bridge, for example, do not have ready access to transport. They cannot just jump in their four-wheel drive and go somewhere. They just do not operate that way. To move great distances is not always culturally easy for them. They have a great attachment to their land.

<sup>92</sup> Mr Piccoli, Evidence, 21 June 2004, pp49-50

<sup>93</sup> Ms Gibbs, Evidence, 5 July 2004, p15

<sup>94</sup> Dr Sheldrake, Evidence, 5 July 2004, p3

Murrumbidgee college was somewhere they were familiar with. The staff there had gone to great lengths to go out to the communities and talk to them. They understood what was happening at Murrumbidgee college. I would be concerned that if they were suddenly told that, yes, they could access the same courses but they would have to go somewhere completely different, might just get too hard.<sup>95</sup>

- 4.21** The Committee recognizes the difficulties involved for students and farmers to attend short courses at MCA without residential services at the College. If the Department is serious about the provision of short courses at MCA the issue of student accommodation must be addressed.

### **Impact on agricultural education in New South Wales**

- 4.22** The Committee heard a lot of evidence about the changing nature of agricultural education, and a shift away from full-time study to more vocational short courses and continuing education. Dr Sheldrake told the Committee that this was consistent with international trends:

Where the main demand used to be for traditional full-time courses, it has now largely shifted to either professional university training or more vocationally oriented short courses that provide practical forms of continuing education.<sup>96</sup>

- 4.23** There was general agreement that this shift had occurred; however many witnesses told the Committee that this was not beneficial for agricultural education. In particular, the move towards university education was seen by some to be a negative development. Mr Gelch, Chairman of the Murrumbidgee College of Agriculture Advisory Council, spoke passionately to this issue.

There has been an academic creep [which] is why it is so important that we have skills-based training. Hawkesbury, Wagga Wagga, and Orange all had agricultural colleges and they were absorbed into the university system. ... There was certainly some skills-based training at those colleges. When they were absorbed into the university systems, we lost that skills-based training. I have seen some graduates of those colleges and I am very much aware of that. It makes it all the more important to maintain skills-based colleges. The old Wagga, Hawkesbury and Orange agricultural colleges. ... skills-based training right through to management-based education. We fight very hard to ensure we do not have that academic creep.<sup>97</sup>

- 4.24** The Committee was provided with a very real example by Mrs Rodham whose son Tristan completed his first year at MCA in 2003:

There is no such thing just now of coming home to the family farm. So much is involved in farming that you must have all these certificates and qualifications to get a lot of things. My husband came home to the family farm. He has no qualifications. His son is more qualified than he is. He has to go back now and do chemical courses and all that sort of thing just to be able to buy the pesticides and herbicides for the local farm. Tristan has all that because he got all that here. That was one of the

---

<sup>95</sup> Ms Gibbs, Evidence, 5 July 2004, p19

<sup>96</sup> Dr Sheldrake, Evidence, 5 July 2004, pp2-3

<sup>97</sup> Mr Gelch, Evidence, 21 June 2004 p 32

reasons he got the job, because he originally started off burr spraying, and because he had the ChemSmart chemical course he got the job and is now turned into a full-time station hand's job. You have to have so much more qualification now because they are making it harder and harder. On the family farm there is no way you could walk out of school in year 10 and come home to the family farm. You have to have more qualifications. So, the idea of sending him down here was to get those qualifications.<sup>98</sup>

- 4.25** The impact on agricultural education extends to secondary education. Leeton High School and MCA enjoyed a very close relationship, with the facilities and programs at MCA being utilised extensively by the school. The Principal of Leeton High School, Mr Peter Edwards, told the Committee about the impact of the decision on the High School:

... we often need to call on other agencies or institutions to assist with educational programs, either by providing extension programs, enrichment programs or remediation programs. In the context of my school, Murrumbidgee College assists us with all these functions, and more. It has facilities and resources that we can tap into that are the envy of many schools. ...

In my experience as Principal of Leeton High School for the past five years, I can identify many cases where the opportunities and encouragement provided by the teachers and other staff at Murrumbidgee College have kept students at risk at school and in formal education. The indigenous education programs offered by the College have had a similar beneficial impact on indigenous students from this school and other schools.<sup>99</sup>

- 4.26** Mr Edwards concluded his submission by stating that:

Quality educational facilities are not widely available here in rural and remote NSW and closing an institution with such a fine reputation for providing quality educational opportunities for southern NSW and northern Victoria seems to me, as someone in the business of education, to be a significantly retrograde step.<sup>100</sup>

## Impact on students of MCA

- 4.27** The Committee heard that, of the 39 students enrolled in full-time courses at MCA in 2003, one student has continued his studies at Dalby agricultural college in Queensland, one student has transferred to Tocal, and a few have transferred to TAFE. It was estimated that approximately 10 of the 39 students have continued their studies, with the rest of the ex-students now working.
- 4.28** Two ex-students gave evidence before the Committee. Mr Daniel Slennett is now studying at Dalby in Queensland. Mr Slennett told the Committee that the only way he could pursue a career in agriculture and run his family's farm was by completing a course at an agricultural college.<sup>101</sup> He told the Committee about the impact on him and his family of the decision to close full-time residential courses at MCA:

<sup>98</sup> Mrs Rodham, Evidence, 21 June 2004, p18

<sup>99</sup> Submission 13, Leeton High School, p1

<sup>100</sup> Submission 13, Leeton High School, p2

<sup>101</sup> Mr Slennett, Evidence, 21 June 2004, p4

I was directly affected by the closure of Murrumbidgee Agricultural College as I was a full-time student doing certificate 3 and 4. I left my boarding school in year 10 in Sydney only to do two years at Murrumbidgee. It had the course that suited me for the position I was in as it was close to home and it had the course outlines I was interested in. Having checked out other places, it was the only one that suited me. I came here expecting to do two years but unfortunately it was cut short. The closure of Murrumbidgee Agricultural College has caused me be trouble as I had to find another place to go, another college, and it affects my family as well. I found another college up in Queensland which is 10½ hours a way from home. It costs quite a bit to get up there whether I go by bus or travel up personally, with the accommodation.<sup>102</sup>

- 4.29** The cost of travelling to and from Dalby has also had an impact on Mr Slennett and his family:

I am 10½ hours away from home. I can only get home on the holidays and it puts quite a few miles on the car and it does get quite expensive to travel up there, taking into account the fuel costs and public transport and accommodation if I am driving up.<sup>103</sup>

- 4.30** Ms Claire Butler was also a first year student at MCA in 2003 who aspires to be an agronomist. Ms Butler informed the Committee that prior to the closure she intended to finish her 2 year course at MCA then go to Charles Sturt University at Wagga. However, the decision regarding MCA coupled with a decision to cut agriculture as an HSC subject at TAFE has meant that she is now studying business administration at TAFE with a view to securing a traineeship at Elders because, as she told the Committee, ‘there was sort of nothing else really to do’.<sup>104</sup> In her submission, Ms Butler continues that ‘my future has been jeopardised by Mr Ian Macdonald’s decision.’<sup>105</sup>

- 4.31** In her submission, Ms Butler also wrote about the way the decision made students:

One morning tea break we were told there were discussions about the College’s future and by lunchtime our fears were confirmed, full-time residential courses would cease! That really made us feel of little worth to the government, that they couldn’t even keep it open for one more year so the first-year students could finish what they had started. We knew then that we had to start re-thinking our futures.<sup>106</sup>

- 4.32** Another ex-student invited by the Committee to give evidence was unable to attend due to his work commitments. His mother appeared and discussed the impact of the decision on her son and the future of their family farm. She told the Committee:

Our son was the youngest student down here. He was only 15. We sent him here because we were only 1½, two hours from here, so therefore we were close to home. The reason he was sent here was he finished in year 10 at the local high school in

<sup>102</sup> Mr Slennett, Evidence, 21 June 2004, p2

<sup>103</sup> Mr Slennett, Evidence, 21 June 2004, p6

<sup>104</sup> Ms Butler, Evidence, 21 June 2004, p5

<sup>105</sup> Submission No 11, Ms Claire Butler, p1

<sup>106</sup> Submission No 11, Ms Claire Butler, p1

Wagga Wagga and the TAFE college does not cover full-time Broadacre farming as a full-time course. It is only as a traineeship.

The day of the announcement absolutely devastated our house. What were we going to do with our son? He was too young to bring home to run the family farm. We then looked into Dalby. Again, he is a 16-year-old. How can you send him 16 hours from home? It was not a question of yes, you will be going. He stayed at home. He has been one of the fortunate ones and has got employment since.

I still cannot get over it. He was to be down here for two years and then hopefully get a job and come home and run the family farm. It is just that a lot of the same parents are in the same position. ... We did not know where we were going to go with our young son. His education in this area has now finished completely because unless Murrumbidgee college reopens, he would come back then but other than that there is no way he will go anywhere to further his education.<sup>107</sup>

## Future use of MCA infrastructure

- 4.33** The Committee heard that the Department is examining options for additional short courses at MCA and also the future use of the residential facilities at the College. Although Dr Sheldrake was neither able to tell the Committee of the function of those buildings which would be utilised nor when they would be functioning in their new role, he did say that:

meetings have been held with the then Mayor and staff of Leeton Shire Council to examine the future options for the residential buildings and kitchens at the College. A meeting with the Department of Education and Training [DET] involving both TAFE and schools education has also examined future options for the use of redundant kitchens and assets on-site. An independent hospitality and catering consultant has now been commissioned to assess the future use of these facilities, and a report is pending.<sup>108</sup>

- 4.34** The Committee undertook a site visit at MCA and was impressed by the buildings, facilities and equipment there. These buildings are now not being used and are not expected to be in use in the foreseeable future. The Committee considers the MCA to be a valuable resource for the Department and every effort should be made to make maximum use of these facilities. Mr Brown put it to the Committee that, with a bit of imagination, the residential facility could be reopened:

There is a problem, as I alluded to in the introductory remarks, with the type and quality of staff that were recruited. There is a lack of imagination in how you could handle a residential facility. There are plenty of contractors in Leeton who could provide meals, cleaning or whatever is required. You need a bit of imagination, a bit of lateral thinking and I think there was a lack of effort in terms of shoe leather in getting out there and promoting it in the right way, and you put all those together.

- 4.35** The Committee endorses this view and recommends that the Department make every effort to devise innovative means by which the residential facilities can be reopened. No specific suggestions were made but given the number of agencies, private companies and community

<sup>107</sup> Mrs Rodham, Evidence, 21 June 2004, p17

<sup>108</sup> Dr Sheldrake, Evidence, 5 July 2004, p3

groups that may conduct activities in rural NSW there is the need to maximise the use of these facilities.

---

**Recommendation 2**

That the Department explore with other agencies innovative ways by which the residential facilities at the Murrumbidgee College of Agriculture can be reopened, recognising that residential facilities are essential for isolated students, indigenous students and farmers who may attend short courses at the Murrumbidgee College of Agriculture.

---

---

**Recommendation 3**

That the Departmental working party examining the future of the Murrumbidgee College of Agriculture infrastructure develop a strategy for use of the residential facilities in consultation with the local community.

---

---

**Recommendation 4**

That the residential facilities at Murrumbidgee College of Agriculture remain intact and functional until such time as the working party examining the future of the college has completed its deliberations and reported.

---

## Chapter 5      The Colleges and the Department of Education and Training

This chapter addresses term of reference 1(d) which required the Committee to inquire into and report on:

The reasons why Murrumbidgee and Tocal Colleges have not been transferred to the Department of Education and Training.

In addressing this term of reference, this Chapter looks at:

- The Department of Primary Industries's commitment to agricultural education
- The benefits of transferring the Colleges to the Department of Education and Training (DET)

The views of stakeholders regarding a possible transfer of the Colleges to DET are also canvassed.

### Background – Australian National Training Authority funding

- 5.1** New South Wales is the only Australian state or territory providing both extension and vocational education and training (VET) services to the food and fibre industries. A quarter of a century ago there were five residential agricultural colleges in New South Wales, at Wagga Wagga, Hawkesbury, Orange, Tocal and Murrumbidgee. Of these five, three – Hawkesbury, Wagga Wagga and Orange – have been absorbed by universities and their students now get a university education. Since the closure of the residential facilities at Murrumbidgee College of Agriculture (MCA) there is only one agricultural college left that offers residential farmed based, vocational education courses – Tocal.
- 5.2** The 2001 review, *Extending Education: Review of the Agricultural Colleges within NSW Agriculture*, (hereafter referred to as *Extending Education*) noted that NSW Agriculture receives funding from the DET, sourced from the Australian National Training Authority (ANTA) on an annual basis, which is linked to a 'maintenance of effort' agreement between ANTA, the States and the Commonwealth. Under this agreement, it was agreed to maintain the state Government's overall level of effort (measured by financial input) to vocational education and training at 1992 levels.<sup>109</sup>
- 5.3** The review flagged a desire for NSW Agriculture and TAFE NSW staff to work more collaboratively.<sup>110</sup> The review recommended that

<sup>109</sup> NSW Agriculture, *Extending Education: Review of the Agricultural Colleges within NSW Agriculture* (2001), p21

<sup>110</sup> *Extending Education*, p28

... liaison and cooperation with external agencies and training providers be continued, particularly in order to encourage enhanced collaboration, and reduce duplication and competition, where appropriate.<sup>111</sup>

## The Department's commitment to agricultural education

- 5.4 Dr Richard Sheldrake, Deputy Director-General of the Department of Primary Industries and Natural Resources, indicated that provision of education would continue under the aegis of the new Department rather than be transferred to the Department of Education and Training, saying:

The Murrumbidgee College of Agriculture will focus on its strength in short course development and delivery in the future. However, there is still sufficient demand for residential style agricultural courses to maintain one college focused on delivering that service. Hence residential education will continue at Tocal Agricultural College, which has been favoured by students for that purpose for many years. ... Similarly, all on-farm skills training has been conducted at Tocal in an identical fashion to how it was run at the Murrumbidgee college.<sup>112</sup>

- 5.5 Dr Sheldrake also discussed the Department's future plans for the Colleges, asserting that MCA:

... remains an important and growing centre for continuing education. More than a dozen new short courses and distance learning courses are being introduced to Murrumbidgee College this year, and, as the Minister announced recently, a strong push is being made to expand it into irrigation training in co-operation with Charles Sturt University.

Planning is also under way for a suite of programs in natural resource management to be available to support the newly formed catchment management authorities ... part of the plan to strengthen the College's nationally recognised continuing education efforts and improve access to lifelong learning for farmers and farming professionals. In addition, the successful indigenous rural training program at the College is continuing to expand with course programs for areas like Warren, Narrandera, Monnus Correctional Centre, Shepherds Park and the Yorta Yorta group. The College is joined in a memorandum of understanding with Charles Sturt University to look into collaborative development of educational activities. This has already led to the irrigation training concept announced by the Minister.<sup>113</sup>

- 5.6 The Committee is pleased to note that the Minister, in response to a question without notice in the Legislative Council on Tuesday 31 August 2004, confirmed 'that the funding arrangements for Tocal are secure.'<sup>114</sup>

## Benefits of agricultural education remaining within the Department

5.7 The evidence received by the Committee overwhelmingly supported the retention of MCA and Tocal within the Department of Primary Industries. There was a feeling that TAFE has failed in the field of training young people for agriculture.<sup>115</sup> The primary reasons given to the Committee include:

- The uniqueness of agricultural education
- The costs of providing agricultural education
- TAFE's 'modular' education structure

### Uniqueness of agricultural education

5.8 The submission from the NSW Farmers' Association provides a exposition of the uniqueness of agricultural education offered at the MCA:

The unique value of courses offered at Murrumbidgee College of Agriculture lies in their provision of a 'middle option' between TAFE and university. It is essential that this accredited training is not lost from the agricultural sector, and brings into question whether TAFE could adequately service this niche of the market.<sup>116</sup>

5.9 Mr Glen Evans from the Hunter-Central Rivers Catchment Management Authority listed the following reasons agricultural education is unique in his submission:

#### Unique benefits of agricultural education

- ... a student employment record over 95 per cent
- provision of an external Diploma of Conservation and Land Management
- exposure to Property Management Planning education, vital for sustainable agriculture
- provision of expert training and experience in sustainable and practical land management processes, consistent with the NSW Government's natural resource management reforms
- opportunity for students to access the resources of the operating farm, enabling first hand participation in implementing environmentally and economically sustainable agricultural practices.<sup>117</sup>

<sup>115</sup> Submission 5, Mr Mulcahy, p1

<sup>116</sup> Submission 24, McCredie, p7

<sup>117</sup> Submission 18, Mr Glenn Evans, Hunter-Central Rivers Catchment Management Authority, p1

**5.10** Other benefits of NSW Agriculture's direct involvement and provision of full-time residential training include:

- opportunities for Year 10 rural students to further their studies in an appropriate environment, providing full residential and pastoral care
- exposure to resource centres and research stations as part of the vocational education and training
- provision of hands-on one-to-one training in a comprehensive range of agricultural pursuits such as broad acre farming, sheep industry, pastoral management, flood irrigation, beef industry/grazing, dairying, equestrian, general agriculture and environmental studies
- provision of basic management training, leading into Diploma courses, gaining credits towards degree courses
- provision of a fully commercial agricultural situation for students to obtain relevant industry basic training in a realistic environment
- provision of an Aboriginal Rural Training Program.

*Difficulties with TAFE*

**5.11** Reflecting on the nature of agricultural education, Mr Whiston, representative of the Tocal Ex-Students Association, felt that taking Tocal into the TAFE system would not be in the best interests of agriculture:

I am sure it [Tocal] would not have the access to information that it has now through the department, and probably not the same support from farmers. Tocal has huge support from farmers all over the State through its involvement in off-campus work. ... they know the Department of Agriculture—now the Department of Primary Industries—is the mother ship; it is the government department that holds their hand.<sup>118</sup>

**5.12** In addition, TAFE require a minimum of 12 students to run a course. As Mrs Rodham explained, in agricultural education it can sometimes be difficult to attract that many students to a particular course:

TAFE colleges do not run any courses unless there are 12 students or more in each class. Therefore, a lot of the TAFE courses did not suit our needs, especially from West Wyalong and places like that. They had to have 12 children to run a course. Out in that area it is very hard to get. That was the reason that MCA was the central place for us to bring Tristan and when it closed it was just devastating to us. We did not know where we were going to go with our young son. His education in this area has now finished completely because unless Murrumbidgee college reopens, he would come back then but other than that there is no way he will go anywhere to further his education.<sup>119</sup>

---

<sup>118</sup> Mr Whiston, Evidence, 5 July 2004, pp49-50

<sup>119</sup> Mrs Rodham, Evidence, 21 June 2004, p17

**5.13** Mrs Barbara Sherlock also felt that TAFE's standards were inadequate:

The quality of TAFE courses now being provided for students leaves a lot to be desired. My husband, ... a teacher in TAFE for twenty years before his retirement, was very disappointed by the watering down in both course content and standards, particularly of the paraprofessional level courses with which he was involved.<sup>120</sup>

**5.14** Mr David Lightfoot, associated with the William and Susannah Gill Memorial Scholarship at Tocal submitted that through its scholarships Tocal provides access to education for disadvantaged students that could not be matched by TAFE:

... all Tocal College scholarships are now primarily focused on assessed disadvantage – we believe this to be a unique situation within Australia, if not world-wide.

We frankly have no confidence that the Department of Education and Training can maintain such a focus ...<sup>121</sup>

**5.15** Crucial to the success of the agricultural colleges is their collaborative arrangements with the Department. Ms Yeend, an ex-Tocal student, submitted that this benefit would be lost if the Colleges were transferred to TAFE:

A crucial ingredient to the College's success and respected standing amongst our rural communities has been its direct connection with the Ministry for Agriculture (now Ministry for Primary Industries). The reputation and capacity to deliver relevant and responsive education and training across the rural and environmental sectors would be compromised should the College be absorbed within the Department of Education and Training.<sup>122</sup>

### **Cost of agricultural education**

**5.16** Agricultural training is extremely cost-intensive, requiring a very high ratio of staff to students (both teaching and support), access to a range of facilities and geographical terrain and use of large and expensive equipment. As Mr Brown from NSW Farmers commented 'everything around agriculture is pointy, or hot or dangerous not only to the operator but for everyone involved.'<sup>123</sup> Mr Brown has been a part time agriculture teacher in TAFE for 10 years. He cited the inherently high costs for practical agricultural skills-based training compared to other classroom-based courses:

Agricultural skills often involve one-on-one. A lot of what I do is actually one-on-one stuff, and that is very expensive, but there is no other way you can deliver practical training on, say, chainsaws, tractors, motorbikes, four-wheel drives. All that sort of stuff is one-on-one training. With practical classes, which I have done many of, I think they aim at 8:1 student to teacher ratio, which is half what they normally put into classrooms. So, that instantly doubles the cost. As soon as you get involved in some sort of specialised, hands-on training, it drops straight back to one-on-one. It is

<sup>120</sup> Submission 21, Ms Barbara Sherlock, p1

<sup>121</sup> Submission 16, Mr D Lightfoot, p1

<sup>122</sup> Submission 7, Ms Yeend, p1

<sup>123</sup> Mr Brown, Evidence, 5 July 2004, pp39-40

difficult to do because you have to find something else for the other students to do while you deliver that, but there is no other way you can do it. Plus, of course, you also have the high cost of any sort of machinery to train them on. It is no use putting them on a Dinky toy to teach them how to drive a tractor, you have to put them on a real tractor.<sup>124</sup>

- 5.17** NSW Agriculture owns the physical resources contained within the two colleges, and also has access to research stations and specialised laboratories essential to a comprehensive education program for agricultural students. Its training provisions are far more ambitious and rigorous in their range and subject-matter than TAFE's at present. The NSW Farmers' Association submission expressed concerns about TAFE's budgetary limitations and its ability to finance agricultural courses.

The Association has seen no evidence that NSW TAFE could in fact provide the MCA courses in a satisfactory way, particularly without additional budget allocation. It is unlikely that TAFE would have the teaching skill sets required to conduct residential courses currently offered by MCA. For example, experience in irrigation and rangeland management is unlikely to be available at Wagga TAFE.

The unique value of courses offered at MCA lies in their provision of a 'middle option' between TAFE and university. It is essential that this accredited training is not lost from the agricultural sector, and brings into question whether TAFE could adequately service this niche of the market.<sup>125</sup>

- 5.18** Mr Chaffey's submission also expressed concerns about the ability of TAFE to adequately finance agricultural education:

With the funding cut backs experienced by the Department of Education and Training over recent years, and the flow on effect to Agriculture study centres across the state, there is no guarantee that Tocal and Murrumbidgee colleges would not be placed in a worse economic position than they are now.

I cannot see any benefits to be gained by transferring the College system to the Department of Education and Training. The existing colleges provide unequalled training to rural industry, which is fully accepted by rural industry and is prepared to change as and when required to meet industry needs. This is not happening in the TAFE system.<sup>126</sup>

- 5.19** Impacting on the costs of providing agricultural education is the withdrawal of an annual allocation of Commonwealth education and training funds by DET from NSW Agriculture in 2003. Dr Sheldrake discussed the reason for this withdrawal during his evidence on 5 July:

That decision, which is still being examined and still being worked on by the department and the Department of Education and Training, was as a result of the Commonwealth reducing its allocation to the State of New South Wales as a whole

---

<sup>124</sup> Mr Brown, Evidence, 5 July 2004, p38

<sup>125</sup> Submission 24, Ms Fiona McCredie, p7

<sup>126</sup> Submission 22, Mr Richard Chaffey, p3

and that then had subsequent impacts upon the Department of Primary Industries which receives its funding from VET.<sup>127</sup>

### **TAFE's modular course structure**

- 5.20** TAFE's standard provision of modular training provides a range of elements suitable for agricultural education. Witnesses to the inquiry, however, argued that because TAFE lacked the facilities previously provided by the agricultural colleges, it cannot pull those elements together into a coherent agricultural education. Ultimately, agricultural qualifications from TAFE remain disparate elements rather than providing students with an overarching understanding of their subject. As Mr Speers, Assistant Manager, Training Services Riverina, Department of Education and Training, explained:

Within the national training framework you can aggregate the building blocks to achieve a qualification. However, you cannot pull that together. The sum of the parts is greater than the whole. In the absence of a training facility or organisations that can do that, there is not a great deal of opportunity for that to occur. You can have a lot of little skill sets that are not tied together in any coherent way. The sort of training the College is providing is done within a framework of people rolling through a series of modules and competencies. You build up a coherence through that series. While it was deliberately skills based, because that is how the national training system is set up, the fact that they were doing it continuously through the one agency, and in most cases with one or two trainers or educators, meant they built up the connection between those skills and the framework within which they could be used.<sup>128</sup>

- 5.21** Mr Brown, a farmer who has also taught in agricultural education, gave evidence concerning training in management skills for farmers:

Management is a skill of its own but it is also about linking all the various aspects that come together to actually make a farm enterprise. There is no short course that teaches that sort of management and interlinking. I spent a lot of energy trying to teach my students how to blend various enterprises together to make a farm work better, such as winter cropping with livestock because you need to be able to make them fit together to make the farm more profitable and often viable. That is where you need to teach management stuff which is basically what MCA and the higher levels of TAFE teach. University takes it up another step from there but that is essentially what we try to do with full-time students. There is no other way you can do that sort of training other than full-time, but some people do this sort of stuff at self pace by distance education but essentially it is a similar format in that you keep them in for a period and take them through a range of courses leading up to an overall management picture, if you like.<sup>129</sup>

- 5.22** Mr Chaffey, a member of the Tocal Advisory Council, also emphasised the need for a holistic approach to agricultural education:

<sup>127</sup> Dr Sheldrake, Evidence, 5 July 2004, p3

<sup>128</sup> Mr Speers, Evidence, 21 June 2004, pp37-38

<sup>129</sup> Mr Brown, Evidence, 5 July 2004, p39

That is one of the things I have concerns about with the TAFE situation: they get some skills but they do not get them right down to the ground application of this is why it works and the whole thing starts to fit together. It needs a wholistic approach to the education of the individual and that is what I find is missing in some of the TAFE structures, it is intermittent, bits and pieces, and the linking is not there in a lot of cases. They have attempted it in some areas but it is not the same as that approach from the Colleges. The kids live in; they live and work together, they talk together, they work through processes together, they learn to live as individuals together too, and that gives them the benefit of rural industry, and particularly the nature of the work that they go out to do.<sup>130</sup>

- 5.23** TAFE's modular system is inconsistent with providing residential services for its students. Many witnesses told the Committee that TAFE was 'not interested' in providing any full-time residential courses. When the Committee asked why TAFE is not an option, Mr Brown replied:

My understanding is that TAFE is not interested in any sort of residential thing. It is interesting where I teach, there are a lot of students who have to board or find some sort of accommodation arrangements. It is always difficult, because they are young, they rarely have motor vehicles. ... We would like to see a residential facility available, because these people tend to travel long distances and they tend to be straight from the home environment and it is a much easier step for them out into the workforce through a residential facility like Murrumbidgee. TAFE definitely would not provide anything like what was available at MCA.<sup>131</sup>

## **Tocal College as a charitable trust**

- 5.24** Tocal is unique because it was set up as a charitable trust in 1963 under the responsibility of the Minister for Agriculture (now the Minister for Primary Industries) at the bequest of Mr CB Alexander. Mr Ian Dunlop, the solicitor acting on behalf of the CB Alexander Estate, gave evidence before the Committee on 5 July 2004. The key issue in Mr Dunlop's view is the bequest of Mr Alexander and his nieces, the Misses Curtis, which might be interpreted as blocking any transfer of the assets associated with Tocal College.

- 5.25** Mr Dunlop explained that legally, the trust could prove to constrain any moves to fundamentally alter the nature of the institution:

Indeed. ... About 10 years ago there was some suggestion that there would be some change in the administration. ... There is no doubt in my mind that Alexander's benefaction belongs to the public, the community. Tocal College is a community-based entity. ... So, if anyone thinks we might make some changes, they need to take into account all that.<sup>132</sup>

- 5.26** If the Colleges (and in particular Tocal) were to be transferred to DET, it is unlikely that the operating resource – the farm - could also be transferred. Mr Dunlop noted that the return

---

<sup>130</sup> Mr Chaffey, Evidence, 5 July 2004, pp44-45

<sup>131</sup> Mr Brown, Evidence, 5 July 2004, pp36-37

<sup>132</sup> Mr Ian Dunlop, Evidence, 5 July 2004, p55

from the farm enables the training to be undertaken, and without that return the education provided at Tocal would be less viable:

if you had that operating resource removed entirely from Tocal – you just left the architectural buildings and you had a teaching resource there and you had none of the operating resources - with all its commercial rigour – how on earth could you conduct both the internal and external courses that are now being conducted by and at Tocal. You could not.<sup>133</sup>

**5.27** In conclusion Mr Dunlop stressed:

I underline the need for the conservation of the charitable trust and all it entails. That must predominate in any consideration of the future of Tocal.<sup>134</sup>

**5.28** Mr Dunlop was unable to provide the Committee with a proportion of Tocal's operating costs that were covered by farm revenue or from the Trust. He took that question on notice which was then forwarded to the Department. An answer was received on 8 September 2004 as follows:

The farm earnings from the College farm operations are largely managed by the Department's Corporate Services and these earnings are not accounted for in the costing of educational programs. The farms are run on a commercial basis and are as self-sufficient as possible given their nature. The CB Alexander Foundation owns and operates the College's Numeralla chicken farm, an enterprise it purchased in 1980. These funds are put to the purposes of the CB Alexander Foundation and are not accounted for or involved in the costing or operation of the student programs.<sup>135</sup>

**5.29** The Committee notes the unique nature of Tocal and that this makes any transfer of funding to DET as highly unlikely.

## **Benefits of transferring the Colleges to DET**

**5.30** Several submissions and witnesses were of the opinion that a transfer of MCA and Tocal to DET would have a positive effect on provision of agricultural training. There was also some support for the Colleges transferring to DET as a 'least worst' option. Reasons for these views included:

- Education is DET's core business, but only an ancillary business for the Department of Primary Industries
- Possible continuation of agricultural studies towards a degree

**5.31** Mr Brassil, Deputy Chairman of the Riverina Regional Development Board (RRDB), provided a clear rationale for transfer of the Colleges to the DET:

Being part of the Department of Agriculture seems to me to indicate that it [the Murrumbidgee College of Agriculture] is an ancillary activity of the Department of

<sup>133</sup> Mr Dunlop, Evidence, 5 July 2004, p54

<sup>134</sup> Mr Dunlop, Evidence, 5 July 2004, p54

<sup>135</sup> A C Archer, Director, Tocal Agricultural College, fax, 8 September 2004, p2

Agriculture, which is concerned with other aspects of agriculture besides educating people in it.<sup>136</sup>

- 5.32** The proposal would see all resources, including any staff, facilities and NSW and Commonwealth Treasury allocations being transferred to DET. Charles Sturt University (CSU) would participate as it is already linked to MCA through an Affiliate Institute Agreement. In Mr Brassil's view, an additional benefit would be a broadening of what is taught at the Colleges and the possibility of progressing towards a degree qualification. Mr Brassil told the Committee that:

I can see it being wider than just agriculture, yes, so that I do not think it should be continuously just agricultural specific. ... there should be some sort of set-up so that the importance of agriculture to that particular college is recognised; that it is the specialty of that college, and that it should be maintained. ... but I do not see anything wrong with teaching other aspects that are fairly normal to TAFE. ... I do not see why some other skills should not be taught, for instance welding or metal work generally, or a number of other skills.<sup>137</sup>

- 5.33** In its submission, the Riverina Area Consultative Committee expressed cautious support for a plan designed 'as a mechanism to deliver regionally appropriate training' and 'to ensure the next generation of farm workers are afforded the opportunity of flexible and locally based training.'<sup>138</sup> The Riverina Regional Development Board submitted that it 'cannot understand why Murrumbidgee and Tocal Colleges have not been transferred to the Department of Education and Training under a model as proposed or similar.'<sup>139</sup>

- 5.34** The MCA Advisory Council (Advisory Council) raised doubt over the Department's continued commitment to youth education at the MCA. Although not seen as the best possible outcome, the Advisory Council suggested that the next best possible outcome would be the transfer to DET and TAFE system.<sup>140</sup> The question of where the Colleges were situated is secondary to Mr Geltch, Chairperson of the Advisory Council, who told the Committee the focus should be on providing skills-based agricultural training:

... There has been almost a divergence in the way education has been delivered to the agricultural sector in New South Wales. It has moved away from multifaceted, multidisciplinary education into a more streamlined, academic versus skills-based system. Tocal and MCA were doing skills-based training very well. TAFE carries out that role as well. We must ask the question whether this institution would be better off in the TAFE system. ... Whether it is provided by the Department of Education and Training or the Department of Agriculture, there is a need for skills-based training in southern and western New South Wales. ... currently not being fulfilled by TAFE or Tocal.<sup>141</sup>

<sup>136</sup> Mr Pat Brassil, Evidence, 21 June 2004, p41

<sup>137</sup> Mr Brassil, Evidence, 21 June 2004, pp42-43

<sup>138</sup> Submission 36, Mr Watson, p1

<sup>139</sup> Submission 35, Mr Dale, p4

<sup>140</sup> Submission 23, Mr Geltch, pp5-6

<sup>141</sup> Mr Geltch, Evidence, 21 June 2004 p32

**5.35** The Advisory Council submission continued:

If the NSW Department of Agriculture is not prepared to commit the human, physical and financial resources to agricultural youth education, then we believe that there should be a transfer of this responsibility because:-

- 1 Provision of VET is the core business of the Department of Education and Training – this is not the core business of NSW Agriculture, NSW Fisheries, Department of Mineral Resources or NSW Forests.
- 2 DET should be responsible for all government provision of education and training. This will ensure:
  - a. More efficient use of limited public resources (human, physical and financial)
  - b. Consistency of:
    - i. Policy implementation, including reporting and accounting to NSWBVET and ANTA.
    - ii. Quality of VET provisions and outcomes.
    - iii. Meeting the needs of equity groups.
  - c. That rural VET provision across NSW will address environmental issues including water management, salinity and maintaining the well being of rural resources and assets.<sup>142</sup>

**5.36** Mr Speers suggested that transferring MCA and Tocal to the DET might open the Colleges to part privatisation of vocational education and training with an effect on both educational delivery and educational take-up in the rural sector. He informed the Committee that:

The vocational education and training sector was opened up to the user-choice policy from about 1994. So, rather than being a TAFE-based sector, private providers could become registered and be accredited to deliver training and, in particular, to receive public funding. A number of shifts have occurred in the way training is delivered and in the way that people have approached accessing the education and training system. One of those shifts has been towards work-based delivery. That has probably been one of the biggest shifts. The other significant shift, primarily since 1998-99, has been the move away from people enrolling in what one would call full certificate courses at various levels to training that is specific to their immediate needs. Unfortunately, the statistics do not go back that far. That trend was picked up in only about 2000 in the official data collection process.<sup>143</sup>

**Community support for Tocal College****5.37** The Committee received 121 form letters signed by individuals, families and businesses expressing support for Tocal College in the strongest terms and requesting that its funding

<sup>142</sup> Submission 23, Mr Geltch, p6

<sup>143</sup> Mr Speers, Evidence, 21 June 2004, p37

remain within the Department of Primary Industries. Some of the signatories also gave evidence. Mr Hodgens for instance expressed concerns for the future of NSW agricultural colleges and their students:

It worries me deeply ... Queensland ... from memory, they have still got five ... residential colleges. Tocal is not pure academic, it is not trying to be a university, it is a hands-on college where we are trying to get them to put all their skills together into management as well as hands-on driving a tractor properly, spraying properly. Yes, I am extremely concerned.<sup>144</sup>

**5.38** Mr Chaffey expressed why Tocal fills needs that TAFE cannot:

There is such a thing as being on the spot at the right time and place to be able to apply the different principles of those industries, and if you are not living and working in that industry where it is you do not learn the principles. ... with its beef management course and all the practical beef stuff that goes on there, when things are happening [at Tocal] the students are there, they are there right where it is happening; they are learning from experience; they are learning things are real. ... I think you have got to live in that environment to learn those things. I grew up on a farm. A lot of what I learnt on the farm cannot be passed on to other people because I have lived and experienced it. ... the real practical farmers of today ... have got to actually live and experience the environment in which they are working to be able to achieve.<sup>145</sup>

## Conclusion

**5.39** The Committee notes that at the date of this report the Minister has not made available correspondence between himself and the Minister for Education on the funding of the College. The Committee does not agree with the statement by the Minister that this matter is not within the terms of reference or within the Committee's powers. The Committee is pursuing the matter, as discussed in Chapter 1. In the absence of this information the Committee recognises that there are reasonable arguments both for and against funding the colleges through the Department of Primary Industries.

**5.40** The Committee heard a large amount of evidence about the importance of initial training and continuing education for farmers, a result of constantly changing technology and the need for more efficient use of natural resources. On balance the Committee believes that farmers in New South Wales will be best served if this education continues to be provided by the Department of Primary Industries in specialist agricultural colleges, and recommends that the Department make a long term commitment to developing centres of excellence at MCA and Tocal.

---

<sup>144</sup> Mr John Hodgens, Evidence, 5 July 2004, p46

<sup>145</sup> Chaffey, Evidence, 5 July 2004, p45

---

**Recommendation 5**

That the Government recognise the uniqueness and importance of agricultural education in New South Wales and continue to provide adequate financial human and capital resources to Murrumbidgee College of Agriculture, Yanco and CB Alexander Agricultural College, Tocal.

---

---

**Recommendation 6**

That the Minister, in conjunction with the advisory councils of the Murrumbidgee College of Agriculture and Tocal colleges, continue to seek improvement of courses offered at the Colleges and effectively market these courses, to ensure both colleges remain centres of excellence in agricultural education.

## Appendix 5 Extending Education - Summary of Recommendations

### It is recommended:

#### To achieve greater integration between the Colleges and the Divisional Programs

- A. That NSW Agriculture reflect, in its corporate goals and planning, the complementarity of vocational education and training (VET) and extension services.
- B. That NSW Agriculture seek Registered Training Organisation (RTO) status on behalf of Divisional Programs to enhance the value that education adds to the wider extension network.
- C. That the primary focus of the Colleges be re-aligned such that their main goal can be stated 'the Colleges, in conjunction with NSW Agriculture's other product and service Programs, service farmers and agricultural industries.'
  - i. That the College Principals be responsible for ensuring all training activity conducted by College staff, including development and delivery, is in conjunction with other Divisional Programs.
  - ii. That education officers be utilised by other Divisional Programs for the purposes of enhancing VET capability for the Department.
  - iii. That the Education and Training Program devote necessary resources to 'selling' the benefits of VET to the rest of the Department.
  - iv. That a working group be formed, comprising the Program Manager Education and Training, the College Principals and at least two other Program Managers, to develop mechanisms to enhance integration between Programs and between the Colleges.
  - v. That physical and human resources currently located at NSW Agriculture's Centres of Excellence be utilised to improve the provision of accredited training on behalf of the whole organisation.
  - vi. That Commonwealth Capital Funds and Growth Funds be directed towards enhancing infrastructure at Centres of Excellence and the development and delivery of training resources at these Centres.
  - vii. That the Colleges increase their role in training Departmental staff through an expanded range of short courses and the adoption of a purchaser/provider arrangement with Staff Training and Development.

#### To achieve improved utilisation of resources:

- D. That administrative, financial and publication functions at the Colleges be standardised and consolidated to ensure quality assurance and to achieve efficiency gains by reducing unnecessary duplication.
- E. That a business development officer be appointed for a term of 5 years at Yanco and charged with furthering business development and marketing of NSW Agriculture's VET and extension functions.
- F. That three permanent full-time staff members be appointed at Yanco, and one of these be assigned to each of these programs:
  - Aboriginal Rural Training Program
  - Quality assurance (Food Processing) Program
  - Horticulture/Viticulture Program.
- G. That the feasibility and development of on-line learning opportunities be examined as a means of increasing flexible delivery for VET.
- H. That consideration be given to consolidating full-time residential activity to one College site by 2004 if the decline in full-time student numbers continues into 2003.
- I. That Commonwealth capital funds be used towards the refurbishment of existing College buildings to meet changing needs.
- J. That the accommodation buildings Calrose and Inga at Yanco be converted into office accommodation to facilitate rationalisation of administrative and clerical functions at the site.

**To achieve improved internal systems:**

- K. That prices charged for short courses delivered to farmers are based, as a minimum, on the direct costs derived from NSW Agriculture's Short Course Costing Module (minus the overheads and management costs).

**To achieve enhanced links with external bodies:**

- L. That liaison and cooperation with external agencies and training providers be continued, particularly in order to encourage enhanced collaboration, and reduce duplication and competition, where appropriate.<sup>146</sup>

*Upper House Inquiry into Murrumbidgee College of Agriculture*

The following information is provided regarding the question directed to Mr Ian Dunlop at this inquiry.

**The Chair asked Mr Dunlop:** What proportion of funding to Tocal comes from the farm earnings and what proportion comes from the Estate of CB Alexander? (Hansard p53).

**Proposed answer:** The farm earnings from the College farm operations are largely managed by the Department's Corporate Services and these earnings are not accounted for in the costing of educational programs. The farms are run on a commercial basis and are as self-sufficient as possible given their nature. The CB Alexander Foundation owns and operates the College's Numeralla chicken farm, an enterprise it purchased in 1980. These funds are put to the purposes of the CB Alexander Foundation and are not accounted for or involved in the costing or operation of the student programs.

**A C ARCHER  
Director**

11 July 2004

Mr Ian Dunlop, Member, Friends of Tocal

General Purpose Standing Committee No 5.

**INQUIRY INTO MURRUMBIDGEE COLLEGE OF AGRICULTURE.**

J Hodgens reply to a question on notice.

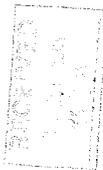

**Q :** Mr Catanzariti asked Mr Hodgens : What sort of inquiries has Tocal had from people from Western New South Wales trying to get into Tocal to do courses?

**Prereamble:** As no specific time frame was included in the question my answer covers the past 12 months i.e. 2003/04.

Western New South Wales is also an unspecified area and a large one so I have included figures from west of the Great Dividing Range. I trust that this is suitable.

**A :** My information, having been obtained from a most reliable source, indicates that the inquiries made to Tocal in the past 18 months relating to available residential courses is as follows ;

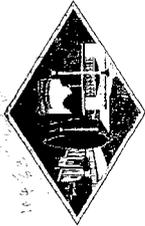

Moree	15
Bourke	3
Parkes	7
Forbes	8
Coonamble	8
Gilgandra	11
Gulgambone	5
Murray/Riverina	6
Wagga	4
Narrabri	48

I trust that this answers the question to the committee's requirements.

Yours sincerely,

John W Hodgens

 SHADOW MINISTER ASSISTING IN NATURAL RESOURCES & ETHNIC AFFAIRS

30 June 2004

The Chairman  
 General Purpose Standing Committee No.5  
 Legislative Council  
 Parliament House  
 Macquarie Street  
 SYDNEY NSW 2000 00

Dear Sir, *JA*

You will recall that during my evidence to your Committee at the recent inquiry into the Murrumbidgee College of Agriculture that I was asked a question by the Chairman relating to my written submission. The question was how did I come up with the figures of \$2.5m in direct wages and the \$10m ripple effect being the costs of the closure to the local economy.

I agreed to take the question on notice. I now provide the following information. Those figures were taken from budget documents supplied to Leeton Shire Council. The figures of a \$2.2m wages loss with a multiplier effect of 3.5 meant a reduced economy of at least \$7.7m.

However on September 16 the PSA released a document saying the removal of corporate service people alone would cost Yanco \$594,000. Added to that is Yanco's loss of educational wages, a total of \$2,000,146.

When both are added together, the corporate and education sectors total of \$2,594,146. There is then the generally accepted multiplier effect of 4.

I hope this additional information answers your question.

Yours sincerely,

Adrian Piccoli, MP  
 Member for Murrumbidgee

3 August 2004

Mr Ian Cohen,  
 Chair  
 Parliamentary Inquiry  
 The Closure of Murrumbidgee College of Agriculture

Dear Mr Cohen

I would like to reply to questions taken on notice at the appearance of NSW Farmers' Association before the inquiry chaired by you. I apologise for the late submission of these answers, but unfortunately I have been unable to respond in a more timely manner.

The first question asked by Tony Calanzani: "Was Duncan Fraser consulted (as a member of the MCA Advisory Council) on the closure of MCA"? The answer given by Duncan is that there was no consultation prior to the day that the closure was announced. The only consultation was on the day the closure was announced.

The second question asked by Tony Calanzani: "Was the NSW Farmers' Association aware of the proposed changes in any form from 2000 onwards"? The answer is no, the Association was aware of a review into both MCA and Toccal in response to falling enrolments, but was not aware of other proposed changes.

The third question was: "Where do you think the figures are flawed and give examples". The figures are flawed as they are used selectively to show MCA in the worst possible light. An example is the enrolment levels. The figures show that, in reality the numbers had declined, but recently had then begun to increase.

Another example is the cost figures used to justify the closure. The accepted benchmark is cost per annual student contact hour. When this benchmark is applied to MCA the cost of educating students at MCA compares well with the cost of education through TAFE in NSW.

I hope these answers are of some value to your inquiry deliberations.

Yours sincerely

QUESTION ON NOTICE

PORTFOLIO: PRIMARY INDUSTRIES  
 ISSUE: INQUIRY INTO THE MURRUMBIDGEE COLLEGE OF AGRICULTURE

QUESTION:

- On 5 July 2004
- (1) **Mr Cohen asked Ms Howard, Department of Agriculture:-**  
 Were VET funds used for the construction or maintenance of roads in Tocol? (Hansard p4)
  - (2) **Mr Cohen asked Ms Howard, Department of Agriculture:-**  
 (a) How was student curriculum hours calculated in the audited statement of curriculum hours at Tocol and Murrumbidgee College of Agriculture in 2002?  
 (b) How was student curriculum hours at Tocol and Murrumbidgee College of Agriculture calculated in the Department Agriculture's 2002 Annual Report?  
 (c) What activities were included in both calculations for each institution? (Hansard p5)
  - (3) **Mr Colless asked Ms Howard, Department of Agriculture:-**  
 (a) How many statewide school visits were undertaken to advertise the benefits of studying at the Murrumbidgee College of Agriculture, Tocol or both?  
 (b) What schools were visited? (Hansard pp5-6)
  - (4) **Ms Hale asked Dr Gleeson, Department of Agriculture:-**  
 Can you please provide the Committee with a copy of the regional communities impact study that was completed regarding the decision to close full time residential courses at Murrumbidgee College of Agriculture? (Hansard p12)

**Additional questions placed on notice by the Committee Chair to Dr Sheidtrake:**

- (5) Please provide details of funding to the Murrumbidgee College of Agriculture and Tocol for the years 1999 to 2004.
- (6) Please provide details of staffing (number and type of positions) at the Murrumbidgee College of Agriculture from 1999 to 2004 including numbers of academic and support staff.
- (7) Please provide details of staff vacancies at Murrumbidgee College of Agriculture from 1999 to 2004 including:
  - (a) The date the position became vacant
  - (b) The date the position was filled
  - (c) The qualifications of the person filling the vacancy
- (8) Please provide details of student numbers at the Murrumbidgee College of Agriculture from 1995 to 2004 including:
  - (a) Full time residential students
  - (b) Full time day students

 SYDNEY NSW 2000

**Inquiry into the Murrumbidgee College of Agriculture**

I refer to your various letters of 8 July 2004, to the Department of Primary Industries, concerning the current Standing Committee Inquiry into the Murrumbidgee College of Agriculture, and the questions placed on notice both during the hearing and additional questions by the Committee.

Please find attached the answers to the questions provided.

Yours sincerely

**IAN MACDONALD MLC  
 NSW MINISTER FOR PRIMARY INDUSTRIES**

LEVEL 30 GOVERNOR MACQUARIE TOWER 1 PARKER PLACE SYDNEY NSW 2000 AUSTRALIA  
 TELEPHONE: (02) 9228 3344 FACSIMILE: (02) 9228 3452  
 E-MAIL: office@macdonald.minister.nsw.gov.au

Education and Training (BVET), the NSW Department of Education and Training (DET), local government, regional development boards as well as regional organisations and industries in the development of the Review of the Agricultural Colleges that you chaired and managed?

- (20) Why did the Review Panel not include anyone with educational qualifications, experience and expertise?
- (21) Why was the Draft Review *not* submitted to the NSW Government agency responsible for VET policy, the NSW Board of Vocational Education and Training (BVET), for comment and feedback?
- (22) Why did you not provide a copy of the Review to all other for their information and comment?
- (23) Why did the Department's two most senior and qualified educators, the College Principals, discredit the Report?
- (24) Why has such a non-consultative and discredited Review been used to justify the closure of residential courses at Murrumbidgee College?
- (25) Why have not any Murrumbidgee college staff transferred to Tocal?
- (26) The Review resulted in the appointment of a permanent Education Officer (Food Processing) at Murrumbidgee College and an Education Officer (Viticulture) at Wagga Wagga. Why have you stopped these officers from providing viticulture and food processing traineeships when these are in great demand by industry and BVET and DET – particularly with all the considerable support provided by BVET through funding traineeships, buildings and plant and equipment.
- (27) Why have you stopped Murrumbidgee College's outstanding VET in Schools programs when they were meeting such an important need for regional young people, schools, industries, families and educational systems? This contribution was commended and recommended by BVET, including the College being a finalist in the VET in Schools section of the NSW Training Awards.
- (28) How does your decision improve access and equity to VET for disadvantaged young people in rural, remote and regional NSW?
- (29) Why has the NSW Minister for Education and Training withdrawn Commonwealth VET funding from NSW Agriculture this year?
- (30) What proportion of your budget did these withdrawn Commonwealth VET Funds comprise?
- (31) What impact will the loss of these Commonwealth funds have on the further reduction of accredited VET to regional young people, industries and communities by Murrumbidgee College?
- (32) Why is Murrumbidgee College now using its scant resources on a skills recognition program when there is such an enormous unmet demand for skills training in the region?

(c) Part time (short course students)  
(d) Trainees  
(e) Aboriginal rural trainees  
Please include total student contact hours for each category.

- (9) Please provide details of full time courses offered at Murrumbidgee College of Agriculture from 1995 to 2003.
- (10) In its 2000 review, did the Department identify the number of students required to make the full time residential courses at Murrumbidgee College of Agriculture economically viable?  
If so, what was that figure?  
How was that figure communicated to the College and its Advisory Council?
- (11) Please provide details of the irrigation courses offered in 2004 or scheduled to be offered at Murrumbidgee College of Agriculture?
- (12) Please provide details of the formula used to calculate the cost of providing courses at Murrumbidgee College of Agriculture and Tocal. What is the cost of providing:  
(a) Full time residential courses  
(b) Full time day courses  
(c) Short courses  
(d) Traineeships  
(e) Aboriginal rural traineeships  
How does this cost compare to the cost of providing equivalent courses at TAFE?

#### Additional questions placed on notice by the Hon Rick Colless MLC

##### Ms Scott-Orr:

- (13) Did you advise the Chairman of the Advisory Council, Mr Jim Getch, either verbally or formally, that the short course program at MCA would be "ramped up" during 2004?
- (14) Has there been an increase in the financial, physical and human resources allocated to the short course program this year?
- (15) Can you provide details of allocations to the short course program for the previous five years?

##### Ms Howard:

- (16) When you met with Mr Getch on 13th June 2001, you discussed the Review, but according to Mr Getch's evidence, you did not give him a copy of the Review. Why did you not give Mr Getch a copy of the Review?
- (17) Did you discuss some of the recommendations with him?
- (18) Why did you not discuss all of the recommendations with him, particularly Recommendation H?
- (19) Why was there no consultation with the Advisory Council of Murrumbidgee College of Agriculture, agricultural and food industries, the NSW Board of Vocational

- (33) Why is this change of policy not consistent with the NSW Government's current regional VET policies – as developed, published and implemented by BVET and DET?
- (34) Why were the Advisory Council and regional stakeholders not consulted in this change of direction? How can this skills recognition program meet the region's need for increased skills training and development for the agricultural and food industries?

**ANSWERS:**

- (1) No.
- (2) (a) Curriculum hours are recorded for each student enrolled in each unit of each course on the college's database. These are then reported to the Australian National Training Authority and audited annually by the National Centre for Vocational Education Research. The audit verifies that the data forms an accurate record of student enrolments and course hours.
- (b) There were no curriculum hours listed in the 2002/3 Annual Report. There are lists of student attendances for both colleges based on actual attendance at short courses and in external programs.
- (c) See answer to (a) above.
- (3) (a) Approximately, 100 schools were visited by staff to promote agricultural careers and course options at both colleges. A large number of Careers Markets were also attended around the state.
- (b) Attached is a list of schools and Careers Markets visited. (Appendix 1)

- (4) Regional communities impact statement attached. (Appendix 2)

(5)

Murrumbidgee College ConFund Expenditure					
Financial years ending 1999 to 2003					
	1999	2000	2001	2002	2003
	\$	\$	\$	\$	\$
<b>Expenditure</b>	2,016,905	1,792,132	1,757,304	1,910,546	2,020,272

NB: The 2004 expenditure is not available at this time.

- (6) Staffing numbers attached. (Appendix 3)

- (7) The Department does not have this information in a readily accessible format. Professional officers (educational officers) require a degree in Agriculture with a minimum of Certificate IV in Workplace Training and Assessment or educational degree with experience in agriculture.

- (8) Student enrolment information is available in the Annual Report.

Information requested on contact hours is readily available for the years 2000 to 2003 and as such, Appendix 4 includes the audited student contact hours for 2000 to 2003. The department is currently determining if student contact hours are available for earlier years and the time necessary to obtain this information.

- (9)

Cert III Agriculture
Cert IV Agriculture
Past IV Pastoral Property Management

- (10) No the review did not identify this number.

- (11) The department has been developing a number of new courses including the following specifically for irrigation:-

- Managing Horticulture Irrigation Systems
- Service and Repair of Bores and Windpumps
- Water Management for Grapevine Production

- (12) Methodology for calculation of costs of provision of costs is attached as Appendix 5.

The costs relating to each course type was calculated in 2000 for the College Review (Attached, pages 36-37, Appendix 5) The costing for short courses, traineeships and Aboriginal rural traineeships have not been costed over the last 3-4 years.

The Department does not have the information from TAFE to allow this comparison. TAFE does not provide residential services.

- (13) Yes.

- (14) Yes.

- (15) No, this was left to the discretion of the Principal.

- (16) The review was discussed at length with the Advisory Council according to the Advisory Council minutes of 13 June 2001.

- (17) Yes.

- (18) According to the minutes of the Advisory Council meeting, recommendation H was discussed on this date. Jim Galtch was at this meeting.

has been implemented in many areas of NSW and has now been extended to the south-west of the state.

- (34) The Advisory Councils of both Colleges have been consulted and supported the skills recognition and short course programs at both Murrumbidgee and Tocal Colleges.
- Skills recognition programs provide farmers with credit for skills they have achieved on-the-job and highlight areas where they need to gain further training. Consequently, those involved in the program are more likely to enrol in short courses and external diploma programs. This has been the experience in other areas of NSW.

(19) Consultations were held with the Advisory Council in November 2000 and June 2001.

(20) The Director-General at the time did not deem this necessary for the purpose of this review.

(21) It was an internal review. See response to question 19 above.

(22) Question is incomplete and not understood.

(23) Both College Principals in consultation with senior management and the Advisory Council were provided opportunity to comment, which they did. Both College Principals provided constructive comment.

(24) This review did not provide the justification for closure. The drop in student numbers after the review did.

(25) The decision of whether or not to accept a transfer to Tocal was an individual decision for affected staff.

(26) These decisions were taken to address concerns of duplication of education service delivery in the Riverina.

(27) Response is the same as for question 26.

(28) This is largely the responsibility of the Department of Education and Training. Access and equity to VET for ALL youth is an issue that has ongoing support and is addressed by the Principal of Tocal and Murrumbidgee and respective Advisory Councils.

(29 - 31) Questions should be directed to the NSW Department of Education and Training.

There is no expected impact on service delivery.

(32) The range of short courses offered at Murrumbidgee College and other centres in the region has been expanded to meet the needs for skills training. In some cases, these courses are not fully subscribed despite wide promotion of courses.

There is a strong demand by industry for skills recognition programs to provide farmers with credit for competencies gained through training and work experience. These programs go hand in hand with further training opportunities such as short courses and external programs as skills recognition is an excellent way of highlighting the need for further training and development and invariably leads to increased participation in further training.

Skills recognition has been strongly supported by industry groups, in particular the dairy industry for rural readjustment and is an important element of rural readjustment for rural industries right across NSW.

(33) Current National VET strategies and regional VET policies emphasise the need to provide Recognition of Prior Learning (RPL) programs for industry. This has been the case for many years. The department has developed an excellent skills recognition program in response to these priorities and strong demand by industry. This program

**Rural Community Impact Statement**

**1. Introduction and Background**

To achieve organisational efficiencies, NSW Agriculture is proposing to

- consolidate all future full and part time residential education courses at Toccal
- implement a shared corporate services strategy.

These initiatives would involve the possible transfer of approximately 44 staff from Yanco to either Orange or Toccal, approximately 17 staff from Wollongbar to Orange and 14 staff from EMAI to Orange. Alternatively, these staff will be offered voluntary redundancies.

Rural community impacts associated with the two proposals fall primarily into the categories of:

- changes in education service delivery to regional communities; and
- loss of government salaries from regional communities.

Given the transfer of both education services and administrative staff from Yanco (Leeton) and the smaller size of the local communities, there is greater potential for more identifiable and significant rural community impacts in the Leeton area. As a result, this statement focuses on the impacts in the two rural communities of Leeton (Griffith and Lismore/Ballina (see maps attached)). The loss of a possible 14 positions from EMAI in the rapidly growing Camden area of outer metropolitan Sydney within a very large and dynamic employment market is considered to be too small to warrant further realistic consideration in this statement.

Whilst job losses have a negative impact for individuals and communities of any size, there are a number of factors which may offset these impacts both within and beyond those communities immediately affected. These factors are considered in the following analysis.

**2. Rural Community Impacts**

**2.1 Service Delivery – Education**

Face to face/residential teaching will no longer be offered at Murrumbidgee College of Agriculture. Student numbers have declined over recent years with 35 enrolled in 2002-03. Of these enrolments, only 9 were from the Riverina and a significant number from Victoria. Hence, service delivery to the local area was minimal and will be fully replaced by education services provided from Toccal with other educational providers continuing to offer a number of related agricultural courses. It is anticipated that travel scholarships will be available to assist in offsetting any additional costs incurred by current Yanco students transferring to Toccal for the remainder of their course.

Any course improvements resulting from the transfer of staff to Toccal would generate considerable benefits across its greater current (and likely future) student numbers.

**Proposed Consolidation of Corporate Services and Education Functions by NSW Agriculture:**  
*Rural Communities Impact Statement*

NSW Agriculture

### 2.2 Income and flow on effects – Yanco and Wollongbar

Approximately 60 staff will be transferred from Yanco and Wollongbar to either Orange or Tocal, or will accept voluntary redundancies. If it is assumed that approximately 50% accept VRs, then around 22 people will leave the Yanco/Leeton area and around 8 will leave the Wollongbar/Lismore area.

The loss of 44 salaries from Yanco and 17 from Wollongbar is small relative to the total workforce and positive employment growth in the Leeton and Lismore regions.

- *In the Leeton region*, at the 2001 census there were approximately 4930 people employed. Significantly, employment has increased steadily in Leeton over the past decade with numbers of employed having risen by 600 between the 1991 and 2001 census periods. Similarly, employment growth has been firm in Griffith with employment numbers increasing by 2300 in the same period. Unemployment has halved – from about 10% to 5% in both Leeton and Griffith over the same period. Overall, the 44 salaries lost would represent less than 1 percent of the total number of Leeton salaries and less than 0.3% Leeton/Griffith salaries (see Table 1).

- *In the Lismore region*, approximately 11,100 people were employed in 2001 and hence the 17 who may transfer represent a very small percentage (0.15%) of the employed sector. Whilst population and employment levels have been stable in Lismore, employment levels have increased by 37% (almost 4000) in Ballina between the 1991 and 2001 census periods. This was faster than the rate of population growth at 24% over the same period (see Table 2). Unemployment levels had also declined from over 15% in Lismore and Ballina to about 13% and 10%, respectively in those areas over the same period.

The regional impacts associated with the loss of government salaries are also dependent on the spending patterns of those involved. A significant proportion of salaries are likely to be spent outside the region. Hence, the actual income loss effect in the particular regions concerned will be less than the dollar value of the 60 salaries directly involved. Further, in the short term VR payments may boost regional income flows. The extent of this effect is again dependent upon spending patterns and the number of recipients who choose to remain in the region.

The impacts from loss of government salaries will also be offset by any subsequent employment of VR acceptors as well as by local employment growth more generally - ie incomes lost may be replaced by incomes earned in other industries minimising the impact on the local economy. The relevant occupation categories of clerical workers, associate professionals and professionals have been expanding at a faster rate than employment as a whole in both the Leeton and Lismore regions offering favourable prospects for re-employment (see Tables 1 and 2).

From a statewide perspective the income and employment impacts in Yanco and Wollongbar will be offset to some extent by positive impacts in Orange and Tocal. The regional centre of Orange will also benefit from staff being transferred from EMAL.

### 3. Overall Assessment

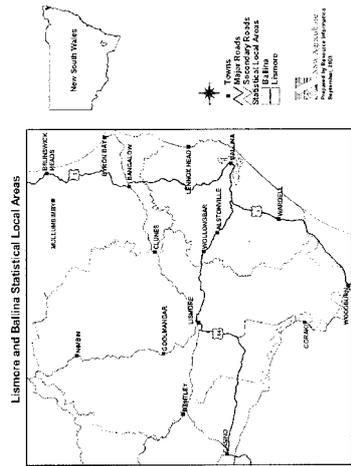

*Education service delivery* – enrolments at Yanco are small and declining in number and services will continue to be provided from Tocal. Regional disadvantage is therefore minimal with the potential for widespread gains from any future improvements in education programs/services delivered from Tocal.

*Income and Employment* – Because of the smaller community size, the impact of lost regional salaries will be greatest in the Leeton area. This will however be limited/offset by:

- the small number of jobs in comparison to the total numbers employed in Leeton and the expanding Leeton/Griffith economy;
- positive income effects associated with VR payments;
- favourable prospects for regional employment growth and re-employment
- positive employment effects in Orange and Tocal.

2002 Annual Report

**COLLEGE ACHIEVEMENTS - 2002**

The College's considerable reputation and achievements in the provision of vocational education and training for the food and fibre industries and rural communities were acknowledged by external agencies and outside organisations during 2002.

Ms Regina Dunlea, Executive Officer of the NSW Food Industry Training Council gave the Occasional Address at the College's 39<sup>th</sup> Conferring of Awards Ceremony where accredited vocational awards were conferred on graduates. Over 3,600 people enrolled and completed accredited courses or modules with the College during the year. Numbers of the 2002 graduates completed training programs that were funded by the Department of Education and Training.

A scholarship in memory of ex-student Warwick Tour, who was killed in a canyoning accident in Switzerland in 1999, was officially presented by Ms Kirsty Vidgen to the Deputy Director-General, Dr Richard Sheldrake, at the College's annual Graduation Ceremony. The \$1500 scholarship was awarded to Jayne Griffin, a Certificate IV in Pastoral Property Management student in 2002. Over 170 rural students who successfully completed a range of rural training courses at the College also received their certificates from Dr Sheldrake.

The positive participation rates in the College's educational programs continued to be maintained in 2002. Similar participation rates in the Department's educational programs also occurred at CB Alexander Agricultural College at "Total". This participation rate indicates the high level of confidence that rural industries have in the Department's educational programs. The College's enrolments over the last fifteen years are shown in the following table.

YEAR	FULL-TIME ENROLMENTS	PART-TIME ENROLMENTS		TOTAL ENROLMENTS	% OF 1987 ACTIVITY
		Trainees	Others		
1987	47			47	100
1988	66			66	140
1989	77			97	178

## Attachment 1

**METHODOLOGY USED TO CALCULATE COST PER STUDENT  
AT TOTAL AGRICULTURAL CENTRE & MURRUMBIDGE COLLEGE  
OF AGRICULTURE**

The average student costs at each college for the years 2000 to 2003 inclusive (copy attached) were prepared using the methodology developed and applied for the Review of the Agricultural Colleges within NSW Agriculture published March 2001 (copy attached).

The college review methodology was developed by the Registrars of both colleges in consultation with staff of the Management Accounting Unit (MAU) of the Finance & Administration Program to ensure a consistent and appropriate treatment of expenses.

The steps involved in the preparation of the costings include:

- All salaries expenditure and associated salary on costs were gathered (this included Consolidated Fund Salaries and Industry/Other funds). The staff included was as per the list in Appendix 5 of the "Review of the Agricultural Colleges within NSW Agriculture".
- All staff were listed on a spreadsheet. The time each spent on various functions was allocated in hours per week. Categories included Administration, Domestic, Educational comprising (Full-time, Part-time, Short Course, External), Farm, Other. The hours each officer spent on various functions was arrived at by consultation with Section Leaders who in turn discussed the times with their staff to arrive at a fair figure. When totalled the hours for each category was converted to a percentage of the total hours. This percentage was used to arrive at the salary cost by function.
- All operating costs were added together and any expenditure that was not considered part of the education or college operation was removed. At Total, we removed such things as Total Homestead Maintenance expenditure, payments to the CB Alexander Foundation and Advisory Office expenses. Since Consolidated and Industry fund expenditure is largely split by section or Function anyway these figures were reasonable easy to gather. ic Award Courses, Administration, Continuing Education etc). Section managers were asked to nominate the % of expenditure spent on each function. Where there were some mixed functions such as Farm and Assets expenditure was split in much the same way. From the information I have the costs included expenditure against Assets Cost Centres 1527, 1528, and 919 in order to ensure all expenditure was included.
- An allocation of \$100,000 Growth Fund Capital Equipment was treated as Full-time student expenditure.
- Income was gathered and split in much the same fashion as the last two points above. Income from Short Courses, Commonwealth Growth funds, By-Product Income Account, Student Fees and other external projects was split according to Full-time, Part-time etc.
- Management Accounting provided the depreciation figure, which together with the above process produced the figures contained in the "Review of the Agricultural Colleges within NSW Agriculture".
- MAU also reviewed these figures to ensure that a similar process was followed.

279-03

NB: The net cost referenced in Appendix 3 of the College Review for Total and Yanco (ie. \$1,085,276 and \$961,044 for Total & Yanco, respectively) was used to calculate the cost per student at both colleges over the years 2001 - 2003, inclusive, viz. the net cost for 2000 was divided by the number of students each year to arrive at the cost per student.

Ellen Howard  
Program Manager, Education & Training  
19 September 2003

279-03

Notes:

- 1 'External' at Total means home study students. At Yanco it means externally funded students eg ARTP, Horticulture, Quality Assurance
- 2 'Other' at Total includes the farm operation.
- 3 The student number figure is the number of participants. It is not a measure of lecturer workload, as different types of student require different levels of staff intervention, eg 1st year students have a higher level of lecturer input than Diploma students

## Appendix 7 Minutes of Meetings

### Minutes No 22

Tuesday 11 May 2004

Room 1108, Parliament House at 6.40pm

#### 1. Members present

Mr Cohen (Chair)

Mr West

Mr Colless

Mr West

Mr Tsang

Ms Hale

Mr Lynn

Ms Fazio for items 1-6(Griffin)

Mr Catanzariti for items 7-8(Griffin)

#### 2. Substitute members

The Chair informed the Committee that he had received written advice from the Government Whip that Ms Fazio would be substituting for Ms Griffin for the duration on the inquiry into the Hunter Economic Zone and the Tomalpin woodlands; and that Mr Catanzariti would be substituting for Ms Griffin for the duration of the inquiry into the Murrumbidgee College of Agriculture.

#### 3. Confirmation of Minutes No 21

Resolved, on the motion of Ms Fazio, that minutes No 21 be confirmed.

...

#### 7. Inquiry into the Murrumbidgee College of Agriculture

The Committee noted the resolution of the House of Wednesday 5 May 2004:

*1. That General Purpose Standing Committee No. 5 inquire into and report on the closure of residential training at the Murrumbidgee College of Agriculture and in particular:*

*(a) the process by which the decision was made to close the residential training,*

*(b) the community and industry consultation that preceded the announcement of the proposal,*

*(c) the impact on the Leeton and Yanco communities and district, and*

*(d) the reasons why Murrumbidgee and Tocal colleges have not been transferred to the Department of Education and Training.*

*2. That the Committee report by Thursday 23 September 2004.*

Resolved, on the motion of Mr Colless, that the Chair seek the leave of the House to extend the reporting date for the inquiry to Thursday 21 October 2004.

Resolved, on the motion of Mr Colless, that the title for the inquiry be the Inquiry into the Murrumbidgee College of Agriculture.

Resolved, on the motion of Mr Colless, that the closing date for submissions to the inquiry be Friday 11 June 2004.

Resolved, on the motion of Mr Colless, that the Chair be authorised to place advertisements calling for submissions in the Griffith Area News, Wagga Wagga Advertiser, Leeton Murrumbidgee Irrigator, The Land, Sunrasia Daily, and the West Wyalong Advocate.

Resolved, on the motion of Mr Colless, to conduct a public hearing at Parliament House on Monday 5 July 2004 and a site visit and public hearing at the Murrumbidgee College of Agriculture on either Monday 21 June or Friday 2 July.

Resolved, on the motion of Mr Tsang, that arrangements for the conduct of the public hearings and the site visit be left in the hands of the secretariat.

Resolved, on the motion of Mr Lynn, that Members would advise the secretariat of persons or organisations to whom should be sent invitations to make submissions to the inquiry.

**8. Adjournment**

The Committee adjourned at 7.35pm sine die.

Robert Stefanic

**7. Adjournment**

The Committee adjourned at 4.15pm *sine die*.

**Rachel Simpson**  
**Clerk to the Committee**

**Minutes No 33****Monday 18 October 2004****Room 1108 Parliament House at 11:00 am****2. Members Present**

Mr Ian Cohen (Chair)  
 Mr Tony Catanzariti  
 Mr Rick Colless  
 Ms Kayee Griffin  
 Ms Sylvia Hale  
 Mr Henry Tsang (to 12:15pm)  
 Hon Jan Burnswoods (from 12:15pm)

**3. Substitutions**

The Chair informed the Committee that he had received written advice from the Government Whip that Ms Burnswoods would be substituting for Mr Tsang from 12:15 pm for the duration of the deliberative meeting.

**4. Minutes**

Resolved on the motion of Mr Catanzariti that Minutes No 27 be confirmed.

**5. Correspondence**

The Committee noted the following correspondence received:

- 4 August 2004 - from Hon Ian Macdonald MLC, NSW Minister for Primary Industries, to the Chair, General Purpose Standing Committee No 5 on the subject of copies of correspondence between himself and the Minister for Education and Training.

The Committee noted the following correspondence sent:

- 12 July 2004 - from Ian Cohen MLC, Chair General Purpose Standing Committee No 5, to the Hon Ian Macdonald MLC, NSW Minister for Primary Industries requesting copies of correspondence between himself and the Minister for Education and Training.
- 12 July 2004 - from Ian Cohen MLC, Chair General Purpose Standing Committee No 5, to the Hon Andrew Refshauge MP, NSW Minister for Education and Training requesting copies of correspondence between himself and the Minister for Primary Industries.
- 28 July 2004 - from Ian Cohen MLC, Chair General Purpose Standing Committee No 5, to Mr John Hodgens, re invitation to visit to Tocal College.
- 8 September 2004 - from Ian Cohen MLC, Chair General Purpose Standing Committee No 5, to the Hon Ian Macdonald MLC, NSW Minister for Primary Industries requesting an explanation of the basis upon which the Minister considered the request for correspondence between himself and the Minister for Education and Training.

The Committee deliberated.

Resolved, on the motion of Mr Colless, that the Committee write to the Hon Andrew Refshauge MP, NSW Minister for Education and Training requesting a response to the Committee's letter of 12 July 2004, and send a follow-up letter to the Hon Ian Macdonald.

The Committee noted the following answers to Questions on Notice received:

- Hon Ian Macdonald MLC, Minister for Primary Industries
- Mr Ray Pluis, Leeton Shire Council
- Mr John Hodgens, Farmer
- Mr Adrian Piccoli MP, Member for Murrumbidgee
- Mr Alan Brown, NSW Farmers' Association
- Mr Ian Dunlop

The Committee deliberated.

Resolved, on the motion of Mr Colless, that responses to the Questions on Notice be made public and added as an attachment to the report.

The Committee noted the receipt of submissions 38 and 39.

Resolved, on the motion of Mr Colless, that all public submissions be published on the web.

## **6. Murrumbidgee College of Agriculture**

### **Chair's draft report**

The Chair tabled his draft report which, having been circulated, was taken as being read.

Chapter One read.

Chapter Two read.

Resolved, on the motion of Mr Colless, that, subject to the information being available from the Committee's evidence, an additional table (2.2) be created showing a breakdown of student contact hours and that if the breakdown into full time or part time hours is not available, a column be added to Table 2.1 showing the total contact hours.

Resolved, on the motion of Mr Tsang, that the following phrase be added at the end of paragraph 2.35

“ as a consequence of a community awareness campaign.”

Mr Colless moved a motion that the word “unfortunate” be changed to the word “regrettable” in paragraph 2.36, line 3.

Question put.

Ayes: Mr Colless  
Mr Cohen  
Ms Hale

Noes: Mr Tsang  
Ms Griffin  
Mr Tsang

Question resolved in the affirmative on the casting vote of the Chair.

Resolved, on the motion of Mr Colless, that a recommendation be inserted after Recommendation 3, that

“That the residential facilities remain intact and functional until such time as the working party examining the future of the College has completed its deliberations and reported.”

Resolved, on the motion of Mr Colless, that the Committee adjourn for thirty minutes to allow Mr Catanzariti to devise a suitable form of words to propose as an amendment to paragraph 3.10.

The Committee adjourned at 12:35pm.

The Committee resumed at 1:05pm.

Chapter Three read.

The Committee deliberated.

Resolved, on the motion of Mr Catanzariti, that paragraph 3.10 be amended by deletion of the words “superficial” and that the words “appear to have been” be replaced by “were”, and that a new paragraph 3.11 be inserted immediately after 3.10 which reads:

“Government members of the Committee believe that there is conflicting evidence as to the nature or level of consultation that occurred between the Department and the Advisory Council.”

Chapter Four read.

Chapter Five read.

The Chair indicated that his foreword would be circulated to Members of the Committee for approval to include in the report.

Resolved, on the motion of Mr Colless, that the report, as amended, be adopted.

Resolved, on the motion of Ms Hale, that the report be signed by the Chair and presented to the Clerk of the House on Thursday 21 October 2004 in accordance with the resolution establishing the Committee of 3 July 2003.

Resolved, on the motion of Ms Hale, that the Committee secretariat be authorised to make any grammatical or typographical changes to the report prior to tabling.

Resolved, on the motion of Ms Hale, that pursuant to the provisions of section 4 of the Parliamentary Papers (Supplementary Provisions) Act 1975 and under the authority of Standing Order 223, the Committee authorise the Clerk of the Committee to publish the report, correspondence, submissions and tabled documents, except for those for which confidentiality has been requested.

## **7. Adjournment**

The Committee adjourned at 1:45pm *sine die*.

**Rachel Simpson**  
Clerk to the Committee
