Importance: High

Hi Alex

AGL thanks the Committee for their time to appear before the Inquiry into Electricity Supply, Demand and Prices in NSW on Monday 18 June 2018. We have reviewed the documentation received following AGL's appearance. Please find attached and below:

- Transcript with AGL comments
- AGL answer to (1) Question on Notice from Hon. Adam Searle MLC
- AGL answer to (1) Supplementary Question from Hon. Paul Green MLC

Question on Notice

In New South Wales, what is the split between generation and sale and consumption?

Response

As at 30 June 2018, AGL's effective generation capacity in NSW totalled 4,555 MW (see table below). In FY17, AGL generated 24,442 GWh of which 18,799 GWh was supplied to meet AGL customer demand. An additional 4,643 GWh was sold to other market participants on substantially the same terms. AGL has an obligation through the Macquarie Generation acquisition process to provide a minimum 500 MW of Flat Swap to the NSW market, equivalent to 4,380 GWh per annum. Since 2014, AGL has consistently exceeded this amount.

During FY18, AGL made financial commitments to proceed with 100 MW turbine efficiency upgrades at Bayswater Power Station (approximately \$129 million) and up to \$390 million to develop a 252MW gas fired power station at Tomago, NSW.

Asset	Nameplate Capacity (MW)	Effective Capacity (MW)	Under Development (MW)	Fuel Type
Bayswater Power Station	2,640	2,640	100 MW Efficiency Upgrade	Black Coal
Liddell Power Station	2,000	1,680		Black Coal
Nyngan Solar Plant	102	102		Renewables – Solar
Broken Hill	53	53		Renewables – Solar
Silverton Wind Farm		26 (Currently)	200 MW	Renewables – Wind
NSW Hydro	54	54		Renewables - Hydro
Newcastle Gas Power Station			252 MW	Gas Power
Total	4,849	4555	552	

Supplementary Question

What components of a bill, if any, are exempt for people accessing hardship provisions?

Response

Customers participating in AGL's hardship program Staying Connected avoid incurring late payment fees associated with the debt while they are actively participating in the program and are exempt from paper bill and over the counter payment fees. These customers also have their energy supply maintained and are shielded from further collection activity. AGL ensures that upon

entering our Staying Connected program, customers receive a guaranteed discount instead of a conditional one (such as payment by direct debit or pay-on-time).

Feel free to contact us should you or the Committee require any further information.

Kind regards
Amer
