Early investigations

Early investigations are the first stage of the project. They involve identifying the project's location, route and key stations. This stage is essential for understanding the project's impact on the community and the environment.

Next steps

The Sydney Metro West project team will develop detailed planning and environmental assessment documents for further public consultation and community engagement.

Working with the community

Place managers

Sydney Metro is committed to working closely with affected landowners and tenants to ensure property acquisition is a smooth process. We will provide support and assistance throughout the process, including advice on relocation and compensation. Contact us at 1800 612 173 or sydneymetro@transport.nsw.gov.au

Property acquisition

Property acquisition is a complex process that involves identifying and acquiring land for the project. We will work closely with landowners to ensure a fair and transparent process. Contact us at 1800 612 173 or propertyacquisition.nsw.gov.au

A Sydney Metro community event.

The Sydney Metro West project team will develop detailed planning and environmental assessment documents for further public consultation and community engagement.

During the next few months, we will be conducting public consultations and community engagement activities. This includes public exhibitions, workshops, and online consultations. We will also hold a series of community drop-in sessions to provide an opportunity for the public to provide feedback on the project.
