Subject: Flammable Cladding - 300 Macquarie Street Liverpool

Rose,

Just FYI our Liverpool office has been identified as one that has flammable cladding fitted to its outer. The local management and HSR's are working through the issue, i.e to determine if any changes are required to emergency evacuation procedures etc.

I don't expect any issues but just so you are aware.

Tony/Lawrence,
See attached email trail below.
We have just been notified by the building managers that the Liverpool facility has potentially flammable cladding.
The RABSS, HSR's and Managers are looking to put in place a common sense approach, including a hazard report and appropriate controls.
Will keep you updated as this progresses.

kind regards,

Laurence Richey

Hi all,

As HSR I have asked Tony to raise a hazard report,

As a Warden, In terms of the evacuation of contractors, this would apply to workers carrying out work on the building - I believe our first step should be to make sure our ECO understand how this might affect what steps would need to be taken in the event of an emergency,

That way when staff are informed of the issue they will also know what is being done to ensure their safety,

Regards
Brian

Tony, I would recommend advising all Liverpool staff particularly given short term measure no. 5 which says **building contractors should evacuate immediately upon hearing the fire alarm**. Our staff's safety is paramount and they should be given this same message.

Regards
Jas

Hi Team Managers (apologies for the initial email – system error)?

Please see the attached – ‘Proposed Short Term Measures’ provided by the Property Manager yesterday (10/10/19)

I’m advised this morning that No schedule has been developed yet to implement these measures; as testing has only recently been conducted and results are pending.

At this stage I have only provided this information to Liverpool based Managers, CAS Director and HSR’s.

Regards

Subject: Fwd: 300 Macquarie Street Short Term Measures

Hi Tony,

Please find attached copy of Proposed Short Term Measures that need to be enforced until we have the composite panels replaced on the building.

Currently there are cladding panels that are on the building and are considered flammable. We advise that if these measures are not enforced, we are not covered under the insurance policy if a fire was to occur.

We appreciate your co-operation in this matter.

Thank you.

Regards,
