Re: Correction to transcript: Standing Committee on State Development – Uranium Mining and Nuclear Facilities (Prohibitions) Repeal Bill 2019

Dear Mr Martin,

In relation to the transcript of testimony of the Australian Radiation Protection and Nuclear Safety Agency, there is one error of fact that we wish to amend.

On page 58 of the transcript, it reads:

Mr GODFREY: Now that I think of it, there were some incidents in the early stages of commissioning. In particular, there was one issue with the fabrication of fuel elements in the early commissioning stages.

The phrase *'there was one issue with the fabrication of fuel elements in the early commissioning stages'* is incorrect. The incident actually happened in the late stages of commissioning, in the early stages of full power operation.

Yours sincerely

Ryan Hemsley

Director, Government and International Relations

Australian Radiation Protection and Nuclear Safety Agency
