

MUSEUM OF APPLIED ARTS AND SCIENCES

Document tendered by

MS JENNIFER SANDERS
Received by

ANDREW RATCHFORD
Date: 21/08/20
Resolved to publish Yes / No

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
SCIENCES AND TECHNOLOGY		
Agricultural Equipment	476	Farming and harvesting implements, machines, manuals and photographs related to the production of honey, wool, fruit, vegetables, grains, meat and dairy. <ul style="list-style-type: none"> McKay Sunshine stripper-harvester and reaper-binder, plus promotional models of the stripper-harvester and stump-jump plough.
Animal Samples and Products	4507	Unprocessed and processed materials of animal origin, including skins, oils, furs, bone and horn. Birds, fish, mammals and reptiles are represented. Many examples demonstrate stages in the transformation of raw materials into economically valuable products. <ul style="list-style-type: none"> <u>Bill Montgomery Wool Collection</u>: more than 5000 wool samples provide a snapshot of results of innovative breeding programs carried out by Australian wool growers during the 1800s. By transforming the tiny short-woolled Spanish Merino into a large, long-woolled animal, Australians saved the world's wool industry from being overtaken by cotton in the 1860s. It has been described as the single greatest re-engineering of an animal species in human history.
Arms and Armour	1221	Broad range of edged weapons and firearms from different eras and cultures. <ul style="list-style-type: none"> <u>Edged weapons</u>: includes Japanese Samurai swords, Malay swords and daggers and Javanese ceremonial kris. Japanese Samurai suits of armour: Bronze cannon from Borneo: dolphin ornamentation, 18th century Correspondence of Evelyn Owen: consists of 55 letters concerning the development and production of the Owen sub-machine gun. Many early letters are congratulatory; most concern royalties paid to Owen and his application for tax exemption. Correspondents include J.B. Chiffley and John Curtin.
Astronomy	169	Objects relating to and used at the Sydney Observatory from its commencement in 1859 until 1982, including telescopes and other astronomical equipment, scientific instruments and furniture <ul style="list-style-type: none"> <u>Schroeder telescope</u>: used to observe the 1874 Transit of Venus, still in place at Sydney Observatory. <u>Hilger multi-prism spectroscope</u>: one of the earliest instruments made by Hilger to measure the light spectra emitted by different stars. <u>Sydney Observatory Archive</u>: comprises ten books containing 4,591 pages of documents written primarily by

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
		<p>the Government Astronomers who founded the Observatory: <u>William Scott (1825-1917)</u>, who held the position from 1858 to 1862; <u>George Roberts Smalley (1822-1870)</u>, from 1864 to 1870; and <u>Henry Chamberlain Russell (1836-1907)</u>, from 1870 to 1905.</p>
Audio and Visual Equipment	2065	<ul style="list-style-type: none"> • <u>Transistor Radio collection</u>: complete set with boxes of first transistor radio designed by <u>Painter, Teague & Petertii</u>; design recognised by Industrial Design Society of New York and, in 1955, included in American Art & Design Exhibition in Paris. • <u>Televitions</u>: from earliest production and representative example of all advances in the technology • <u>John Logie Baird material</u>: early Televisor, 1940s Baird portable TV, and a set of 40 lantern slides used by Baird to illustrate a lecture on the development of TV that he presented in Sydney in 1938. • <u>Essential oil extracts from native Australian plants</u>: including eucalyptus and melaleuca species, accompanied by Museum staff publications produced at the time when the Museum was a scientific research organisation.
Botanical Specimens	5284	
Building Equipment and Materials	666	<ul style="list-style-type: none"> • <u>W.E. Pennings archive re his building trades apprenticeship</u>: relating to technical education of building trades apprenticeship of <u>Wilfred Edward Pennings (b. 1917)</u>, a carpenter and teacher of carpentry; the archive includes reports and certificates from the Junior Technical School, Rozelle, Sydney Technical College and the Master Builders Association of NSW. • <u>Wunderlich collection of drawings, catalogues, photographs and building materials including pressed metal ceiling panels and decorative columns</u>
Calculating Instruments	712	<ul style="list-style-type: none"> • <u>Babbage Difference Engine (part)</u>: significant collection of <u>Babbage's letters and personal documents</u>. • <u>Automated totes and totalisator material</u>: the world's best, Australia once had a large industry, making totalisators for international racetrack betting. • <u>Automatic Totalisators Limited Archive</u>: 36 records of the company, established in 1917 by <u>George Julius to manufacture, install and operate totalisator systems throughout the world</u>. The archive contains records and photographs dating from between 1919 and 1974. The Museum also holds a model of the totalisator designed by Sir <u>George Julius</u> and some parts and other equipment manufactured by <u>Automatic Totalisators Limited</u>. • <u>Roy Wells Totalisator Archive</u>: 1926-1985 archive of the inventor of the automatic logarithmic odds calculator.
Chemical Samples	1253	Samples relating to many industries, including examples of all the stages in adding value to raw materials mined in Australia.
Clocks and Watches	402	<ul style="list-style-type: none"> • <u>William Bradshaw clock and watch collection</u>: contains over 100 rare and exemplary items from the 17th to 19th centuries • <u>Earnshaw chronometer used by Matthew Flinders on his circumnavigation of Australia</u>.
Computers	236	Representative collection including the early SILIAC, the first generation of Apple Macintosh, parts of Turing's Bombe code-breaking computer used at Bletchely Park.

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
Electronics	1310	<ul style="list-style-type: none"> Allan Bromley Collection: over 570 objects relate to the history and development of computing and other information technology assembled by Assoc Professor Allan Bromley of Sydney University, comprising calculators, mechanical and electronic analogue computers, computer components, kit computers, education computers, and associated ephemera. A unique and thorough survey collection, one of the best in the world.
Engines	345	<p>A world-leading collection including several rare, and a good range of representative, examples of steam, internal combustion and hot air engines made in Britain, Europe, USA and Australia.</p> <ul style="list-style-type: none"> Maudslay beam engine: built in England and ran a flour mill and brewery at Goulburn in NSW. It is the only existing engine of its type made by the company founded by the father of British precision engineering, Henry Maudslay. It is on display at the Powerhouse and runs regularly on steam Otto and Langen gas engine: an example of the first commercially successful internal combustion engine. One of only four in existence, it is on display at the Powerhouse Discovery Centre Halliday oscillating engine: a rare surviving steam engine made in Sydney. The engine was made by a company that was founded by Charles Halliday in the 1850s. It is on display at the Powerhouse and runs regularly on steam. Daimler petrol engine: rare example of an early high-speed engine made by the company that introduced petrol as a fuel and made the first practical internal combustion motor car engine. Boulton and Watt engine: was built in England and played a key role in the development of the modern world. It was one of the earliest rotative (wheel-turning) steam engines ever built and is the oldest in existence. It is on display at the Powerhouse and works regularly under steam.
Food and Drink	646	<p>Food processing equipment and packaging that reflects change in the way food is stored and presented.</p> <p>Set of flour-milling machinery: from millstones, rollers and a grain bucket elevator to a flour packer, stitching machine and stencils.</p>
Health and Medical Equipment	1619	<ul style="list-style-type: none"> Royal Australasian College of Radiologists - Robert Bennett radiology collection: a range of X-ray machines and supporting archival material. Menstruation collection: sanitary towels and tampons, pharmaceuticals to relieve the discomforts of the monthly 'period', and guidance booklets about puberty for adolescents and their parents. In the Museum's Research Library are magazines whose advertisements document evolution in the manufacture and marketing of menstrual products since the late 1800s. Seep technology: devices to treat sleep apnoea, invented by Colin Sullivan and made in Sydney, Compumedics portable sleep analyser made in Melbourne. Both respirator, a variant of the iron lung made in Australia, which saved the lives of many polio patients. Ultrasonics Institute collection: early ultrasound machine made in Sydney, with associated research material from

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
Industrial Machinery and Equipment	1094	<ul style="list-style-type: none"> the project that made this technique useful for medical diagnosis. <u>Cochlear collection</u>: a series of cochlear implants and processors, invented by Graeme Clark and made in Sydney and Melbourne. <u>Rare lathes</u> made by Holtzapffel, Henry Maudslay and Joseph Whitworth. <u>Standfield mousetrap making machines</u>, traps and archive relating to Sydney-based manufacturer of Supreme mousetraps. <u>Bayram Ali photographic archive re Snowy Mountains Scheme</u>: primarily consists of processed negative film, prints and slides of work, community and leisure activities engaged in and observed by Snowy Mountains Authority worker Bayram Ali at Adaminaby / Eucumbene Dam, Cabramurra, Canberra, Cooma, Eaglehawk, Jindabyne and various other camp and work sites around Snowy Mountains scheme. <u>Sydney Harbour Bridge collection</u>: material samples, girder used to test material strength, model of testing machine, model girders and hangers, and several reports of testing work.
Material Technology	665	A wide range of instruments and devices, complemented by metrology standards for mass, length and volume from colonial times to the mid-twentieth century.
Measuring Instruments	567	<ul style="list-style-type: none"> <u>Engine indicators</u>, including one used on board the famous ship the Great Eastern.
Medicines	116	<ul style="list-style-type: none"> <u>Potions, powders, pills and salves</u> that were prescribed to or purchased over-the-counter by Australians from 1860 onwards. <u>Preserved specimens of Penicillin mould</u> from the laboratories of Howard Florey in 1944. Penicillin revolutionised the way humans treated bacterial infections.
Mineral Samples - Geological	7654	Large early collection.
Models	2036	<p>From its inception in the 1880s the Powerhouse Museum has collected ship, mechanical, medical and railway models. The collection also features a growing collection of architectural models.</p> <ul style="list-style-type: none"> <u>Aircraft models</u>: models of different aircraft such as those used during both World Wars, examples of early flight technology, models of aircraft used by famous aviators such as Nancy Bird Walton and more modern passenger aircraft such as a Qantas 747. Ranging in date from around 1920s to 1990s. <u>A A Stewart engine models</u>: world-class collection with particular strength in marine steam engine models <u>Sydney Opera House models</u>: includes the wooden wind tunnel test model, a sectioned one that dramatically reveals interior details, and a spherical model that demonstrates the geometry of the sails. <u>Botanical models</u>: some by well-known European makers, others (of Australian plants) made in Sydney. <u>Anatomical models</u>: includes some made by the early French maker Dr Auzoux
Packaging	599	

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
Personal Effects	1497	
Philately	601	Large collection that includes Crome and Vickery philately collections, significant first day covers and early airmail
Photographic Equipment	641	<ul style="list-style-type: none"> • <u>Kodak camera collection</u>: includes examples of camera design from first Brownie through to the 1970s Polaroid
Photographs		<ul style="list-style-type: none"> • <u>Clyde Engineering photographic collection</u>: consists of about 3000 images dating from 1895 to 1950, many of which are glass plate negatives. They document the activities and output of the Clyde Engineering Works which was, in its time, the largest engineering enterprise in NSW. • <u>Bayram Ali photographic archive re Snowy Mountains Scheme</u>: primarily consists of processed negative film, prints and slides of work, community and leisure activities engaged in and observed by Snowy Mountains Authority worker Bayram Ali at Adaminaby / Eucumbene Dam, Cabramurra, Canberra, Cooma, Eaglehawk, Jindabyne and various other camp and work sites around Snowy Mountains scheme. • <u>Sydney Opera House construction</u>: 179 photographs by Max Dupain.
Plastics Technology	366	The early industrial plastics collection is one of the best in the world. It demonstrates stages in manufacture of numerous plastics. The introduction of synthetic plastics in 1907 shaped the world Australians live in today.
Postal Equipment	188	
Power Technology	103	<ul style="list-style-type: none"> • <u>First electric light used in Sydney</u>: arc lamp made in Australia. • <u>Switch and key that turned on Pyrmont Power Station in 1904.</u> • <u>De Meritens generator, switch board and arc lamp</u>: key components of the early electric system installed at Macquarie Lighthouse in Sydney in 1883. The arc lamp was used with a Fresnel lens to throw light seventy miles out to sea. • <u>Photovoltaic collection</u>: solar cells and panels, with emphasis on the very successful research program led by Martin Green at UNSW.
Product Design	?	<p>Examples of product design as well as drawings, design models and prototypes that help document the process of design</p> <ul style="list-style-type: none"> • <u>Australian Design Awards Collection</u>: The Powerhouse Museum is building the country's first collection of contemporary product design selected from the prestigious Australian Design Awards. There are approximately 100 design objects in this collection dating from 1992. • <u>Victa Lawnmower Collection</u>: objects relating to Mervyn Victor Richardson and the Victa company. It includes lawnmowers, the first dating from 1952, as well as promotional material such as signs and pamphlets.
Recreational and Sporting Equipment	764	
Scientific	584	Includes atomic absorption spectrophotometer, an important instrument invented in Australia, and a group of early flame

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
Instruments		<p>isonation detectors, important ancillary devices invented in Australia.</p> <ul style="list-style-type: none"> Governor Brisbane's book and scientific instrument collection: includes some of the earliest and most significant instruments brought to Australia; the book collection consists of rare annotated scientific volumes dating back to the 1600s.
Space Technology	104	<p>The only active museum collection of space science and technology in Australia. While the collection is small, it includes unique examples of Australian space science instruments, such as the "Aggregation of Red Cells" experiment that flew twice aboard the Space Shuttle and back-up hardware for the Advanced Along Track Scanning Radiometer, flown on the European ERS-1 satellite, and rocket components recovered from the Woomera Rocket Range. Includes examples of the space technology of the three major spacefaring nations: the United States, USSR/Russia and the People's Republic of China.</p> <ul style="list-style-type: none"> E.A and V.I. Crome Aviation and Space Philately Collection: extensive collection includes ephemera and memorabilia. The aviation collection includes rare airmails flown on many historic pioneering flights, such as the first official air mail flight between Melbourne and Sydney and those of Sir Charles Kingsford-Smith, and materials relating to significant Australian aviation pioneers. Space philately collection includes rare astronaut and cosmonaut autographs, Apollo lunar program ephemera, and a unique set of first day covers from Australian space tracking facilities.
Telecommunications	421	Telegraph senders and receivers, plus telephones of many styles. Flying Doctor transceivers and a pedal generator.
Textile Technology	2753	Hand and power looms, jacquard mechanism, spinning wheels, reels, cotton gin, shuttles
Timber Samples	3385	<ul style="list-style-type: none"> Native Australian plant specimens: emphasis is on the timbers' suitability for use in industrial applications, from making windmill bearings to the finest furniture. Many of the samples have been shaped to demonstrate progressive stages of manufacture. About 500 samples
Tools	1093	Tools related to various trades, including carpenter, cooper, blacksmith and tinsmith.
Transport - Air	685	<p>The aero engine collection is of international significance and can be favourably compared with the collections of the Science Museum in London and the National Air and Space Museum in Washington. It is particularly strong in World War I vintage engines and one, the 1918 Galloway Atlantic, is the only existing example.</p> <ul style="list-style-type: none"> Catalina flying boat. Genairco plane and Cropmaster: significant individual aeroplanes Aero engine collection: particularly strong in World War I vintage engines; the 1918 Galloway Atlantic is the only existing example of its type. Charles Kingsford Smith and Charlie Ulm collections: objects include some from the original Southern Cross. Australian Aviatrix Collection: items from Lores Bonney and Nancy Bird, two of Australia's earliest and foremost women pilots. Including Lores Bonney aviation archive and collection of memorabilia, personal papers and memorabilia relating to the life of pioneer aviatrix Delores Bonney (1897-1994)

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
		<ul style="list-style-type: none"> • <u>Lawrence Hargrave Collection</u>: dated between 1865 and 1915, comprises models, sketches, diaries and archive of early pioneering aviator Lawrence Hargrave who emigrated from England to Sydney, Australia in 1865. He paved the way towards the first powered flight, achieved by the Wright Brothers in 1903. This collection is listed on UNESCO's Australian Memory of the World project. • <u>William Hudson Shaw's Lawrence Hargrave Archive</u>: papers created or collected by Shaw while conducting biographical research on Lawrence Hargrave, dating from 1856 to 1977. • <u>Arthur Butler Aviation Archive</u>: personal papers of Arthur Butler (1902-1980) and records of his company Butler Air Transport established in 1934.
Transport - Land	1159	<p>The land transport collection contains locomotives, cars, buses, trams, horse-drawn vehicles and a range of bicycles and motorcycles.</p> <ul style="list-style-type: none"> • <u>Locomotive No 1</u>: the first passenger train in NSW. It is an extraordinary example of second generation British railway engineering, very little of which is preserved in the United Kingdom. It is of high significance in international engineering heritage terms. • <u>Goggomobil Dart</u>: Bill Buckle designed and made the body of this car in Sydney. • <u>Arthur H Gillott Pty Ltd Transport Archive</u>: An archival collection relating to the Sydney based transport services of Arthur H Gillott Pty Ltd, which included the St Ives Bus Service, Pymble St Ives Hire Cars and Highway Haulage Pty Ltd dating from 1935 to 1998. 86 records. • <u>Electric cars</u>: includes an early Detroit, later experimental vehicles, and a recent Honda Insight petrol-electric hybrid. • <u>Ice Bird</u>: single masted sloop used for the first solo sail to the Antarctic by Dr David Lewis in 1972-74.
Transport - Water	378	
Tropics and Awards	241	
Writing and Printing Equipment	695	<ul style="list-style-type: none"> • <u>Bombala Times Archive</u>: newspaper publishing and job printing records for the Bombala Times, Bombala, New South Wales, 1903-1987 • <u>FT Wimble and Co Ltd Collection</u>: records of Australian manufacturers of printing ink and distributors of printing machinery, based in Sydney from 1803 to 1994.
DECORATIVE ARTS, DESIGN AND SOCIAL HISTORY		
Archaeology - Ancient	324	<p>The Museum has collected antiquities since its earliest days. The collection consists of ceramics, glass and other media spanning the world but with a focus on Britain, Western Asia, and some from China. Antiquities show the longevity of techniques as well as stylistic development of decoration and form. Collecting has been mainly opportunistic through gifts and occasional purchase. Individual items include some fine Greek red and black-figure vessels, as well as Italian Etruscan and Gnathian vessels.</p>

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
		<ul style="list-style-type: none"> • <u>Ancient Egyptian</u>: Opportunistic selection of faience amulets, moulded earthenware figures on Hellenic-Egyptian era and bronze amulets acquired, as with the other antiquities, to reference ancient technology and its development. Mainly dating to the 8th C BC to Roman periods. • <u>Colchester Roman-British Collection</u>: a pottery gift in 1907 • <u>Guildhall Collection</u>: a gift of Roman-British antiquities showing daily life in London • <u>Ur Collection</u>: range of pottery from Sir Leonard Woolley's excavations of the 1920s from Ur in Iraq • <u>Cypriot Collection</u>: includes 80 glazed Byzantine-style bowls from Mediaeval Cyprus and a tomb group of terracottas.
Archaeology - Modern	80	<ul style="list-style-type: none"> • <u>Irawang, Raymond Terrace</u>: Selection of rare complete vessels and sherds from Judy Birmingham and Kevin Fahy's Sydney Uni excavations at James King's early pottery c1830s to 50s. Irawang also has the distinction of being the first controlled historical archaeological excavation in Australia. Early 19th C potteries. • <u>Observatory</u>: Successive excavations at the Sydney Observatory site have resulted in collections of archaeological material <u>spanning the s</u>ays from its use as a fort to its later use as a Museum in the MAAS group. • <u>Cyril Ruwald Collection</u>: consists of 1424 architectural plans and drawings including: diazo prints, pencil and ink drawings, blueprints, negative photo-prints, and monochrome photographs
Architecture/Interior Decoration and Fittings	807	<p>A range of architectural and industrial ceramics (mainly terracotta), plaster moulds, pressed metal, linoleums and wallpapers, cast metal door and window furniture, ornamental glass and timber, photographic records</p> <ul style="list-style-type: none"> • <u>Wunderlich Collection</u>: extensive holdings of catalogues, building materials including pressed metal plates and pillars, tools and design stock books produced by this Sydney company • <u>Shannon Roof Tile Company Archive</u>: tile and brick manufacturing records, Shannons Roof Tile Co, Australia, 1928-1982. • <u>Sidney Warden Collection</u>: contains photographs, drawings and journals relating to Warden's designs for Tooth hotels in Sydney and New South Wales from 1920s to 1950s. • <u>Soft furnishings</u>: textile lengths and swatchbooks, including Annan Fabrics, Frances Burke, Modernage and Ascraft collections.
Australian Collections	1000 plus	<ul style="list-style-type: none"> • <u>Designs and motifs from Australian plants and animals</u>: objects vary greatly and date from early 1800s to present day, from a superbly crafted gold and silver inkstand to mass produced pressed glass dishes and from detailed botanical illustrations on teacups to stylized cutlery; includes ceramics, glassware, jewellery, textiles and woodwork, designs by Lucien Henry from the unpublished book 'Australian Decorative Arts'; stamped metal panels from the Wunderlich collection. • <u>Royal Australian Historical Society Collection</u>: includes convict caps, Marsden clothing collection, engraved Aboriginal breast plates 1840s, Federation porcelain ware, Mawson Antarctic exploration collection, Jasperware portraits of colonial figures, convict pardon, gold-cradle used by Hargraves,

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
Automata and Mechanical Musical Instruments	134	<p>Dunbar relics. Henry Parkes objects, colonial military memorabilia owned by Captain Steel, Julia Stewart jewellery collection</p> <p>Nationally significant with examples dating from 1700s.</p> <ul style="list-style-type: none"> • Mastertouch Collection (1919-2005) comprising master rolls and stencils, roll making machinery and keyboard collection of mainly player pianos, archives and promotional materials. Mastertouch was based in Sydney and the last large scale manufacturer of piano rolls in the world using a traditional process.
Books	1668	<p>Technical manuals, children's books, scrapbooks, photograph albums, job books, swatch and sample books, designed books, comics, sketch books, magazines, catalogues, comics and journals, pertaining to all collection areas. There is also the Museum's rare book collection.</p> <ul style="list-style-type: none"> • Florence Broadhurst Collection: wallpaper sample book collection • 'Illustrations of China and its People': volumes 1 to 4 of the publication, 'Illustrations of China and Its People: A series of Two Hundred Photographs with Letterpress Descriptive of Places and People Represented', by John Thomson FRGS, published by Sampson Low, Marston, Low and Searte, Chiswick Press, printed by Whittingham and Wilkins, London, England, 1873-1874
Ceramics	7565	<p>Large and important collection of European ceramics ranging from antiquities and medieval tiles to recent studio production; complemented by Australian holdings with strengths in late 19th century pottery and commercial post 1945 studio ceramics, and by Asian ceramics, particularly Chinese and Southeast Asian trade vessels.</p> <ul style="list-style-type: none"> • <u>The Doulton Ceramics Collection</u>: over 1000 objects dating from 1879 to today, this is one of the world's most significant collections; includes many rare, unique and experimental pieces; also designs with Australian themes made for the Australian market, beginning with the 'Australian Flora' series by Sydney botanical illustrator Helena Forde in 1879. • <u>Worcester porcelain collection</u>: around 90 pieces purchased by the museum in 1882 • <u>18th - 19th century English Ceramics</u> : works by Wedgwood, Minton and other leading English manufactories; includes an important selection of Rococo porcelains and Neoclassical Wedgwoods • <u>Minton Peacock Conservatory Ornament</u>: a large and innovative majolica sculpture designed for display in international world expos, including that in Melbourne in 1882. • <u>Meissen bust of Baron Schmedel</u>: modelled by J J Kändler in Germany in 1739, this tour-de-force of early European porcelain is one of only three remaining in the world. • <u>Islamic Tiles and vessels</u>: small selection of Islamic tiles encompassing Diyarbakir in Turkey, Damascus and Aleppo in Syria and a some tiles from Iran (Persia) and Afghanistan. The stand-out in the selection is a partial Iznik tile from the Ayub Ansari in Istanbul. • <u>Australian and international studio ceramics</u>: large selection of studio ceramics, especially Australian; includes Emily and Eric Bryce Carter, Les Blakebrough, Peter Rushforth, Allan Lowe, Shiga Shigeo, Merric Boyd, David

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
		<p>and Hermia Boyd, Derek Smith, Milton Moon, Mollie Douglas, Janet Mansfield, Alan Peascood, Peter Travis, Tom Sanders, Lucie Rie and Hans Coper, Margaret Tuckson, William Ricketts, Reg Preston, Greg Daly, Thancouple, Patsy Hely, Jenny Orchard, Margret Dodd, and, most recently, Penny Byrne.</p> <ul style="list-style-type: none"> • <u>Leslie M and Janice M Haynes Indigenous Potters' Collection</u>: earthenware and stoneware pots made between 1967 and 1974 by indigenous potters training at the Ceramics Research Unit at Bagot, near Darwin. • <u>Australian Commercial Potteries</u>: rich in commercial potteries spanning the late 19th C to the 1960s; companies from all over Australia but most comprehensive for NSW; includes Fowler, Bennett, Bosely, Ksofer's Premier, Bendigo, Mayland's (Holford), Hindmarch, John Campbells, Mashmans, Remued, Bakewells, Diana and Pates. • <u>China Painting (mainly 1920s to 50s)</u>: exclusively practised by women who decorated ceramic blanks from a variety of makers in designs that echoed regional and period interests of an era. Gladys Reynell, Fly Hubble, Olive Nock, Muriel Cornish, Flora Landells, May Jons, Lorraine Ellis, Jessie Moore, Ethel Warburton, Maida Wright and R Mann have become very famous for their art and their role in promoting women's art in Arts and Crafts. • <u>Early Southeast Asian and Chinese trade ceramics</u>: 14th-18th century, mainly from Vietnam and Thailand, includes Mal Maloney and Alastair Morrison collections. • <u>Chinese and Japanese ceramics</u> : Song and Ming, seto ware and trade wares • <u>Belleek Pottery Collection and Archive</u>: includes cups and saucers, dishes and jugs; the archive consists of papers relating to Robert William Armstrong of Belleek Pottery Ltd, Fermanagh, Ireland, 1860-1882.
Ceremonial Objects	336	<p>Collection reflects spiritual practice and includes priests' vestments, prayer beads, ritual objects and figurines, large temple shrines and small portable shrines.</p> <ul style="list-style-type: none"> • <u>Ecclesiastical vestment</u>: brocade dalmatics • <u>Buddhist, Hindu and Jain figurines</u>: intended for use as household deities • <u>Burmese and Japanese shrines</u> • <u>Korean ritual bell</u>: • <u>Australian communion cup</u>: by Hendrik Forster for St Patrick's Cathedral, Parramatta
Decorative Metalwork	1445	<p>Range of works by Australian silversmiths and goldsmiths in NSW, Victoria, South Australia and Western Australia; including elaborate 19th C Australian eperignes, presentation pieces, trophies and cups by artists such as William Kerr, Hogarth & Erichsen, Julius Schomburgk, William Edwards, Evan Jones, JM Wendt, and Henry Steiner. Collection also includes non-European examples.</p> <ul style="list-style-type: none"> • <u>William Kerr cricket trophy</u>: made in Sydney in 1878 • <u>Gold 1871 Sydney cup</u>: made by Christian Qwist • <u>Tableware</u>: silver and EPNS (electroplated nickel silver) tableware, trophies, napkin rings and spoons made and/or used in Australia mostly between the 1890s and 1950s; includes fine early 19th C spoons by Alexander Dick. • <u>Tsuba Collection</u>: approximately 500 Japanese sword guards, dated 1600s to early 1900s.

Collection	Size: numbers reflect object records; actual number of individual items approx 400,000	Highlights
Decorative Woodwork	532	<p>Consists of decorative woodwork and wood from a variety of cultures around the world as well as products made from Australian timbers. Identifies applied skills such as turning, carving, decorative inlay, marquetry & poker work. Some cross over with furniture collection.</p> <ul style="list-style-type: none"> • <u>Sydney International Exhibition 1879 exhibits</u> • <u>Decorative furniture</u>: including James Lennox armchair, Egyptian Revival suite, Gillow & Co cabinet on stand • <u>Australian poker work collection</u>.
Design Archives	?	<ul style="list-style-type: none"> • <u>Fred Ward Design Archive</u>: created by and relating to the Australian designer Fred Ward, from 1947 to 1988. • <u>Dahl and Geoffrey Collings Design Archive</u>: contains work and correspondence by the commercial and industrial designers Dahl and Geoffrey Collings who played a vital role in introducing Australian industry to modernism. This archive contains examples of the commercial artwork they created while in London 1935-39; Dahl Collings' work for the Orient Line 1938-60; costume designs for the film 'Eureka Stockade'; examples of work while in New York 1950-53; and advertisements and magazine layouts they created in Sydney during the 1940s. • <u>Gordon Andrews Design Archive</u>: including designs for the Australian decimal banknotes • <u>Douglas Annand Design Archive</u>: Douglas Annand (1903-1976) was one of Australia's most outstanding designers. His major clients included Qantas, David Jones, Mobil, P&O Orient Line, C.S.R., Universities of Melbourne and New South Wales, Bank of Adelaide and Sydney Ure Smith. This collection provides a comprehensive record of Douglas Annand's work over a period of more than forty years with all of the major and most of the lesser commissions and projects included, such as the Royal Visit decorations. • <u>Max Forbes Design Archive</u>: industrial and exhibition design by Max Forbes, London/Melbourne, 1948-1989 • <u>Margaret Lord Design Archive</u>: photographs, diaries, books and publications relating to the design work and life of Sydney-based interior designer Margaret Lord, dating from 1930 to 1975 • <u>Frank Mitchell Fashion Design Archive</u>: printed material including newspapers, photographs, labels and magazines, relating to Australian fashion designer Frank Mitchell, 1949-1978: fashion parades (1949-56), theatre programmes (1957-59), correspondence received (1949-63), newspaper and magazine articles (1945-78), photographs (c.1949-78), miscellaneous material (c.1879-1980), and cardboard display sheets (c.1957-58). 226 items.
Didactic Displays	904	<p>Many were originally created for exhibition when the Museum's mandate was to support the technical education of young Australians; include glass manufacture, needlework, fishing hooks, cotton manufacture, horn spoon making, button making - generally outlining late 19th and early 20th century technologies.</p>
Documents	3032	<p>Diverse range relevant to and contextualising many of the collection areas; includes manuals and design guidelines, letters, contracts etc</p>
