

Answers to the QoNs – WHTBL Inquiry 27 September 2021

Glenn Snow / David Gainsford

Department of Planning, Industry and Environment

Assessment & Systems Performance

Page 15 of the transcript –

Recent transport projects, including motorway projects, include conditions that relate to the offsetting of tree impacts. These offset requirements are informed by the project specific environment and government policy, such as the Sydney Green Grid, and require the proponent to deliver a net increase in trees. A 2 for 1 ratio was included for the Western Harbour Tunnel and Warringah Freeway project, the Sydney Metro West - Concept and Stage 1 project, the M12 Motorway project and the Sydney Metro Western Sydney Airport project.
