**Analysis of footing and sand foreseen for use in the new indoor and outdoor arenas at SIEC**

Dear Sirs,

OTTO Sport International has analysed and tested six random samples taken from the OTTO-ArenaTex Footing supplied to SIEC in November 2017 and foreseen for use as footing in the new Ebb&Flow indoor arena at SIEC as well as six random samples taken from the sand which will be mixed with the OTTO-ArenaTex-additive and which is foreseen for use as footing in the new Ebb&Flow outdoor arena as well as for integrating the footing in the new Ebb&Flow indoor arena.

Our laboratory tests performed confirmed that each of the twelve samples features excellent quality characteristics meeting OTTO Sport's quality requirements and allowing for World Class surface conditions for the equestrian sport.

Yours sincerely

Wolfgang Otto  
Chief Executive Officer
