1 IN 1000 YEAR FLOOD LEVEL

1988 (City of Parramatta highest recorded flood level)

FEBRUARY 2020

FEBRUARY 2022 and MARCH 2021

An architectural rendering of the Powerhouse Parramatta building, a modern structure with a complex, white, lattice-like facade. The building is set against a dark, blue-tinted sky. In the foreground, there is a landscaped area with several trees and a grassy slope. Overlaid on the image are four horizontal white lines representing different flood levels. The top line is labeled '1 IN 1000 YEAR FLOOD LEVEL'. The second line is labeled '1988 (City of Parramatta highest recorded flood level)'. The third line is labeled 'FEBRUARY 2020'. The bottom line is labeled 'FEBRUARY 2022 and MARCH 2021'. The building's facade is composed of a grid of white, diamond-shaped lattice structures, with large glass windows interspersed. The overall scene is illuminated with a cool, blue light, suggesting dusk or dawn.
