

20 October 2023

Dear Chair

Please find the below answers in response to questions taken on notice and supplementary questions addressed to Sydney Water following the hearing of 6 September 2023. Please note that some questions required the use of attachments to present data. These answers refer to specific attachments that accompany this response.

Questions taken on notice:

1. How many people are currently Sydney Water contractors? And how many are currently Sydney Water consultants?

Answer: In September 2023, the number of contractors/consultants were:

Contractors (agency hire) – 194

Professional Service Contractors – 367

Regional Development Consortia (from work order numbers) – 311

Definitions for each of these groups are:

Contractors (agency hire) – Individual workers who are temporary or project based, engaged via recruitment agencies to provide labour for Sydney Water.

Professional Service Contractors – Workers who are temporary from a firm engaged to perform a specialised or project-based service with key deliverables. The firm provides advice or has a task/outcome defined by Sydney Water at the outset.

Regional Development Consortia (RDC) – Three RDCs which are joint ventures, deliver water solutions in the areas of design, construction, maintenance and facilities management.

2. How many contractors worked at Sydney Water in Financial Year 22.

Answer: In June 2022, the number of contractors/consultants were:

Contractors (agency hire) – 227

Professional Service Contractors – 377

Regional Development Consortia (from work order numbers) – 311

- 3. Over past three years, list of all projects in which Sydney Water has engaged outside contractors. Include details on what they are, how Sydney Water undertook them and how many people were engaged. Please also clarify whether Roch Cheroux has any past or current relationships with any of the providers from the above list.**

Answer: Please refer to the attached document titled "Question on notice 3 Answer".

- 4. Currently, how many Professional Service Contractors are there?**

Answer: There were 367 in September 2023.

- 5. Please provide more details on the \$256,000 engagement to Bowery Consulting for optional analysis for various projects.**

Answer: Bowery Consulting is providing cost estimation and validation services for a range of Sydney Water projects. The advice is used for informing budget, contingencies and in-tender processes as pre-tender estimates for market comparison. Bowery Consulting was engaged to:

- Assist in the review of the Regional Delivery Contractor proposal for the Austral & Leppington Package 2 Works including assistance with the negotiation of the Target Outturn Cost Estimate for the project
- Develop a risk-based cost estimate for recycled water and stormwater in Mamre Road Precinct
- Provide desalination options costing.

- 6. Provide information that is given to NSW Treasury per the AE codes regarding consultant and contractor expenses.**

Answer: Please refer to the attached document titled "Question on notice 6 Answer".

- 7. Provide information on works conducted by Suez over the past 10 years.**

Answer: Please refer to the attached document titled "Question on notice 7 Answer".

- 8. Please clarify why there are discrepancies on Note 21 of the Financial Statement (page 61) between c. \$1.3 million and the Consultants Engagements table (page 118) c. \$1.6 million for FY21. Please also clarify similar discrepancies for FY20 and FY17.**

Answer: The figures were finalised after the audited Financial Statements were further reviewed. In FY17, FY20, and FY21 there were amendments made to the figures in the annual reports for matters that were identified after signing of the Financial Statements.

9. Provide the Conflict-of-Interest processes.

Answer: There is an annual attestation process conducted each July whereby the Managing Director, General Managers, Heads of Business and any high-risk areas are asked to declare information regarding Conflicts of Interest, Personal Interests and Gifts and Benefits. This covers around 540 roles per year. When new staff are onboarded, they must complete a Conflict of Interest e-learning summary and a Conflict of Interest Declaration. In addition, during any procurement process involving a competitive process, the chair of the tender evaluation committee will ask all participants to declare any conflicts. All external contractors must complete a Confidentiality Deed and Conflict of Interest Declaration.

10. Provide the project scope for the engagements completed by Nine Squared and Sense Strategy in FY22.

Answer: Nine Squared Pty Ltd was engaged for the shaping and review of the strategic options business case for the Malabar system. Sense Strategy Consulting Pty Ltd was engaged for the shaping and review of the strategic options business case for the Greater Parramatta and Peninsula project as well as the shaping and review of the Bondi System and Mamre Stormwater business cases.

11. Provide a list of capital projects since 2019.

Answer: Please refer to the attached document titled "Question on notice 11 Answer".

12. Provide a list of maintenance projects since 2019.

Answer: Please refer to the attached document titled "Question on notice 12 Answer".

13. Provide a list of senior executive and their positions.

Answer: A list of the Sydney Water Executive Team is publicly available on its website – <https://www.sydneywater.com.au/about-us/our-people/who-we-are/executive-team.html>

14. Is there a criterion for selecting consultants to engage in work that is related to First Nations people and Aboriginal Cultural Heritage?

Answer: There are no pre-defined or overarching criteria for selecting consultants to engage in work that is related to First Nations people and Aboriginal Cultural Heritage. However, the appropriate evaluation criteria is defined during the procurement process for the engagement.

Supplementary questions:

- 1. Please list every professional services engagement undertaken since 2017. In your answers, please detail:**
 - the agency or individual engaged,
 - the details of the work requested for each engagement,
 - the details of the work undertaken for each engagement,
 - the tendering process for the engagement,
 - which other agencies were approached for a quote or tender for each engagement,
 - the initial value of the engagement,
 - the contract period relating to the engagement, and whether the engagement period was extended. If the engagement was extended, the additional length of that engagement as a result of the extension and the additional value of each subsequent extension,
 - the total value of the engagement, and
 - whether a post-engagement evaluation of the work was completed

Answer: Please refer to the attached document titled “Supplementary Question 1 report”. The report is made up of 3 tabs, being:

- Engagements - Contracts – this tab contains data at the overall contract level of engagements at where Sydney Water established a contract with the professional services contractor.
- Engagement - PO over \$50K – this tab contains data of engagements where Sydney Water raised purchase order over \$50K for the engagement. The purchase order may or may not be part of the contracts disclosed in the tab mentioned above.
- Engagement - PO under \$50K – this tab contains data of engagements where Sydney Water raised purchase order under \$50K for the engagement. The purchase order may or may not be part of the contracts disclosed in the tab mentioned above.

For clarity, please note that engagement with purchase order can and may be part of engagements already disclosed as engagements with contract. Therefore, the data in each tab should be reviewed separately from other tabs.

- 2. Since 2017, how many times has the services of an independent probity advisor been engaged to provide written advice determining the propriety and/or recommend any mitigation/treatment action for engagements where there could be potential or perceived conflicts of interest or subsequent probity issues?**

Answer: There have been 18 projects where Sydney Water has engaged the services of an independent probity advisor to provide written advice regarding probity matters. Sydney Water typically engages a Probity Advisor for large, complex projects with many stakeholders or when there is the potential for a probity issue or conflict.

- 3. How many people employed by a consulting or contracting agency have been onboarded and are currently operating within the agency?**

Answer: In September 2023, the number of contractors/consultants were:
Contractors (agency hire) – 194
Professional Service Contractors – 367
Regional Development Consortia – 311

- 4. What is the total headcount of external contractors working in Sydney Water?**
- a. How many of those are in senior management positions?
 - b. How many of those external contractors have been engaged for a period longer than 12 months?
 - c. What is the average annual payment made in respect of each individual contractor? What is the mean annual payment? Please provide any other cost details recorded by Sydney Water.

Answer: The total of the three categories in question 1 is 872 and is based on contractor information in September 2023.

- a. How many of those are in senior management positions?**

A. Nil.

- b. How many of those external contractors have been engaged for a period longer than 12 months?**

A. There are 72 agency hire contractors and 234 Professional Services Contractors who have a commencement date prior to 1 September 2022. No commencement data is available for Regional Delivery Consortia.

- c. What is the average annual payment made in respect of each individual contractor?**

A. Only information relating to contractors through Agency Hire is available. The median is \$227,163.

- d. What is the mean annual payment?**

A. Only information relating to contractors through Agency Hire is available. The mean for this group is \$212,362.

- e. Please provide any other cost details recorded by Sydney Water.**

A. Only information relating to contractors through Agency Hire is available. Miscellaneous and expenses for the period is \$39,624.

- 5. How many people are directly employed by Sydney Water Corporation?**

Answer: For Financial Year 2022, Sydney Water's Full Time Equivalent was 2907.7.

This is based on annual workforce profile data submitted to the NSW Public Service Commission. It is based on Sydney Water employees only and excludes contractors.

- 6. How many people are employed by external providers, including consultants, to deliver:**
- a. capital works,**
 - b. maintenance work,**
 - c. operational work, or,**
 - d. any other related work by Sydney Water Corporation**

Answer: 6.a Refer to answer 3 of questions taken on notice.

6.b.c.d Refer to the answer for supplementary question 3.

- 7. What is the tendering process for:**
- a. consulting work and projects**
 - b. capital works and projects**
 - c. operational, maintenance works and projects**

Answer: Please refer to the attached document titled "Supplementary Question 7 Answer".

- 8. What is the list (if any) of preferred providers, and how is that list determined for**
- consulting work and projects**
 - capital works and projects**
 - operational, maintenance works and projects**

Answer: Please refer to the attached document titled "Supplementary Question 8 Answer".

- 9. Does the executive or board have a current or previous relationship with any of the providers on the preferred providers lists?**

Answer: Yes, the approved supplier relationships broadly fall within the following categories:

- Business relationships of the Executive necessary to achieve the goals of Sydney Water
- Prior employment or professional relationships with consulting firms
- Universities
- Integrated Designers, Constructors and Maintenance & Operations Business.

Sydney Water has a robust Conflict of Interests framework to manage actual, perceived, and potential conflicts of interest in a proactive manner. This framework is administered by Corporate Secretariat and adheres with established corporate governance principles with the objective to mitigate any risk of interference or undue influence.

- 10. For all consulting work and projects, capital works and project and operational, maintenance works and projects provide a list of projects commenced since 2019 including:**
- a. The name of the project**
 - b. The number and name of companies that bid for the project (including internal bids)**
 - c. The quoted cost for all bids for the project (including internal bids)**

- d. The name of the successful tenderer for the project**
- e. The cost of the project**
- f. Details of any variations including number and cost**

Answer: Please refer to the attached document titled “Supplementary Question 10 Answer” and attached spreadsheet titled “Supplementary Question 10 – RDCs projects”.

11. Provide the names of any companies that conducted or are conducting any feasibility studies or design proposals and whether they have access to Sydney Water information, for:

- **consulting work and projects**
- **capital works and projects**
- **operational, maintenance works and projects**

Answer: Please refer to the attached document titled “Supplementary Question 11 Answer”.

12. Provide the names of any companies that provided or are providing project management and whether they have access to Sydney Water information, for:

- **consulting work and projects**
- **capital works and projects**
- **operational, maintenance works and projects**

Answer: Aurecon Australasia Pty Ltd and Arup had employees with Sydney Water who had access to information for consulting work and projects, capital works and projects, and operational, maintenance works and projects.

13. Were any of the companies involved in developing design or other proposals for consulting work, capital works or operational maintenance works and projects, or feasibility studies awarded tenders for the delivery or project management of those works or projects? If so please identify the name of the company and the project.

Answer:

No. Most feasibility studies, early planning and concept design for Sydney Water projects are completed by the integrated Planning Partner, barring some Major Projects. There is a separation between designers involved in feasibility studies, early planning and concept design with designers involved in detailed design as part of design and construction.

To supplement Sydney Water’s internal capabilities, some design companies involved in feasibility studies, early planning and concept design, might provide client-side project management or client-side technical advisory services. However, these resources are not part of delivery contractors.

14. Identify if the executive or board has any relationships with the companies identified in the previous question, in the past or present.

Answer: Nil.

Sydney Water Corporation ABN 49 776 225 038
1 Smith Street, Parramatta, NSW 2150 | PO Box 399, Parramatta, NSW 2124
Telephone 13 20 92 **Media (24/7)** 8849 5151 sydneywater.com.au

15. Please provide a list of all fines, penalties and breaches issued by any licencing, regulatory or similar oversight agency since 2018.

- **What is the value of those fines, penalties and breaches?**
- **What is the nature of the offence that led to the imposition of those fines, breaches and penalties?**
- **What, if any action is/was required in addition to the payment of a fine and/or penalty?**

Answer: Please refer to the attached document titled "Supplementary Question 15 Answer".

Question on notice # 3: Over past three years, list of all projects in which Sydney Water has engaged outside contractors. Include details on what they are, how Sydney Water undertook them and how many people were engaged. Please also clarify whether Roch Cheroux has any past or current relationships with any of the providers from the above list.

Answer:

Projects where Sydney Water awarded contracts to its vendors to undertake work in the last three financial years with committed expenditure over \$10m.

Capital Works Project over \$10m (Major Projects)

Project	Package	Name of Package	Contract Signing Year (FY)	Original Contract Value	Tender type	Successful tenderer

Total	3,646,065	5,006,183	8,652,248

Based on the number of hours worked in above table, Sydney Water estimates that it engaged:

- 1,845 people (Full-time equivalent) in FY22, and
- 2,533 people (Full-time equivalent) in FY23.

Roch Cheroux's past relationships with any of the providers from the above list:

- Managing Director of United Utilities Asia Pacific (October 2008 – December 2010). United Utilities Asia Pacific is now Trility.
- CEO of Suez (July 2011 – June 2016).
- In the Upper South Creek plant project, Trility was the successful tenderer as part of John Holland and Trility Joint Venture for the operation of plant.
- Suez was in Joint Venture with Acciona in the tender submission to the Upper South Creek plant project. However, it was unsuccessful.

6. Provide information that is given to NSW Treasury per the AE codes regarding consultant and contractor expenses.

Definition of consulting and contracting services:

Consultants are defined as companies that provide opinion or advice on a task. The consultant is independent of any ensuing process or work and Sydney Water decides whether to act on the consultant's findings. It is the advisory nature of the work that differentiates it from other tasks commonly provided by service contractors.

Contractor services are engaged to complete a piece of work or to carry out a specialised or professional task.

The primary reason for engaging a consultant is to give advice/opinion or make recommendations rather than to complete a piece of work /task.

7. Provide information on works conducted by Suez over the past 10 years.

Reference ID	Start date	Expiry date	Vendor entity	Description of works	Total value

5000462935	15-Jun-21	WESTERN SYDNEY UNIVERSITY	ARC Nitrification Control - Pilot Plant BRC tool Validation	The ARC nitrification project is building on current research by identifying key microorganisms (using molecular analysis) responsible for accelerating chloramine decay across distribution systems and the fundamental mechanisms by which they decay chloramine. The project has developed the BRC tool to optimise solutions to manage chloramine decay and nitrification throughout the distribution systems and under a wide range of environmental and operational conditions. The work done in the pilot plant will be used to support the outputs of the ARC nitrification project which is being conducted with Western Sydney University. The ARC linkage component has been piloting a new Page 2 of 2 approach, developed by Western Sydney University, for early detection of chloramine loss in distribution systems. This ultimate outcome is the application of chlorine at a timely, targeted and minimal way. The approach also lends itself to a more precise and efficient online monitoring and control. In addition to extending to the grant there is an additional request for funding. The requested \$130K is to cover the costs of 2 researchers at 0.6 FTE for 7 months and consumables for work carried out at University of Western Sydney	Single Source	124475

Supplementary Question 7: What is the tendering process for:

- a. consulting work and projects
- b. capital works and projects
- c. operational, maintenance works and projects

Answer: Sydney Water’s Procurement Policy sets out the broad purpose, principles and requirements for performing procurement at Sydney Water. Within the Procurement Policy, there are five procurement pathways that Sydney Water employees can take to acquire goods and/or services that are required.

The appropriate procurement pathway for procurement activity is determined by considering whether or not contract(s) with agreed pricing/rate cards for the required goods or services are in place, the risk rating and total value of the procurement activity.

The following Procurement decision matrix outlines the procurement pathway.

Pre-existing arrangement	Financial threshold (exc. GST)	Risk rating ⁽²⁾	Procurement pathway
Not available	Up to \$2k	Low	Purchasing card ⁽³⁾
	Up to \$50k	Low	Single quote process
	Between \$50k to \$250k	Low	Multiple quotes process ⁽⁴⁾
	Up to \$250k	Medium High	Tactical sourcing process
	Between \$250k to \$500k	Low Medium	Tactical sourcing process
	Between \$250k to \$500k	High	Strategic sourcing process
	More than \$500k	Any	Strategic sourcing process
Pre-qualified suppliers ⁽¹⁾	Up to \$50k	Any	Single quote process
	Between \$50k to \$250k	Any	Multiple quotes process ⁽⁴⁾
	More than \$250k	Any	Tactical sourcing process
Approved panel of contracted suppliers as published in iConnect	Up to \$50k	Any	Single quote process
	Between \$50k to \$500k	Any	Multiple quotes process ⁽⁴⁾
	More than \$500k	Any	Tactical/Strategic sourcing process
Approved pre-existing arrangement with only one contract/supplier available	Any	Any	Direct purchase ⁽⁵⁾

Notes

1. Pre-qualified suppliers are suppliers that have completed pre-qualification process and approved by Sydney Water in ARIBA system.
2. Risk rating for goods and services **must** be assessed using the [Goods and services risk assessment tool](#).
3. For goods and/or services that can't be acquired using our purchasing systems only and in accordance with our [PCard policy](#). Follow the Single quote process if PCard is not available.
4. Minimum of three quotes are required.
5. Quote may be required if purchase order value can't be determined up front.

Therefore, the procurement process as set out in the Procurement policy for consulting work and projects; capital works and projects; and operational, maintenance works and projects, will require the requestor to take the following steps:

- 1) Identify if there is any approved pre-existing arrangement that is suitable and meet the requirement,
- 2) Estimate the total value of engagement, and

- 3) If there is no approved pre-existing arrangement available, conduct risk analysis to derive risk rating.

Based on the outcome of above steps and the Procurement decision matrix, the requestor will need to follow the specified procurement pathway, which will be one of the following:

- 1. Direct purchase**

Where the required goods or services can be fulfilled by an existing supply contract and the value of the purchase order can be determined based on the pre-defined rate card, a purchase requisition may be raised and converted to a purchase order without undertaking a sourcing process.

- 2. Single quote process**

One written quote must be obtained and assessed against acceptance criteria. If a sub agreement is required, it must be executed in accordance with the Delegations manual. A purchase order must be raised and issued to the supplier in accordance with the [Sydney Water purchase order terms and conditions](#).

- 3. Multiple quotes process**

A minimum of three written quotes must be obtained. Value for money and acceptance criteria must be considered in determining the selected supplier. If a sub agreement is required, it must be executed in accordance with the Delegations manual. A purchase order must be raised and issued to the selected supplier in accordance with the [Sydney Water purchase Order terms and conditions](#).

- 4. Tactical sourcing process**

Tactical sourcing is a reactive approach that focusses on short term and transactional requirements. The tactical sourcing process must be undertaken with the direct and early engagement of the Procurement team where:

- A procurement strategy must be prepared or endorsed by the Procurement team, and approved in accordance with the Delegations manual.
- If a tender is required, The Tender Evaluation Panel must be led by a Procurement team member and comprise of a minimum of three members capable of evaluating tenders covering price and non-price evaluation criteria as set out in the Procurement strategy.
- A sourcing process must be conducted in accordance with the approved Procurement strategy.
- Evaluation must be conducted in accordance with the evaluation plan outlined in the approved Procurement strategy.
- A Recommendation to Award must be prepared, reviewed by the Tender Evaluation Panel, endorsed by the head of procurement, and approved in accordance with the Delegations manual.
- If a contract is required, it must be executed in accordance with the Delegations manual.

- 5. Strategic sourcing process**

Strategic sourcing is a systematic, long term and holistic approach to acquiring current and future needs. The strategic sourcing process **must** be undertaken with the direct and early engagement of the Procurement team where:

- A Procurement strategy must be prepared by the Procurement team, and approved in accordance with the Delegations manual.
- If a tender is required, the Tender Evaluation Panel must be led by a Procurement team member and comprise of a minimum of three members capable of evaluating tenders covering price and non-price evaluation criteria as set out in the Procurement strategy.

- The sourcing process must be conducted in accordance with the approved Procurement strategy.
- Evaluation must be conducted in accordance with the evaluation plan outlined in the approved Procurement strategy.
- A Recommendation to Award must be prepared, reviewed by the Tender Evaluation Panel, endorsed by the head of procurement, and approved in accordance with the Delegations manual.
- A contract must be prepared and executed in accordance with the Delegations manual for goods and services over \$250k.

Requirements for each of the procurement pathway are summarised in the table below.

Procurement pathway requirements

Requirements	Direct purchase	Single quote	Multiple quotes	Tactical sourcing	Strategic sourcing
Procurement strategy				✓	✓
Request for tender (RFT) or appropriate market engagement document				✓	✓
Written quote(s)	✓ ⁽¹⁾	✓	✓ ⁽²⁾		
Tender submission				✓	✓
Recommendation to Award (RTA)				✓	✓
Executed contract ⁽⁵⁾		✓ ⁽³⁾	✓ ⁽³⁾	✓ ^{(3),(4)}	✓
Purchase order ⁽⁵⁾	✓	✓	✓	✓	✓

Notes

1. Quote may be required if purchase order value cannot be determined up front.
2. Minimum of three quotes are required.
3. Sub agreement may need to be executed if required by the terms and conditions set out in master agreement.
4. Executed contract is required for goods or service over \$250k.
5. For emergency events, retrospective contracts or purchase orders are required in accordance with section 2.7 emergency events.

Throughout the procurement process, the requestor must obtain approval in accordance with the delegation manuals. The current Delegations Manual outlines financial thresholds. The Delegations Manual differentiates financial thresholds between capital and operating funding and consultants as follows:

Delegation Band	Capital and operating funding and general procurement limits (see Notes 1, 2 and 3)	Procuring consultants and legal services limits (see Note 4)	Delegated officer
A	<ul style="list-style-type: none"> \$50 million \$20 million for Information Technology (IT) capital funding and procurement 	<ul style="list-style-type: none"> \$50 million \$20 million for IT consultants and for legal services 	Managing Director/CEO
B	\$10 million	\$500,000	General Managers Asset Lifecycle, Customer Delivery, Finance & Business Performance
C	\$5 million	\$500,000	All other General Managers
D	\$5 million	\$50,000	Heads of Business that report to delegation band B Managers
E	\$1 million	\$50,000	Heads of Business that report to delegation band C Managers
F	\$1 million	Nil	Level 4 Managers that report to delegation band D Managers
G	\$500,000	Nil	Level 4 Managers that report to delegation band E Managers
H	\$100,000	Nil	All Level 5 Managers
I	\$10,000	Nil	All Level 6 Managers

In circumstances where requirements of all or parts of the Procurement Policy can't be followed, the requestor must seek approval for the exemption to the Procurement Policy by obtaining approval from a General Manager and endorsement from the Head of Procurement prior to commencing a procurement activity. This is in addition to the required approval set out in the Delegations Manual.

Supplementary Question 8: What is the list (if any) of preferred providers, and how is that list determined for:

- a. consulting work and projects
- b. capital works and projects
- c. operational, maintenance works and projects

Answer: Sydney Water does not have preferred providers. Instead, approved pre-existing arrangements may be established as a result of an appropriate procurement process and in accordance with the Procurement Policy. Examples of approved pre-existing arrangements at Sydney Water include:

Approved Sydney Water Panels

These are prequalified suppliers who have demonstrated that they are able to meet Sydney Water's mandatory criteria including safety and environmental.

These are based on a maximum rate that is negotiated at the time of an activity being required. These are also based on zero value zero commitment contracts.

These panels are open and are constantly reviewed based on Sydney Water's needs with potentially suitable suppliers.

Examples of approved supplier panels are:

- Accommodation Fitout Minor Build
- Contaminated land
- Demolition, Remediation & Hazardous Building Materials Removal
- Digital Delivery
- Digital Testing
- Engineering Design Services
- Horizontal Directional Drilling & Micro-tunnelling
- Professional Services Contractor for Infrastructure projects
- Professional Services (Performance & Management Services)
- Specialist Environmental & Heritage
- Wastewater Tankering Services

These panels have been established as a result of a procurement process and where possible, Sydney Water leverages NSW Procurement's scheme such as the [Performance and Management Services Scheme \(SCM0005\)](#)

Shared Purchasing suppliers

There is a contract type known as specialised in Shared Purchasing and these are contracts where Sydney Water as the client, instruct the Regional Delivery Consortia that they need to use these suppliers for the nominated Goods or Services.

These suppliers were awarded contracts based on a tender process to ensure they meet all of Sydney Water's mandatory criteria as well as in some cases to ensure nil risk to customers. For example, utilising a specific pipe supplier to ensure the specifications are in line with the required standards.

Examples of specialised services contracts within Shared Purchasing:

Services description	Contracted suppliers
Blasting & Corrosion Protection Services	<ul style="list-style-type: none"> • Eptec Services Pty Ltd • McElligot Partners Pty Ltd • Ray's Machinery Painting Pty Ltd (RMP)
Dewatering Equipment Servicing	<ul style="list-style-type: none"> • Alfa-Laval • Andritz
Electrical Services - High Voltage (maintenance)	<ul style="list-style-type: none"> • Ventia Utility Services
Specialised grounds maintenance - Riparian land management services: bush regeneration & weed management	<ul style="list-style-type: none"> • Dragonfly • Toolijooa
Dewatering Services	<ul style="list-style-type: none"> • Dredging Solutions
Process unit cleaning services	<ul style="list-style-type: none"> • Aqua Assets
Silt and Debris Removal from Wastewater and Stormwater assets and Emergency Response Services	<ul style="list-style-type: none"> • Aqua Assets Pty Ltd • Pipe Management Australia Pty Ltd • Total Drain Cleaning Services Pty Ltd • Veolia Environmental Services (Australia) Pty Ltd • Water Brothers Group Pty Ltd • Veolia
Fixed Lifting Equipment - Inspection and Maintenance	<ul style="list-style-type: none"> • Cranetec
Ventshaft Maintenance	<ul style="list-style-type: none"> • Eptec Services Pty Ltd

Scaffolding Services	<ul style="list-style-type: none"> • Above Scaffolding Pty Ltd • KJ Industrial Scaffolding Pty Ltd • Waco Kwikform Pty Ltd
Contaminated & GSW Putrescible Landfill and/or Processing Services	<ul style="list-style-type: none"> • Veolia • Cleanaway Pty Ltd
Recovered Materials Logistics Services	<ul style="list-style-type: none"> • Cleanaway Pty Ltd
Recovered Materials Processing and/or Landfill Services	<ul style="list-style-type: none"> • Brandown Pty Ltd • Recycling Parks Pty Ltd

Regional Delivery Consortia (RDC)

The RDCs were awarded based on regions and are expected to maintain best value outcomes for Sydney Water customers. This work is allocated on an annual basis via an Annual Integrated Work Plan, noting that Sydney Water can ask another RDC to submit a proposal at any time.

Supplementary Question 10: For all consulting work and projects, capital works and project and operational, maintenance works and projects provide a list of projects commenced since 2019 including:

- a. The name of the project
- b. The number and name of companies that bid for the project (including internal bids)
- c. The quoted cost for all bids for the project (including internal bids)
- d. The name of the successful tenderer for the project
- e. The cost of the project
- f. Details of any variations including number and cost

Answer:

The following table outlines the key projects included in this answer;

Type of works and project	Projects included in this answer
Consulting works and projects	Planning Partner Please note that all consulting engagements are included in the answer to supplementary question 1
Capital works and project and operational	All Major Projects
Operational, maintenance works and projects	Regional Delivery Consortia (RDC) A list of projects undertaken by the internal Specialised Services team is also provided

Planning Partner

The Planning Partner forms part of the Partnering for Success (P4S) enterprise-wide delivery model. In the planning function, the Planning Partner will provide both strategic and tactical planning resources to augment Sydney Water’s planning function on a long-term basis in terms of capability and peak workload management. The integrated function will define product and asset management plans, servicing strategies and plans, early designs and requirements for candidate investments. Planning will remain separate from delivery, operations, and maintenance functions to maintain the independence required for prudence but will incorporate expertise from across the value chain to optimise investment strategies and candidate investments. The Planning Partner undertook:

- Advisory Services – task-specific needs to assist servicing strategy and modelling teams with needs as required. Based on a defined scope or work.
- System Planning – Includes regional and system planning as well as asset level planning and options assessment. Operates as an integrated team.
- Early Design Services – Investigation, feasibility and concept design of projects. Based on a defined scope of work.

Three companies bid for the project and Aurecon/Arup was the successful tenderer. The estimated contract value is \$280M, based on 10-year term. The contract commenced in January 2019.

Major Projects

Major Projects currently underway, along with relevant information pertaining to this question, are provided as part of our answer to question on notice 3.

Regional Delivery Consortia (RDC)

In 2019, Sydney Water identified an opportunity to drive efficiency, innovation and increase value through a new procurement and contracting approach for the sourcing of existing outsourced services. Sydney Water then established a clear view for the future state of the design and delivery of work across the value chain which will routinely deliver:

- Increased certainty in delivery
- Cost efficiency and certainty; and
- Enhanced Sydney Water and industry capacity.

All of which contribute to driving greater value for customers.

Feedback from industry indicated that there was an opportunity to further increase value for customers by adopting a procurement approach that favoured greater integration and managed delivery by geographical Regions. This approach was validated internally with stakeholders across the asset management lifecycle.

Partnering for Success (P4S) is a new procurement method, and contracting approach, for the sourcing of existing outsourced services helps Sydney Water integrate with industry partners and deliver consistent customer outcomes. It is about changing the way Sydney Water works with its industry partners and suppliers across the Sydney Water Value Chain and the asset lifecycle – Plan, Design, Construct, Maintenance and Operation.

Under the P4S model, three Regional Delivery Consortia (RDC), consisting of multiple companies who have come together to provide design, construction, maintenance, and facilities management services on a regional basis (North, South and West). The boundaries regions align broadly to Sydney Water's water and wastewater network operational boundaries. Some projects may span several regions, as do some local government areas.

Services provided by the RDCs, in accordance with contractual requirements, include:

- Mobilisation services
- Management services
- Annual integrated work program development
- Design services
- Construction services
- Maintenance services
- Facilities management services
- Demobilisation services

The following consortiums were successful following Sydney Water's tender.

Region	Consortium name	Make-up of the consortium
North	Confluence Water	<ul style="list-style-type: none">• Downer• Ventia• Jacobs
West	West Region Delivery Team	<ul style="list-style-type: none">• Stantec• Abergeldie• Fulton Hogan• Programmed• Atlas
South	D4C	<ul style="list-style-type: none">• John Holland• ServiceStream• WSP• Comdain

A list of works and projects undertaken by RDC's in Supplementary are provided in attachment Supplementary question 10 – RDCs projects.

Projects delivered by the Specialised Services Team

Specialised Services are responsible for a range of civil maintenance and minor construction services utilising both specialised internal work teams and a range of service and delivery contractors to complement and supplement the internal civil maintenance workforce in the delivery of annual maintenance programs. This requires the establishment and management of a range of civil maintenance and related service contracts that support the Networks business.

The following table outlines projects undertaken by the Specialised Services team from 1 July 2019.
