To: Scyne Advisory

From: The Hon. Dr SARAH KAINE

QoN: Are you or will you be using any form of artificial intelligence internally to either consolidate and catalogue any information or put together tenders or advice?

- a. So you don't have any software or anything that enables you to scrape data from various places and then consolidate it in another place?
- b. So no content analysis of project reports et cetera?

Answer:

- To date, Scyne Advisory has not used artificial intelligence (AI) tools internally to either consolidate and catalogue operational information or put together tenders or advice.
- Our teams can access these kinds of tools for specific project work if required by a client. These activities are undertaken in accordance with the conditions of the data owner/s, and within broader client, data governance and legal requirements.
- Scyne Advisory is carefully considering future use of AI and other data technologies in accordance with the AI strategy and AI ethics policy set by Digital NSW.
