[Transcript - Undergrounding - 16 February 2024 - reaction FDW.pdf](#)

Dear Daniel,

Please find enclosed the transcript with some proposed changes and one clarification. I hope all is clear to you. If not, please let me know.

I changed here and there some words with the aim to ensure the correct understanding of what I stated.

I am not aware of any further questions to me after the hearing, or as a result of the hearing. Is that indeed correct?

Thanks and best regards,
Frank

Page 10 – Add sentence after line 30 stating: 'The reason I said may be that is also better, is that it is better sometimes to have a more independent and unbiased view. That was what I was referring to.'

Page 12 – Add sentence after line 32 stating: 'The Number of projects completed by DNV is more than 15. The confusion may be that a DNV project is not necessarily a project that is also realized. In many feasibility studies, planning studies, specification studies, network studies etc, 500 kV cables are considered. They may still be in the planning phase, or it may be opted to go for a different transmission level, but DNV did study the 500 kV option in the project.'

The amount of projects DNV did, is thus not related to the amount of realized connections in the world today.'

Page 13 – Replace words at the beginning of the sentence on line 30 removing 'It depends. That leads' and replace with 'The size of the renewable energy source leads'.
