**"WE NEED TO MOVE THE ARABS
("PALESTINIANS") AWAY FROM ISRAEL"**

It is the **ONLY** solution says Micah Avni and he should know:

"The terrorist who murdered my father is being released today. I'm saying out loud what all of Israel is thinking today. Please share."

Population movements in order to solve conflicts has many precedents through history. Recent examples include:

1. After WW II, approximately 12–14 million ethnic Germans were moved from Eastern Europe, particularly from territories reassigned to Poland, Czechoslovakia, and other countries under the Potsdam Agreement.
2. The partition of British India into India and Pakistan resulted in the displacement of 10–15 million people

There were also Greek-Turkish population exchange and of course the movement of Jews from Arab countries into Israel and elsewhere 1948.
