**Notes:**

1. This summary report is compiled with data extracted on 20 September 2010, sourced from the Bushfire Risk Information Management System (i.e. BRIMS). Therefore the completeness and accuracy of the report depends on the data extracted from the system at this time. These records reflect the current status of the data and include changes that have been made to the data which existed at the time that the original 2006/07 Annual Report figures were compiled and may have some variations from the original reported figures.
2. The number of 'works completed' includes all hazard reduction activities, hazard complaints and hazard reduction certificate activity types which resulted in completed hazard reduction works. Each 'works completed' may include multiple activities.
3. The derivation of the values covered by the completed works is based on a value of \$440,000 per property which is the Sydney's median house & content insured value in 2004.

## Hazard Reduction Works Summary for 2007/08

Notes:

1. This summary report is compiled with data extracted on 20 September 2010, sourced from the Bushfire Risk Information Management System (i.e. BRIMS). Therefore the completeness and accuracy of the report depends on the data extracted from the system at this time. These records reflect the current status of the data and include changes that have been made to the data which existed at the time that the original 2007/08 Annual Report figures were compiled and may have some variations from the original reported figures.
2. The number of 'works completed' includes all hazard reduction activities, hazard complaints and hazard reduction certificate activity types which resulted in completed hazard reduction works. Each 'works completed' may include multiple activities.
3. The derivation of the values covered by the completed works is based on a value of \$440,000 per property which is the Sydney's median house & content insured value in 2004.

## Hazard Reduction Works Summary for 2008/09

data extract date: 20 September 2010

1. This summary report is compiled with data extracted on 20 September 2010, sourced from the Bushfire Risk Information Management System (i.e. BRIMS). Therefore the completeness and accuracy of the report depends on the data extracted from the system at this time. These records reflect the current status of the data and include changes that have been made to the data which existed at the time that the original 2008/09 Annual Report figures were compiled and may have some variations from the original reported figures.

2. The number of 'works completed' includes all hazard reduction activities, hazard complaints and hazard reduction certificate activity types which resulted in completed hazard reduction works. Each 'works completed' may include multiple activities.

## Hazard Reduction Works Summary for 2009/10

data extract date: 20 September 2010

Notes:

1. This summary report is compiled with data extracted on 20 September 2010, sourced from the Bushfire Risk Information Management System (i.e. BRIMS). Therefore the completeness and accuracy of the report depends on the data extracted from the system at this time. These records reflect the current status of the data.
2. The number of 'works completed' includes all hazard reduction activities, hazard complaints, and hazard reduction certificate activity types which resulted in completed hazard reduction works. Each 'works completed' may include multiple activities.
3. The derivation of the values covered by the completed works is based on a value of \$440,000 per property which is the Sydney's median house & content insured value in 2004.
