

Economic Benefit Report - Commercial & Non-Commercial Camper Spend Patterns

Tourists staying in commercial caravan holiday parks spend more per location, more per day, AND stay longer at each location than campers staying at non-commercial locations

Caravan, RV & Accommodation Industry of Australia Ltd (CRVA) commissioned BDO to develop an Economic Benefit Report to consider the spending patterns of commercial campers and non-commercial campers, and the economic effect they may have on the regions they visit.

This study found that commercial campers have a much higher propensity to spend than campers staying in non-commercial camping areas on complementary goods and services offered at their chosen destination.

Face to face questionnaires were conducted at various commercial caravan holiday parks and noncommercial camping areas across three states and in seven regions. A total of 556 interviews were conducted with 217 interviews conducted with people staying in non-commercial camping areas, and 339 interviews with people staying in a commercial caravan holiday park.

The key findings of this study were commercial campers spend, on average, \$576 per location (excluding accommodation cost) compare to \$213 by non-commercial campers. The average daily spend for commercial campers is \$73, versus \$53 for non-commercial campers.

In addition to spending more in each location commercial campers, on average, also spend longer at each location than non-commercial campers.

Excluding accommodation commercial campers directly spend \$2b in Australia each year, with 90% of this spent in regional areas, and create \$5.4b of economic activity.

On average commercial campers create \$26m of economic activity in each starts it and experience of Australia per annum.
