**Subject:** RE: Inquiry into regional aviation services - Transcript and questions on notice

Regarding the supplementary question:

1. You note (page 3) that CENTROC supports members in their action to seek from Government financial assistance. Does this include securing grants for airport maintenance and upgrades?

Centroc provides support letters at the direction of the Board for member infrastructure upgrades including airports.

It has not made application on behalf of members for airport upgrades though has for other Council owned infrastructure eg. Water and Sewer.

Where it has undertaken strategic work on regional priorities including infrastructure, this is then used by both Centroc and members to help access funding.
