

**LEGISLATIVE COUNCIL
BUDGET ESTIMATES
QUESTION ON NOTICE**

The Hon. RICK COLLESS: Minister, just following on from that. Do you have an incident management plan in place for these outbreaks?

Mr PHILIP KOPERBERG: The short answer is, yes.

The Hon. RICK COLLESS: Would you be able to provide a copy of that to the Committee?

Mr PHILIP KOPERBERG: Yes. They will vary, of course. The Sydney Catchment Area has one for its particular responsibility and I am sure the same prevails elsewhere. We will provide it. I will take it on notice.

ANSWERS:

The Sydney Catchment Authority has a Cyanobacteria (Blue Green Algae) Response Plan in place. A copy of the Sydney Catchment Authority's Cyanobacteria (Blue Green Algae) Response Plan (current as of 8 November 2007) is attached for the Committee's information.

Phil Koperberg
