THE TRANSPORT NEEDS OF SYDNEY'S NORTH-WEST SECTOR

Name: Mr Kevin Gray

Date received: 15/10/2008

Sydney's economic history traditionally saw its growth follow the railway. Suburbs from the 1880's were developed along the rail routes and we had planned expansion. Now in the 21st century we develop first then put in the transport infrastructure afterwards ! Our priority needs to go back to getting the infrastructure in first then expand the population. A northwest rail link is essential for the north west or we need to stop the growth plans for the area.
