INQUIRY INTO HOME SCHOOLING

Name: Name suppressed

Date received: 21/07/2014

Partially Confidential

I'm a 11 year old boy living in a family who has been home schooling for 4 years. I like doing homeschooling because of the freedom and calmness of it all. I also like choosing my own projects. When I went to school my family seemed very stressed and hurried, but now were a lot more organized and calm. Some people think that we don't see much of our friends but we see them almost every day, we also see them because of weekly classes. My favorite thing about homeschooling is spending more time with my family, we do lots of things together like shopping, cooking, reading, playing board and card games, drawing and looking up questions.
