INQUIRY INTO HOME SCHOOLING

Name: Name suppressed

Date received: 26/07/2014

Partially Confidential

Dear Sir Madam,

I wish to encourage home schooling although I don't home school but if I had the opportunity I would as I have many friends and neighbours who do. All of the children I have observed are functioning very well and some are doing better than those in the school system. Some I know are doing advance university at an early age. I find with home schooling children are less distracted and can focus on learning much better. School time has a lot of wasted time you can achieve so much more at home as you aren't held to their timetable.
