THE TRANSPORT NEEDS OF SYDNEY'S NORTH-WEST SECTOR

Name: Ms Julie Kersake

Date received: 26/09/2008

How can we get out of our cars when there is very little else to get into. even the bus services we have are too infrequent, especially out of peak hour and in my experience they are often late and on occasions don't even turn up. If we cannot have a rail line, we need more bus routes, more busses, and more frequent timetabling all through the day. I will not give up the convenience of a car to sit at a bus stop for 30minutes waiting for a bus that may or may not arrive. Once busses run at no more than 15 minute intervals, most of the day, then I will use them.
