INQUIRY INTO GREYHOUND RACING IN NSW

Name: Name suppressed

Date received: 6/11/2013

Partially Confidential

The dog killing industry of greyhound racing is insupportable. Killed in large numbers, these sentient animals die, injured from racing, drugged, passed on to universities, used for blooding, and exported to countries without welfare laws. Are Australia's animal welfare laws only for show? Live baiting, shooting still occurs and violent techniques are used to train. Breeding animals for this purpose is barbaric.
