**INQUIRY INTO MANAGEMENT OF PUBLIC LAND IN
NEW SOUTH WALES**

Name: Name suppressed
Date received: 31/08/2012

Partially Confidential

Public land, especially National Parks, should remain protected from hunting and other such activities because if not, over time very few breeding populations of any fauna group would escape the disturbance of fear, resulting in non-breeding and so a decline in their population strength and numbers, eventually placing them on the endangered list. Physical disturbance will degrade sensitive ecosystems. And so these disturbances alone, even without the inevitable accidental or intentional shooting, trampling and other harm will hasten the decline of Biodiversity. And for us, the peace, beauty and safety of our beloved bush places will be destroyed.
