INQUIRY INTO COAL SEAM GAS

Name: Ms Karen Kolenc

Date received: 02/09/2011

I completely opposed to Coal Seam Gas ANYWHERE & certainly in the Macarthur area where I live.

As you would be aware there is a HUGE amount of evidence regarding the "side effect" of this style of mining & I cannot believe an Government in any country could still consider approving any further mining.

I appeal to the common sense of the government for the environmental wellbeing of all plants & animals on earth to STOP this kind of mining & certainly NOT APPROVE of anymore sites.
