I believe that marriage should remain as it always has been from the beginning, when God chose woman to be the help mate for man. He knows what He's doing and what is best for His creation. Parliaments should not have the authority to change such a fundamental institution as Marriage and it would definitely harm our way of life into the future. Our children need the security of the family relationship and have a Mother and a Father. Please reconsider any plans to re-define the place marriage has in our lives today.
