**INQUIRY INTO THE PRIVATISATION OF PRISONS AND
PRISON-RELATED SERVICES**

Name: Mr Ervin Attila Rotik
Date received: 25/02/2009

The voters of NSW will rightfully deduct - that the Government is abandoning a responsibility given to them by a mandate by the citizens of this state.

Privatise electricity: equals, more cost to the consumer.

Privatise prisons: could easily equal more corruption in the future - in our rehabilitation system. (social disaster) .

The authority of the state - naturally - more clearly and forcefully or benevolently reflects (with rightfully unanticipated better outcome) the overall goal of rehabilitation processes - that indeed will have to represent the ever-present concern of our society...

Privatise the prison system perhaps one could easily see a scenario - where by the Tasmanian Gov, would somehow decide to appoint and delegate the full administration of the Tasmanian forestry to a Japanese sawmill conglomerate.

Of course this is a paradox. But you never know ! Thank you.
