

INQUIRY INTO SAME SEX MARRIAGE LAW IN NSW

Marriage equality is essential to ensure a truly equal Australia and end ALL discrimination, I personally do not want my partner and I to have to go another day being denied human rights to marry, we planned to have gotten married last October but were denied that right by our own government, we are very committed people and considering the high rates of divorce amongst heterosexuals I think it's rather sad that certain sectors and people put down and make horrible lies about same sex marriages and what it will do to marriage when nothing proves it would be a bad thing to legalise, I do not want our daughters to be brought up in a country where the government says it's OK to deny human rights and promote discrimination. It's hypocritical for groups and governments to claim to be of non-discriminatory views yet will not back same sex marriage, a lot of gay hate groups like the Queensland Australian Christian Lobby have spread lies and hate about same sex relationships and Campbell Newman and his party along with the Nationals have backed their hate-filled views, the Australian Christian Lobby spent 90% of their funds last year trying to stop marriage equality rather than spending money on homeless people and abuse victims. It's time Australia becomes fully equal and once these laws for equality are in place they must be iron-clad and protected as certain political members like Tony Abbott will do anything to destroy their rights. We pay taxes yet are excluded from human rights that every heterosexual human has, we are denied the same legal rights and benefits married couples have, it's time homophobia's biggest fuel to the fire, anti marriage equality ends and full equality is instilled into Australian life to end the poison that is discrimination against the LGBTIQ community and the government MUST back this along with the 64% of Australians who want equality, listen to the people who put you in power and stop the suicides amongst the LGBTIQ community, stop the hate crimes and deaths.
