Der Committee Members,

I am writing to you regards your consideration into legalising same sex marriages. Firstly it should not be a matter considered by the states as it is a federal matter. It would be unbenofficial to our state and our nation for this to be allowed to happen. Marriage has been around since the time of Adam and Eve and it is a natural union for the procreation of children. To deny children, our most vulnerable members of society, the nurturing of a mother and a father by legislation would be criminal. To teach our children that this is normal is a disgrace. It just isn't normal ... children aren't created that way! Call it what you want but let's not call it marriage which would mean changing legislation. Thank you
