We are dealing with human beings here. It should not be put out for a profit making organisation to manage. The whole idea is to help these people not have a punitive attitude. How can we know who they will employ to care for these people. I have experience in working in these institutions and privatisation is not the answer. Please reconsider as we have many well trained individuals who do their best to rehabilitate these unfortunate human beings many of whom have simply made bad choices. "Therefore by the grace of God go !"

How lucky I am

Thank you
