

INQUIRY INTO SAME SEX MARRIAGE LAW IN NSW

Name: Rev Raymond Wadeley

Date received: 15/02/2013

Dear Sir / Madam, history records that whenever homosexuality has been accepted as normal and equal to natural marriage that community has perished. Please do not permit the aggressive push by certain people to slowly destroy our thriving community. Marriage has always been a male / female norm, since the beginning of humanity, it was established before government or any other human institution. Families, tribes, nations are built on man woman child procreation. this is what God blesses and nothing else. Also there is the issue of freedom of speech and religion, these also are vital components of a thriving community where all get the right to speak about the issues of life. Thank God our national leaders are against same sex marriage, it is a federal issue and no state government should be legislating for this issue. Be wise, be strong, show leadership and keep Australia, Australian where men are men adn women are glad of it.
