**INQUIRY INTO PERFORMANCE OF THE NSW
ENVIRONMENT PROTECTION AUTHORITY**

Name: Mr Phillip Blackwell

Date received: 28/08/2014

Dear Sir/Madam,

New South Wales needs a fearless and independent Environment Protection Authority that puts the interests of the community and natural environment first.

Most importantly, it must be adequately resourced so that it can effectively meet its objectives and enforce compliance with conditions of licence or approval, defend regulatory policies and actions through law when required, or prosecute offenders.

Increased growth and industrial development are placing enormous pressure on the air we breathe, the water we drink and the ecosystems which support our well-being and survival.

The EPA has an important role to play in protecting, restoring and enhancing the quality of the environment in New South Wales. However a number of recent incidents highlight the EPA's failure to regulate or prosecute polluters and stop environmental breaches. Following these incidents there is strong public perception that the EPA has been captured by industry, and does not act in the public interest.

We look to this inquiry to address the specific concerns raised by the community and to make recommendations to ensure that the EPA is capable of putting the environment and healthy communities ahead of polluters.

CSG mining should be banned forever to save our present and future environment. We need to take a tougher stance on CSG and not be manipulated by the greed for profit of these companies. Have some foresight government and save our country.

Yours sincerely,
Philip Blackwell
