Dear Madam/Sir

**Parliamentary Inquiry into the State Government's Fit for the Future Local Government Reform Agenda**

In my local government area of **Lane Cove** the State Government is proposing that our Council be merged with Hunter's Hill, Mosman, North Sydney, Willoughby and two-thirds of Ryde.

**I do not support the forced merging of Lane Cove Council** for the following reasons:

- The Government has not provided any evidence that amalgamations will benefit communities;
- The Government has not undertaken any community consultation with ratepayers to find out what they want;
- Currently Lane Cove is financially sustainable and has no debt. Amalgamations cost a lot of money and it is the ratepayers who will have to pay;
- Local Councils are supposed to be local, being close to the people and working with communities to plan for neighbourhoods and town centres;
- There will be a significant reduction in Councillors meaning we will have less representation of local issues in our community;
- An amalgamation will bring the six different local council areas together, areas that are so different it will mean that the communities will get a one size-fits-all services, instead of services that are customised for each community of interest;
- I think it is essential to keep the local in local government and Lane Cove currently has a high level of quality, well-supported community services.

I believe that the Committee should acknowledge my Council's ability to represent the needs of our local community and that they should not be forced to amalgamate.

Regards,

Sarah McCarthy
