INQUIRY INTO USE OF CANNABIS FOR MEDICAL PURPOSES

Name: Name suppressed

Date received: 15/02/2013

Partially Confidential

I use cannabis for 2 reasons.

1/ to eliminate chronic eye pain from too many invasive procedures and

2/ it keeps my IOP (Intra-ocular pressure) lower for days at a time. High IOP = eye operations for serious glaucoma patients.

It would be wonderful to be able to chew a peice of gum containing high quality THC and CBD or similar.

When one suffers from serious pain/illness then one is forced to explore every available option possible.

Thanking You
