INQUIRY INTO COAL SEAM GAS

Name: Name suppressed

Date received: 7/09/2011

Partially Confidential

I object to the long term degradation of agricultural land by coal seam gas mining. This degradation is at the cost of primary producers who have little come back. The possibility that your farm and livelihood can be severely compromised at any time by a CSG project is not conducive to keeping farmers producing or attracting replacement farmers. Having a strong agricultural sector is an necessary part of any culture. We entrust our elected members to see past instant gratification of wasteful energy use at the demise of our food source.
