INQUIRY INTO COAL SEAM GAS

Name: Mr Mark King

Date received: 8/09/2011

I strongly feel Coal Seam Gas is in the vested interest of a few , who will acheive great finacial benefit from its exploitation. There is no concern for the people living with the aftermath of this very invasive mining technique. I say NO to any further Coal Seam Gas exporation and definite NO to any extraction. It isn't going anywhere it will be there in the future. Maybe our future generations can use it with a less destructive extraction technique. No more Coal Seam Gas.
