Date received: 15/07/2014

RE: MOOREBANK NSW 2173 INTERMODAL PROPOSALS

Most concerned at the concept of 1.7 Million TEU in container transport and handling in close proximity to housing and the Georges river.

The project could affect over 1 million Greater Sydney residents by direct pollution impact and the EPA have not listed the project as of worthiness for discussion by the committee.

In the USA 17 such facilities have faced legal challenge due to the emissions resulting from their operations and associated activity of Trucks and Trains.

As a significant project this scheme should be examined by the committee and the role of the NSW EPA should be brought into question.
