THE TRANSPORT NEEDS OF SYDNEY'S NORTH-WEST SECTOR

Name: Mr Raymond Pulis

Date received: 26/09/2008

Extend the "Bus Lane" on the M2 from the Epping tunnel to the Lane Cove Tunnel in both directions. This would not only decrease travel time for bus travelers, but would also encourage car users to stop sitting in the slow lane & take public transport as they see the buses fly past. Of course the number of buses & frequency would need to be increased, as current levels during peak periods are inadequate.
Thank you for your time.
