Marriage is union between a man & a woman, it has been accepted as normal in ages past, across all cultures, and religions, & before Parliament. Redefining marriage, deprives a child to be raised by their biological family. It confuses the child as who is his/her father and mother. Redefining marriage gives way to suppression of free speech & religion. Marriage between a man & a woman is supported by the majority of the population, same sex marriage was rejected by most Federal M.Ps. so State Government has no right to redefine the marriage status
