

INQUIRY INTO SAME SEX MARRIAGE LAW IN NSW

Name: Mr David Hinton

Date received: 15/02/2013

Marriage is a God given entity to bring a man and woman together and create a secure and loving environment for children and to give female and male roles to follow as they grow up and contribute to society.

Having two males or two females as parents robs the child of the natural right to this balance .

If homosexuals want to be together then that is something they have to be accountable for themselves and their right to choose. It does not give them the right to raise children without the balance they deserve.

If there has to be a legal union of homosexuals then let it be called something else such as a civil union but I am totally against any homosexuals raising children
