

INQUIRY INTO COAL SEAM GAS

Name: Name suppressed

Date received: 21/09/2011

Partially Confidential

I have a friend who works in the industry and says waste is the real worry. What to do with the saline water which kills everything wherever it goes. They plan on giant evaporation ponds but they are not safe. A spill in the Pilaga State Forest has killed everything in that area and repeated efforts to grow trees there have failed dismally. He wants to remain anonymous and for his protection I will too! Many thanks.
