INQUIRY INTO COAL SEAM GAS

Name: Dr Alexander Racklyeft

Date received: 31/08/2011

I believe that a moratorium on the controversial "fracking" process has been put in place until the end of 2011. The logic to a moratorium is that a solution should be found before starting again. An arbitrary amount of time will not necessarily provide a solution.

Therefore I proffer that THERE SHOULD BE A MORITORIUM ON THE CONTROVERSIAL "FRACKING" PROCESS UNTIL SUCH TIME AS EVERY ASPECT OF THE TECHNOLOGY HAS BEEN PROVEN TO BE SAFE.

The attached file from Food and Water Watch (USA) "The Case for a Ban on Gas Fracking" is worth reading.
