INQUIRY INTO COAL SEAM GAS

Name: Mrs Lisa Barber

Date received: 11/09/2011

We cannot allow the CSG industry to destroy our precious underground water supplies, our fertile productive farmlands that provide food for this country and the health of the people who reside in these communities. We need true, strong, decisive leadership on this issue. The only way forward is to halt all CSG operations and developments until all the facts and evidence are tested. If what we are hearing and seeing is correct, as we know it is, the industry shouldn't be allowed to continue. If the industry is confident it isn't harming the environment or people in any way, it should welcome this opportunity to clear its name.
