INQUIRY INTO GREYHOUND RACING IN NSW

Name: Mrs Susana Martinez

Date received: 24/10/2013

24. October 2013

To :

The New South Wales government

I am writing to make you my opinion on greyhound racing, the use of animals for human amusement and profit , these living and being part of our planet , suffering and feel .

Primitive cultures strongly believe that using animals for profit and fun, especially as vulnerable beings like dogs and especially those of the greyhound race . Being even more despicable to training , dopping , and later disposal of the poor dogs, as well as because once used are discarded and discarded as mere objects or simply not suitable or "good enough" for the purposes of profit .

Even more reprehensible are the means used to "get rid of them ." For me, as an immigrant in this wonderful country, and coming from a third world country , I am very surprised to even be considered , in this one of the countries listed in the first world accept and allow greyhound racing , if before having solved all items this entails and especially without monitoring and punishment to mistreatment and abuse of such noble beings .

If my opinion counts, being a new citizen, who in less than two years has considered adopting Australian nationality , this kind of " fun recreational " should be abolished, because for me it is no less barbarian that own Spanish bullfights .

I appeal to the wisdom of those who have in their hands to make decisions to evolve more to the country and raise awareness so that along with many more requests to take action on the matter and all this just remain in history as stage and show us overcome as more evolved human .

Thank you for your attention , thanking you in advance what they can do to change and abolish such low activity that takes advantage of the most deviles .

Susana Martinez
